*In this fully updated edition of *Believing in Magic*, renowned superstition expert Stuart Vyse investigates our tendency towards these irrational beliefs. Superstitions, he writes, are the natural result of several psychological processes, including our human sensitivity to coincidence, a penchant for developing rituals to fill time (to battle nerves, impatience, or both), our efforts to cope with uncertainty, the need for control, and more.*

*Believing in Magic: The Psychology Of Superstition ...*

*Vyse's book *Believing in Magic: The Psychology of Superstition* won the William James Book Award. He writes the monthly "Behavior & Belief" column for *Skeptical Inquirer* and personal essays in a variety of places—lately for the *Observer*, *Medium*, *The Atlantic*, *The Good Men Project*, and *Tablet*.*

*Believing in Magic The Psychology of Superstition - Updated Edition Stuart A. Vyse. Winner of the prestigious William James Book Award; An engaging account of what superstition is, why we have superstitious beliefs, and who is most likely to be superstitious; Examines the science behind this normal part of human behavior*

*Believing in Magic - Stuart A. Vyse - Oxford University Press*

*First, magic is sympathetic. It makes use of the principles of homeopathy and contagion in a way that religious rites do not. Second, magic is a form of direct action. Spells and rituals are aimed directly at a specific end, whereas prayer, for example, involves the persuasion of an intermediate figure.*
