With Charred & Scruffed, bestselling cookbook author and acclaimed chef Adam Perry Lang employs his extensive culinary background to refine and concentrate the flavors and textures of barbecue and reimagine its possibilities. Adam's new techniques, from roughing up meat and vegetables ("scruffing") to cooking directly on hot coals ("clinking") to constantly turning and moving the meat while cooking ("hot potato"), produce crust formation and layers of flavor, while his board dressings and finishing salts build upon delicious meat juices, and his "fork finishers"—like cranberry, hatch chile, and mango "spackles"—provide an intensely flavorful, concentrated end note. Meanwhile, side dishes such as Creamed Spinach with Steeped and Smoked Garlic Confit, Scruffed Carbonara Potatoes, and Charred Radicchio with Sweet-and-Sticky Balsamic and Bacon, far from afterthoughts, provide exciting contrast and synergy with the "mains."

In three novels of romantic suspense, artist Kit Delaney returns to Florida and a deadly legacy, Dr. Antonia Winters hides from a stalker on a lonely island, and DEA agent Kelly Sloan escapes murderous drug dealers to land near Galveston.

And while Nightwing struggles to uncover the truth behind the "fear germ" that is killing people in their sleep, he must also try to overcome his own sudden struggles with heights and vertigo. He has lost his primary skill set as a hero and will have to focus on his brilliance as a detective instead. And a distracting love triangle certainly isn't helping him focus...This new storyline spins out of events in BATMAN #55. Don't miss the start of a new direction in Nightwing's crimefighting career!

Renowned scholar-monk writes accessibly on some of the most contentious topics in Buddhism—guaranteed to ruffle some feathers. Armed with his rigorous examination of the canonical records, respected scholar-monk Bhikkhu Analayo explores—and sharply criticizes—four examples of what he terms “superiority conceit” in Buddhism: the androcentric tendency to prevent women from occupying leadership roles, be these as fully ordained monastics or as advanced bodhisattvas the Mahayana notion that those who don't aspire to become bodhisattvas are inferior practitioners the Theravada belief that theirs is the most

original expression of the Buddha ' s teaching the Secular Buddhist claim to understand the teachings of the Buddha more accurately than traditionally practicing Buddhists Ven. Analayo challenges the scriptural basis for these conceits and points out that adhering to such notions of superiority is not, after all, conducive to practice. " It is by diminishing ego, letting go of arrogance, and abandoning conceit that one becomes a better Buddhist," he reminds us, " no matter what tradition one may follow." Thoroughly researched, *Superiority Conceit in Buddhist Traditions* provides an accessible approach to these conceits as academic subjects. Readers will find it not only challenges their own intellectual understandings but also improves their personal practice.

Olon's story is about the survival struggles of primitive people in a vastly modern ecologically unsound world that wealds temporary powers over them. In more detail it is about the struggles of the Taglusi Capybara to survive as a food source for the Bantulo tribe of the Amazon river basin. Olon was chosen by fate to be the person who carries the battle of the Bantulo tribe through the Brazilian government courts. It's a story full of intrigue, murder, court battles and adventures in and out of the Amazonian jungles with many cliffhangers.

Curator and space historian at the Smithsonian's National Air and Space Museum delivers a brilliantly nuanced biography of controversial space pioneer Wernher von Braun. Chief rocket engineer of the Third Reich and one of the fathers of the U.S. space program, Wernher von Braun is a source of consistent fascination. Glorified as a visionary and vilified as a war criminal, he was a man of profound moral complexities, whose intelligence and charisma were coupled with an enormous and, some would say, blinding ambition. Based on new sources, Neufeld's biography delivers a meticulously researched and

authoritative portrait of the creator of the V-2 rocket and his times, detailing how he was a man caught between morality and progress, between his dreams of the heavens and the earthbound realities of his life.

Sexual Reckonings is the fascinating tale of adolescent girls coming of age in the South during the most explosive decades for the region. Focusing on the period from 1920 to 1960, Susan Cahn reveals how both the life of the South and the meaning of adolescence underwent enormous political, economic, and social shifts. Those years witnessed the birth of a modern awareness of adolescence and female sexuality that clashed mightily with the white supremacist and patriarchal legacies of the old South. As youth staked its claim, the bodies and beliefs of southern girls became the battlefield for a transformed South, which was, like them, experiencing growing pains. Cahn reveals how young women, both white and black, were seen as the South's greatest hope and its greatest threat. Viewed as critical actors in every regional crisis, from the economic recession and urban migrations of the 1920s to the racial conflicts precipitated by school desegregation in the 1950s, female teenagers became the conspicuous subjects of social policy and regional imagination. All the while, these adolescents pursued their own desires and discovered their own meanings, creating cracks in the twin pillars of the Jim Crow South--"racial purity" and white

male dominance--that would soon be toppled by the student-led civil rights movement. *Sexual Reckonings* is an amazingly intimate look at a time of deep personal exploration and profound cultural change for southern girls and for the society they inhabited, a powerful account of the clash between a society's fears and the daily lives and aspirations of its most prized, and unpredictable, population.

On 18 October 1945, a day that would haunt him for ever, Airey Neave personally served the official indictments on the twenty-one top Nazis currently awaiting trial in Nuremberg – including Hermann Goering, Rudolf Hess, Julius Streicher and Albert Speer. With his visit to their gloomy prison cells, the tragedy of an entire generation reached its final act. Neave, a wartime organiser of MI9 and the first Englishman to escape from Colditz Castle, watched and listened over the months as the momentous events of the trials unfolded. He describes the cowardice, calumny and, in some cases, bravado of the defendants – men he would come to know and who in turn would become known as some the most evil men in history. Was the trial victors' justice? Or was it civilisation's infinitely painful verdict on the worst crimes ever committed? These questions, and many others, are answered in this definitive eyewitness record of the Nuremberg trials.

Pigs is a hybrid novel, consisting of historical chapters and short stories. The first several chapters tell the story of a fictitious German family of tenuous nobility who escape from East Germany during the Soviet occupation, dodging Stasi agents and border guards, and eventually settle in Hood River, OR, where they build a Bed and Breakfast modeled after King Ludwig's Schloss Linderhof castle. The succeeding chapters are short stories about the lives of lodgers who stay at the Neue Schloss Linderhof. In many respects the compendium mirrors the tradition of "Winesburg, Ohio" by Sherwood Anderson or "Spoon River Anthology" by Edgar Lee Masters. The eponymous "Pigs" are metaphorical constructs in the guise of mature, thoroughly insensitive, atavistic, uber-powerful, all-grown-up men. In other words, men.

Chop-Monster is a sequential jazz improvisation method by acclaimed jazz pianist and educator Shelly Berg that utilizes a "call-and-response" approach: students listen to a jazz idea, imitate it until it is internalized, and then "try it on their own." In Chop-Monster 1, students will hear and improvise to the Ima7, iimi7, and V7 chords in the key of B-flat, plus a basic blues progression.

In 1978 Julian Richer, then aged just nineteen, opened his first shop near London Bridge. For over twenty years this shop has been listed in the Guinness Book of Records as having the highest sales per square foot of any retail outlet in the world, and the company as a whole, with its fifty-three stores nationwide and huge online presence, has become Britain's favourite retailer of TV and hi-fi equipment. What lies behind this extraordinary success? For Julian, the answer is simple: throughout his career he has focussed

relentlessly on putting people - both staff and customers - right at the centre of his business. And in *The Richer Way*, he offers a supremely practical guide to how others can follow suit. He explains how to motivate employees and measure their progress. He establishes how to balance company discipline with individual autonomy. He explores what 'customer service' should really involve. Above all, he points the way to creating an open, friendly and flexible culture that will not only attract the best people but also offer the greatest chance of business success. Packed with straightforward, common-sense advice, *The Richer Way* will prove essential reading for all organisations, whatever their nature and size.

Superiority Conceit in Buddhist Traditions

Make each day count as you start it off with the interesting and inspiring meditations in the "2017 Our Daily Bread Devotional Collection."

Sets out a simple month-by-month program to reveal all of the night sky's biggest and most beautiful secrets in just one year - and with only a few hours of stargazing each month. By investing just an hour a week and \$50 in binoculars, it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns - and what they tell us about Earth, the seasons and ourselves.

Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12 month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are - to the beginner - almost beyond belief. As well as

the vital constellations and clusters, and the weird and wonderful nebulas, he searches out "dark sky destinations" across the globe that help increase knowledge and give a new perspective on familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star-charts, binoculars, smartphone apps, telescopes, spots satellites and attempts basic astro-photography. By year's end, the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are and even where the Galactic Center Point is.
