The Bi-Metric is an essential part of the Alliance family which comprises the largest assembly of hip implants utilizing one simple, accurate and reproducible set of instruments. Designed to off-load stresses gradually from proximal to distal, all Bi-Metric components incorporate Biomet's proven bi-planar taper geometry. The stem geometry promotes

Bi-Metric Total Hip System - Biomet
The Bi-Metric® Hip System provides a comprehensive selection of femoral x-ray templates in 110%, 115% and 120% magnification. These templates are positioned over the AP and Lateral x-rays to best decide the correct implant size, modular head neck length and whether a standard or lateralised Bi-Metric® stem is required to restore the

Bi-Metric™ Operative Technique - Biomet
The Echo Femoral Hip System offers four stem designs with a wide range of sizing options to best meet patient needs and accommodate various surgical approaches: Echo Bi-Metric® stem provides clinically proven 1-5 proximal porous fixation in a traditional fit and fill design. Echo Bi-Metric Microplasty® stem allows for proximal porous fixation in a fit and fill design to conserve bone and accommodate minimally invasive surgical approaches.

Total Hip Arthroplasty | Echo® Hip System | Zimmer Biomet
bi-metric® hip system Since its introduction in 1984, the Bi-Metric® Hip System continues to provide a high degree of versatility and unsurpassed clinical performance. Developed by a team of orthopedic surgeons and engineers, the Bi-Metric® hip stem's major design concept of a 3° bi-planar taper is incorporated throughout nearly every Biomet hip system.

Bi-Metric Porous Primary Hip System – Orthob Store
The Bi-Metric femoral component (Biomet UK Ltd, Bridgend, UK) is a modular titanium alloy stem, with porous coating on the proximal third. There have been few published reports 1 , 2 , 3 on the medium-term performance of this femoral implant, but all available studies have demonstrated excellent stem survival rates.

File Type PDF Bi Metric Total Hip System Biomet starting the bi metric total hip system biomet to open every morning is normal for many people. However, there are still many people who afterward don't like reading. This is a problem. But, later you can preserve others to start reading, it will be better.

Bi Metric Total Hip System Biomet - gardempet.com
Total Hip System The Bi-Metric®Hip System Head/Neck Series is utilized for applications where a proximal/medial bone deficiency is present.

BHead/Neck - Hip
BioMedtrix proudly introduced the CFX® (Cemented Fixation) Total Hip System in 1990, and the BFX® (Biologic Fixation) system in 2003. Since then, over 54,000 procedures have been performed. Available in a broad range of sizes, the implants in each system are interchangeable, allowing for hybrid fixation, and are prepared to a common surgical preparation with a common set of instruments ...

Total Hip Replacement - BioMedtrix
The Echo Bi-Metric Microplasty stem is a metaphyseal loading, fit and fill femoral prosthesis with a simple, broach only surgical technique. Evolved from the clinically proven Bi-Metric brand3, the Echo Bi-Metric Microplasty option is approximately 30% shorter than the full length stem

Echo Femoral Hip System - Zimmer Biomet
Total joint systems require accurate and precise instruments to achieve a preparation capable of long term success with the implants. Reinspection of instrumentation is recommended following every 25 surgical procedures. The Instrument Calibration Program is a quality control service developed to maintain the accuracy of these instruments.
