Grade

5.L.2.1 Compare the characteristics
of several common ecosystems,
including estuaries and salt
marshes, oceans, lakes, and
ponds, forests, and grasslands.

5.L.2.2 Classify the organisms
within an ecosystem according to
the function they serve: producers,

Get Free Biomes And Ecosystem 5th Grade Study Guide

consumers, or decomposers (biotic factors). 5.L.2.3 Infer the effects that may result from the interconnected relationship of plants and animals to their ecosystem.

Ecosystems - 5TH GRADE SCIENCE

An ecosystem is a group of living organisms inter-acting with their environment. An ecosystem is like a play, with different animals, plants, and non-living things playing the different roles. The role each thing plays is called its ecological niche. Some of the roles are biotic (or living, like plants and animals), while some are abiotic
