Pada ayat tersebut dan ayat-ayat berikutnya diterangkan bahawa jin sebagai makhluk halus telah mendengar pembacaan Al Quran dan mereka mengikuti ajaran Al Quran tersebut. Jin merupakan sejenis makhluk halus yang dicipta dari api. Jin berbeza dengan malaikat. Malaikat semuanya beriman, sedangkan jin ada yang beriman dan ada yang kafir dan seperti manusia. Similar to angels, the Jinn are spiritual beings invisible to the naked human eye. In the Quran, it is stated that humans are created from the earth and jinn from smokeless fire in more than one instance. relatively short life (1058-1111), he established himself as one of the most important thinkers in the history of Islam. The Incoherence of the Philosophers, written after more than a decade of travel and ascetic contemplation, contends that while such Muslim philosophers as Avicenna boasted of unassailable arguments on matters of theology and metaphysics, they could not deliver on their claims; moreover, many of their assertions represented disguised heresy and unbelief. Despite its attempted refutation by the twelfth-century philosopher Ibn Rushd, al-Ghazali's work remains widely read and influential.

This volume in the yearbook series examines the variety of educational responses to differing forms of diversity within states. The growth of nationalism and regionalism in many parts of the world is considered alongside the emergence of such international structures as the European Community.

This book focuses on the provision of basic social services - in particular, access to education, health and water supplies - as the central building blocks of any human development strategy. The authors concentrate on how these basic social services can be financed and delivered more effectively to achieve the internationally agreed Millennium Development Goals. Their analysis, which departs from the dominant macro-economic

paradigm, deploys the results of broad-ranging research they led at UNICEF and UNDP, investigating the record on basic social services of some 30 developing countries. In seeking to learn from these new data, they develop an analytical argument around two potential synergies: at the macro level, between poverty reduction, human development and economic growth, and at the micro level, between interventions to provide basic social services.

Policymakers, they argue, can integrate macro-economic and social policy. Fiscal, monetary, and other macro-economic policies can be compatible with social sector requirements. They make the case that policymakers have more flexibility than is usually presented by orthodox writers and international financial institutions, and that if policymakers engaged in alternative macro-economic and growth-oriented policies, this could lead to the expansion of human

capabilities and the fulfillment of human rights. This book explores some of these policy options. The book also argues that more than just additional aid is needed. Specific strategic shifts in the areas of aid policy, decentralized governance, health and education policy and the private-public mix in service provision are a prerequisite to achieve the goals of human development. The combination of governance reforms and fiscal and macro-economic policies outlined in this book can eliminate human poverty in the span of a generation.
