**'A compelling invitation to imagine the future we want' –BRIAN CHRISTIAN, author of The Most Human Human By 2062 we will have built machines as intelligent as us – so the leading artificial intelligence and robotics experts predict. But what will this future look like? In 2062, world-leading researcher Toby Walsh considers the impact AI will have on work, war, economics, politics, everyday life and even death. Will automation take away most jobs? Will robots become conscious and take over? Will we become immortal machines ourselves, uploading our brains to the cloud? How will politics adjust to the post-truth, post-privacy digitised world? When we have succeeded in building intelligent machines, how will life on this planet unfold? Based on a deep understanding of technology, 2062 describes the choices we need to make today to ensure that the future remains bright. 'Clarity and sanity in a world full of fog and uncertainty – a timely book about the race to remain human.' –RICHARD WATSON, author of Digital Vs. **Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, Atlas Shrugged is Ayn Rand's magnum opus: a philosophical revolution told in the form of an action thriller–nominated as one of America's best-loved novels by PBS's The Great American Read. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand's most extensive statement of Objectivism–her groundbreaking philosophy–offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.**

## Shooter's Bible, 111th Edition

*On August 29, 2005, the worst natural disaster in the history of the United States devastated the city of New Orleans and the Gulf Coast of Louisiana and Mississippi. Like many others in America and around the world, Chris McLaughlin watched the tragedy of Katrina unfold on a television screen from the comfort of her living room on Cape Cod in Massachusetts. In the devastation afterwards, almost 2,000 people and an estimated 250,000 animals had perished. Miraculously, many pets did manage to survive. But in the months that followed the hurricane, thousands of them were fending for themselves in the ruins of devastated neighborhoods. They roamed the streets in feral packs or struck out alone. Their plight triggered a grassroots rescue effort unlike any this country had ever seen, and while relief organizations such as the Red Cross were tending to the human survivors, and movie stars and celebrities were airlifting food and endorsing seven-figure checks, a much smaller and meagerly funded effort was underway to save the four-legged victims. With no prior experience in disaster response and no real grasp of the hell that awaited them, scores of animal lovers, including McLaughlin, made their way to the Gulf Coast to help in any way they could. Including photos from four-time Pulitzer Prize-winning photojournalist Carol Guzy, Mississippi Barking spans the course of two years as McLaughlin and others ventured into the wreckage of the Gulf Coast to rescue the animals left behind. McLaughlin tells the moving stories of the people she met along the way, both those who lost everything to the hurricane and those working beside her rescuing and transporting animals away from the neglected, derelict conditions in which they barely survived. Within this story of tragedy and cruelty, suffering and ignorance, Mississippi Barking also bears witness to selfless acts of bravery and compassion, and the beauty and heroics of those who risked everything to save the animals that could not save themselves.*

**After September 11, 2001 Las Vegas Police Sergeant Randy Sutton began soliciting writing from law enforcement officers-his goal being to bridge the gap between the police and those they serve, with a book that offers a broad and thoughtful look at the many facets of police life. Hundreds of active and former officers responded from all over the United States: men and women from big cities and small towns, some who had written professionally, but most for the first time. Sutton culled the selections into five categories: The Beat, Line of Duty, War Stories, Officer Down, and Ground Zero. The result is True Blue, a collection of funny, charming, exciting, haunting stories about murder investigations, missing children, bungling burglars, car chases, lonely and desperate shut-ins, routine traffic stops, officers killed in the line of duty, and the life-changing events of September 11. Here, officers reveal their emotions-fear and pride, joy and disgust, shame and love-as they recount the defining moments of their careers. In these stories, the heart and soul behind the badge shines through in unexpected ways. True Blue will change the way we think about the deeply human realm of police service.**
