There is only One True God. who exists as Three Individual Persons. The Father, The Son,
and The Holy Spirit work together as One in complete harmony. God made everyone He
created with three special parts; a body, a soul, and a spirit. On the hill of Golgotha
where the Son of God gave His life for the sins of the world there were three crosses.
Two thieves were crucified with Him, One went with Him into eternity that same day, the
other mocked Him and rejected the greatest gift ever given. The crucified body of The
Lord Jesus Christ was buried in a tomb, three days later He rose from that tomb and now
sits on the right hand of the throne of God in the third heaven with unlimited authority
and power. There are three forces on earth that control how your life turns out and three
foundational pillars that support, advance, and control the level your success. Once you
are born again and learn how to access the power of three, the most powerful forces on
earth are yours for the taking.

Individuals pursue success as a goal. Success is a condition based on the outcome of your movement from your point of origin to your chosen finishing line. This obviously varies by individual and situation. In business, success is commonly measured in goal achievement, dollars and/or recognition. As a guide, it is always useful to look at philosophies that successful leaders propose to move you towards your goal of success. In fact, that's what makes this book so valuable. Here are Celebrity Experts(r) who have achieved success. They discuss their accomplishments for your guidance. There is nothing like being coached to climb the mountain by someone who has made the trip already. Here

are three quotes that present different facets of success by well-known business people who have enjoyed the satisfaction of success: You see, in life, lots of people know what to do, but few people actually do what they know. Knowing is not enough! You must take action. Anthony Robbins Give me a stock clerk with a goal and I'll give you a man who will make history. This book provides the user with a system for pre-determining the likelihood of grants success before investing time in proposal preparation. The exhibits, tables and figures keep new and veteran grantseekers focused on the process and on obtaining the critical information they need to decide whether to complete a proposal. The interactive exhibits that are downloadable provide the worksheets users needs to win grants This book shows readers how and when to use the research they gather on prospective grantors to increase their chances of success. Instruction is provided on why and how to gather information on past grantees, scoring systems, and reviewers, and on how to make preproposal contact to dramatically increase success rates. The deceptively simple techniques outlined in the exhibits, and the use of the project planner to present an orderly proposal in a timely manner, are worth the whole investment in the book. Bauer does not start with how to write a grant, but rather how proposal development fits the grantseeker's career plan, and relates to the mission of his or her nonprofit, university, college, department or program. The emphasis on the book is not on money, but on creating a winning match between the grantor, the grantee, and his or her institution/organization. The reader is provided with strategies and techniques to create strong teams, build productive consortia, and match grantseeking tasks to group member skills. This is particularly relevant now given grantors' growing interest in funding interdisciplinary and multiple site projects and research that uses grant monies more efficiently. Those readers that teach or coach grantseeking will also find strategies in the book that are essential to creating success for others in the grants process. As the hunt for grants gets more competitive and hectic, the need for a system that uses time effectively and provides organizational techniques and other strategies for increasing grants success rates, is critical. The step-by

step process presented in the book plus the free downloadable worksheets make the purchase of this book a very cost-effective investment.

When we project the idea on the positive plane of the world, we create a positive energy with a certain frequency and release it to the universe to propagate and eventually it will reflect back a positive energy of an equal amount and same frequency. We will have a positive sequence of thoughts, actions and then finally destinations. When we hold the negative energy and choose not to release it, then it will transform into positive energy. This will create a positive attitude and character of us. However, the opposite is exactly true. When we choose to project and interpret an idea on the negative plane of the world, we create a negative energy to the universe and certainly the reflection will be from the same nature on the quantity and frequency. We will be dragged into negative actions, and then it means that we have chosen undesirable destination. Furthermore, the matter will amplify more according to the law of attraction, as positive energies and reflections will attract more and more and you will have a whole lot of positive results. On the contrary, if we decide to have a negative way of thinking then it means we have chosen to receive more and more negative results and bad outcomes.
