

Buses From Westminster Transport For London

Take a tour through the Big Smoke via road, rail and river, and discover...

- What the official difference is between a 'taxi' and a 'cab'.
- Why the iconic Routemaster was withdrawn from regular service in 2005.
- How much of the Underground is actually below ground.
- Why London's first tramway was threatened with closure in the same year it opened.
- Which was the first ferry to operate passenger trips across the Thames. Every year London opens its doors to a staggering 16 million people, all wanting to get to their destination of choice in the shortest time possible. Yet for many of us, the beauty and clockwork of the transport we use, be it taxi, Tube, bus, bike or boat, is a part of the London experience we tend to forget. From the iconic red buses to the abandoned Tube stations and the engineering achievements to the cultural highlights, this book celebrates everything you've ever wanted to know about getting around in London, and much, much more.

Public Transport is a comprehensive textbook covering the planning of all public transport systems (bus, coach, rail, taxi and domestic air travel) in Britain and other countries with similar systems. The term 'planning' is used both in the context of local authority and central government roles and in the work done by transport operators for example, network structures, vehicle type selection. In addition to the various types of transport, the differing needs of the urban, rural and long distance markets are examined. This restructured new edition gives greater emphasis to service quality and marketing issues as well as covering recent changes in legislation, statistics and research findings. Public Transport is of particular interest to transport planners in local authorities and consultancies, managers in transport operations, as well as undergraduates and MSc students of transport planning and those studying for the membership examinations of the Chartered Institute of Logistics and Transport.

The Future Role of Bus Transport in Northern IrelandLondon and Its BusesPanTravel Like a Local - Map of New Westminster: The Most Essential New Westminster (Canada) Travel Map for Every AdventureIndependently Published

Originally published in 1974 this book examines the problems confronting the London public transport system in the 1970s. After a brief historical introduction the book then pays particular attention to planning, capital investment, co-ordination, the relationship between transport and housing, the competition between road and rail and the grants paid by central government. There are 15 case studies of significant topics ranging from station car parks to bus lanes, new tube trains to facilities for pedestrians. Although the focus is on London, many of the issues are common to other UK cities and across the world.

Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 26. Chapters: London congestion charge, Traffic in Towns, Victoria Coach Station, London low emission zone, Smeed Report, M4 bus lane, Westminster motorcycle parking charge, Streetcar, Pantechnicon van, Green Line Coach Station, London Omnibus Traction Society, KenBuster. Excerpt: The London congestion charge is a fee for motorists travelling within the Congestion Charge Zone (CCZ), a traffic area in London. The charge aims to reduce congestion, and raise investment funds for London's transport system. The zone was introduced in central London on 17 February 2003, and extended into parts of west London on 19 February 2007. Though not the first scheme of its kind in the United Kingdom, it was the largest when introduced, and it remains one of the largest in the world. Several cities around the world have referenced London's congestion charge when considering their own schemes. A payment of 10 is required each day for each vehicle, which travels within the zone between 07:00 and 18:00 (Monday-Friday only); a penalty of between 60 and 180 is levied for non-payment. On 4 January 2011 several changes were implemented based on the public consultation conducted in 2008, which included the removal of the Western Extension, a charge increase from 8 to 10, and the introduction of an automated payment system. Transport for London (TfL) administers the charge; Capita Group operated it under contract until 31 October 2009, and IBM took over on 1 November 2009. The system is mostly run on an automatic basis using Automatic Number Plate Recognition. The boundary of the zone, as of 19 February 2007, starts at the northern end of Vauxhall Bridge and (travelling in a clockwise direction) heads along the northern bank of the River Thames as Grosvenor Road, the Chelsea Embankment and Cheyne Walk. From there, it heads north, along the...

London's Night Buses

Delivery Chain Analysis for Bus Services in England

The Transport Committee reports that extensive cuts to rural, evening and weekend bus services are damaging the ability of many people - especially the old, young or disabled - to participate in employment, education or voluntary work and to access vital services such as healthcare and retail facilities. In a review of England's bus services (outside London) after the Spending Review, the Committee warns that even deeper cuts in bus services are likely in 2012-13, as local authorities struggle to deal with budgetary reductions, and calls for the concessionary travel scheme to be preserved so that the elderly and disabled continue to enjoy free bus travel. The Committee also concludes that the concessionary fares scheme was 'discriminatory' because it did not apply to most community transport providers - usually independent charities that provide transport such as dial-a-ride bus services. It calls on the Department for Transport to monitor the extent of service cutbacks made this year and to review service provision again after BSOG (Bus Service Operator Grant) grant cuts take effect in 2012 - 13 so that it can analyse and draw conclusions about the wider costs and benefits of its policy changes to the country as a whole. The Local Government Association should identify and disseminate information about good and bad practice in the delivery of cost effective, flexible services including community transport and/or area-based transport integration. And local authorities and commercial operators must consult more widely where services are being changed. Government targets are increasingly concerned with the outcome of services instead of the inputs. These targets can involve partnerships between national, regional and local bodies as well as private companies, which is known as the delivery chain. The Audit Commission, and National Audit Office have combined to look at the local and national aspects of three targets: Bus services; affordable housing; childhood obesity. This report looks at bus usage, which is likely to meet its target of a 10% increase by 2010. However this is mainly due to the increase in London, where there is a much clearer delivery chain and tighter regulation.

The ABC of London's Transport

Get Ready For The Adventure Of A Lifetime! This is a Black and White edition of Travel Like a Local map book. Are you planning your next vacation abroad and you're ready to explore? Do you want to be prepared for everything? Are you ready to experience every new place you visit just like a local? Well, with this amazing New Westminster (Canada) travel map you're all set and ready to go! In the New Westminster (Canada) map you can see all the available means of transport, bus stops and routes so you can always know how to get everywhere. And because we know that a vacation is not only about the roads and busses, the map gives you many options for eating, drinking and having a good time! We carefully marked all the restaurants, bars and pubs so you can always find one that is nearby. In the New Westminster (Canada) map you will also find the best places to go shopping, the most famous and must-see sights, churches and more. And if an emergency comes up, there are markings of police stations and hospitals everywhere for your convenience. The city is also organized in sections so you can better find your way around. So what are you waiting for? Pack your bags, get your New Westminster (Canada) map and let's get started! Just Click "Add To Cart Now"

The Committee's report examines a range of safety and environmental issues regarding technological developments in the design of motor vehicles under the following headings: industrial advantage and vehicle technology; the environment and the car of the future, carbon emissions and European standards; future fuels and technologies; incentives for low carbon and alternative fuel cars; vehicle safety technology; telematics for intelligent transport systems and law enforcement, including satellite location technology and in-vehicle technology for crime prevention; consumer awareness, safety and environmental information, and the car maintenance sector.

Public Transport

?This book reveals and discusses existing and potential problems derived from the transport economics domain in relation to their environment, and the social, political and economic impacts, with reference to a wide range of transport modes. It is suitable not only for academics or students, but also for people working in the transport industry. From this book, readers will learn how to apply economic principles to transport, drawing specifically upon a number of case studies of different areas of Great Britain. This book is particularly useful for those who are interested in the subject of transport economics, but may not have studied economics, statistics or mathematics.

Small Canadian cities confront serious social issues as a result of the neoliberal economic restructuring practiced by both federal and provincial governments since the 1980s. Drastic spending reductions and ongoing restraint in social assistance, income supports, and the provision of affordable housing, combined with the offloading of social responsibilities onto municipalities, has contributed to the generalization of social issues once chiefly associated with Canada's largest urban centres. As the investigations in this volume illustrate, while some communities responded to these issues with inclusionary and progressive actions others were more exclusionary and reactive—revealing forms of discrimination, exclusion, and "othering" in the implementation of practices and policies. Importantly, however their investigations reveal a broad range of responses to the social issues they face. No matter the process and results of the proposed solutions, what the contributors uncovered were distinctive attributes of the small city as it struggles to confront increasingly complex social issues. If local governments accept a social agenda as part of its responsibilities, the contributors to Small Cities, Big Issues believe that small cities can succeed in reconceiving community based on the ideals of acceptance, accommodation, and inclusion.
