Once you're ready to tune your car stereo, get in the driver's seat and follow these steps: Step 1: Turn on Your Stereo. When tuning your stereo, make sure your car is parked. It goes without saying that this is not a job you should do while driving. Set aside some time to tune your stereo.

How to Set An EQ and Tune Your Car Stereo | AudioMotive

The "ideal" car audio system is not necessarily the loudest one, or the most expensive one. It's the one that best meets your needs. So, the first step is to figure out what your needs are. Start off by asking yourself: what is the one thing you want your new car stereo to do for you?

How to Build the Ideal Car Stereo System

This diagram shows the layout of a common car audio system and signal flow. The dotted black line shows the path of the preamp audio signal (before it's amplified), from a head unit, through an equalizer and electronic crossover and to the amplifier. A video signal is also sent from the head unit to a pair of video screens in the back seat area. From the amplifier, an amplified audio signal (the solid black line) goes to each speaker in the system — one amplifier powers a subwoofer.

Car Audio For Dummies Cheat Sheet - dummies

Don't settle for the default setting when creating your files. If you want to use your iPod, smartphone, or MP3 player in your car, try using as little compression as possible. The higher the bit rate, the better your music will sound through your car's system.
