Car Sound System Installation Guide

Car stereos have eight wires for the traditional 4-speaker system – a positive wire and a negative wire for the front left, front right, rear left, and rear right speakers. Depending on the wiring configuration in your vehicle and the wiring harness adapter we offer, some of these may not be used.

How to Install a Car Stereo - Crutchfield: Car Stereo ...

If you're a total newbie to the world of car audio systems, then there's just one key fact that you should be aware of. It isn't some byzantine formula that's used to calculate speaker power levels or optimal speaker placements. It doesn't have anything to do with squeezing every last bit out of a car audio capacitor or adding an additional battery.

Beginner's Guide to Car Audio Systems - Lifewire

Based on what you have heard while parked, on the highway, and immediately after driving on the highway, try to rate the different parts of your car sound system. Rate your receiver, the speakers, the subwoofer (if there's one installed), and even the amplifier (if you already have one) from 1 to 10.

How to Build the Ideal Car Stereo System | Car Bibles

Attach the rear mounting strap to rear of radio. Install the radio from behind the dash. Now attach the mounting strap to the dash or firewall using an existing bolt or screw. Now install any outer custom trim bezel, if one was furnished for this application and attach shaft nuts to secure the radio in the dash.

Custom Autosound Car Stereos Installation Instructions

Add a Subwoofer to your stock system. This is one of the easiest ways to quickly and dramatically Upgrade Your Sound™. By adding some sub-bass to a stock audio system you'll be amazed how much better your audio system sounds. Equipment: SC4 Signal Converter, DM500a Monoblock Amplifier, and LE-S06 Loaded Subwoofer Enclosure. Price: \$569*

Aftermarket Car Audio: Everything You Need to Know, 2020 ...

This diagram shows the layout of a common car audio system and signal flow. The dotted black line shows the path of the preamp audio signal (before it's amplified), from a head unit, through an equalizer and electronic crossover and to the amplifier. A video signal is also sent from the head unit to a pair of video screens in the back seat area. From the amplifier, an amplified audio signal (the solid black line) goes to each speaker in the system — one amplifier powers a subwoofer.
