The most powerful case yet made for the return of the Parthenon Marbles The Parthenon Marbles (formerly known as the Elgin Marbles), designed and executed by Pheidias to adorn the Parthenon, are perhaps the greatest of all classical sculptures. In 1801, Lord Elgin, then ambassador to the Turkish government, had chunks of the frieze sawn off and shipped to England, where they were subsequently seized by Parliament and sold to the British Museum to help pay off his debts. This scandal, exacerbated by the inept handling of the sculptures by their self-appointed guardians, remains unresolved to this day. In his fierce, eloquent account of a shameful piece of British imperial history, Christopher Hitchens makes the moral, artistic, legal and political case for re-unifying the Parthenon frieze in Athens. The opening of the New Acropolis Museum

emphatically trumps the British Museum's long-standing (if always questionable) objection that there is nowhere in Athens to house the Parthenon Marbles. With contributions by Nadine Gordimer and Professor Charalambos Bouras, The Parthenon Marbles will surely end all arguments about where these great treasures belong, and help bring a two-centuries-old disgrace to a just conclusion.

The first major analysis of small national cinemas
Sequel to Nightwalkers. They thought I was crazy. They told me it was all in my head. For years I believed them. Then I found a note, and a blade, and I now realize that although I turned my back to the night, it never turned its back on me. It just keeps calling me back. We called ourselves nightwalkers. Together we ruled the night, alone I broke us apart. I now search for them in the darkness, their shining green eyes,

their silver blades, but I find nothing but empty streets bathed in moonlight, and the lonely cry of crickets. What has become of them? My question is answered by our old enemies. They call themselves Legion. They walk on our streets, hellfire eyes as crimson as their blades. I see others-freaks, degenerates roaming the darkness. The night has changed, and not for the better. I need to find her. The girl I gave my sanity for. Maybe she is out there somewhere, waiting for me. She is my only hope for redemption. She is perhaps the last of her kind. She is Chloe of the night.

Confronting insurgent violence in Iraq and Afghanistan, the U.S. military has recognized the need to “re-learn” counterinsurgency. But how has the Department of Defense with its mixed efforts responded to this new strategic environment? Has it learned anything from past failures? In *The New Counterinsurgency Era*, David Ucko examines DoD’s institutional obstacles and initially slow response to a changing strategic reality. Ucko also suggests how the military can better prepare for the unique challenges of modern warfare, where it is charged with everything from providing security to supporting reconstruction to establishing basic governance—all while stabilizing conquered territory and engaging with local populations. After briefly surveying the history of American counterinsurgency operations, Ucko focuses on measures the military has taken since 2001 to relearn old lessons about counterinsurgency, to improve its ability to conduct stability operations, to change the institutional bias against counterinsurgency, and to account for successes gained from the learning process. Given the effectiveness of insurgent tactics, the frequency of operations aimed at building local capacity, and the danger of ungoverned spaces acting as havens for hostile groups, the military must acquire new skills to confront irregular threats in future wars. Ucko clearly shows that the opportunity to come

to grips with counterinsurgency is matched in magnitude only by the cost of failing to do so.

training. Psychopathology is primarily evidence and research based, with coverage of relevant research from as recently as 2013, making it useful to researchers as well as clinicians. The emphasis in the book is on providing students with a real insight into the nature and experience of mental health problems, both through the written coverage and by providing a range of video material covering personal accounts of mental health problems. The text is integrated with a wide variety of teaching and learning features that will enable facilitators to teach more effectively, and students to learn more comprehensively. Many of these features have been updated for the new edition and new material has been included to reflect the changes in DSM-5. Features include Focus Points that discuss contentious or topical issues in detail, Research Methods boxes showing how clinical psychologists do research on psychopathology, and Case Histories detailing a range of mental health problems. Online resources An all new student website is available at www.wiley-psycho pathology.com. The website houses a huge variety of new digital material including more than 50 instructional and supplementary videos covering descriptions of symptoms and

This highly accessible and enjoyable guide is full of practical and fascinating information about how to enjoy whisky. All whisky styles are covered, including (just whisper it) blends. Along

the way a good few myths are exploded, including the idea that whisky has to be taken neat. In 'What to Drink', Dave Broom explores flavour camps - how to understand a style of whisky - and moves on to provide extensive tasting notes of the major brands, demonstrating whisky's extraordinary diversity. In 'How to Drink', he sets out how to enjoy whisky in myriad ways - using water and mixers, from soda to green tea; and in cocktails, from the Manhattan to the Rusty Nail. He even looks at pairing whisky and food. In this spirited, entertaining and no-nonsense guide, world-renowned expert Dave Broom dispels the mysteries of whisky and unlocks a whole host of exciting possibilities for this magical drink.

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a

new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

Instructors consistently ask for a textbook that helps students understand the relationships between the main concepts of biology, so they are not learning facts about biology in isolation. Mader's Concepts of Biology was developed to fill this void. Organized around the main themes of biology, Concepts of Biology guides students to think conceptually about biology and the world around them. Just as the levels of biological organization flow from one level to the next, themes and topics in Concepts of Biology are tied to one another throughout the chapter, and between the chapters and parts. Combined with Dr. Mader's hallmark writing style, exceptional art program, and pedagogical framework, difficult concepts become easier to understand and visualize, allowing students to focus on understanding how the concepts are related.

This book selects the most important scientific papers related to kidney disease and comments on their significance within the wider field. Fascinating reading for both nephrologists and medical historians, no doubt giving rise to further debate over the origins and progress of nephrology. Science fiction. The Polity is under attack from a melded AI entity with control of the lethal Jain technology, yet the attack seems to have no coherence. When one of Erebus wormships kills millions on the world of Klurhammon, a high-tech agricultural world of no real tactical significance, agent Ian Cormac is sent to investigate, though he is secretly struggling to control a new ability no human being should possess, and beginning to question the motives of his AI masters. Further attacks and seemingly indiscriminate slaughter ensue, but only serve to bring some of the most dangerous individuals in the Polity into the war. Mr Crane, the indefatigable brass killing machine sets out for vengeance, while Orlandine, a vastly-augmented haiman who herself controls Jain technology, seeks a weapon

of appalling power and finds allies from an ancient war. Meanwhile Mika, scientist and Dragon expert, is again kidnapped by that unfathomable alien entity and dragged into the heart of things: to wake the makers of Jain technology from their five-million-year slumber.

The Choreography of Antony Tudor: Focus on Four Ballets presents both an analytical overview of the ballets created for the stage by Antony Tudor and an in-depth critical analysis of four key works: Jardin aux Lilas (1936), Dark Elegies (1937), Pillar of Fire (1942), and The Leaves Are Fading (1975). Tudor was a British choreographer who spent a large part of his working life in the United

States, and although he was not prolific in his output, his works include several masterpieces of twentieth-century ballet repertoire. Characteristic of his work is an exceptionally creative and sensitive relationship of choreography with music, a relationship different from that developed by his equally musical contemporary, George Balanchine, in that it privileges subtle layers of dramatic, often psychological, exposition as well as complex mythmical structures. Tudor's ballets invariably involve a psychological human dimension, even when there is no story as such, and it is these two strands - the musical and the dramatic - that the choreographer exploits with consummate skill in the best of his work.

The late Lt. General Harold Moore (USA, Ret.) said it's the "absolute best book on military leadership in peace and war." This book is for military leaders who want to inspire their teams to achieve their best in combat and peacetime. This wide-ranging anthology brings together noted military minds as they examine the crucial role of leadership in combat, relate the lessons learned, and apply the principles to the stressful world of business. The book covers classic and modern concepts of leadership

and uses case studies from Alexander the Great through post-9/11 wars to illustrate the principles of leadership in concrete historical contexts. The most important, most penetrating analysis of military leadership to emerge in a generation, this seminal work features leaders of the armed forces as they learn from the past and present and look toward the future. This edition is fully updated with inclusive language and chapters that speak to leading in a diverse world and organized with summary points for each chapter for a quick overview of essentials.

From the bestselling author of *The Battle for America 2008* and longtime Washington Post correspondent, an inside view and analysis of the Obama-Romney presidential race. In 2008 a bright young candidate triumphed on a theme of change and hope. Four years later an embattled President struggled against an apocalyptically divided and divisive Congress, a war that won't end, and an economy that casts a dark penumbra over every spark of good news. His opponent, a well-heeled businessman who couldn't seem to stand on his own business record, withstood unexpected and extreme opposition to capture the nomination of a party whose main platform and principles with which he was historically and fundamentally at odds. The 2012 Election, once predicted to be a boring run at a popular President, took on a new urgency with the infamous 2010 midterm shellacking and equally infamous Citizen United ruling, and delivered drama and tension as the Republicans tried to reconcile the factions at war within their party and Democrats faced the tsunami of super Pac money flooding local and regional elections. As with his last book, *The Battle for America 2008*, Washington Post correspondent Dan Balz uses a combination of superb sources and long, deep reporting experience to take us both deep inside and far beyond Campaign HQs in Chicago and Boston. He tracks the nuances of Beltway politics and the thinking behind the scenes to show how Obama regained his footing, and to speculate about whether this election actually did anything to change the toxically poisonous atmosphere inside the Beltway,

The process through which a liquid material is delivered into a mold, which contains a hollow cavity of the intended shape, and then being allowed to cool is known as casting. It is generally used to produce sophisticated shapes which are difficult or uneconomical to make using other methods. Metals and other time setting materials are usually used for casting. It is used in the making of a variety of products such as bronze structures, concrete structures, collectible toys, weapons and tools. The traditional methods of casting are lost-wax casting, sand casting and plaster mold casting. The modern casting processes are classified into two categories, expendable and non-expendable casting. The topics included in this book on casting are of utmost significance and bound to provide incredible insights to readers. Some of the diverse topics covered in this book address the varied branches that fall under this category. It will serve as a valuable source of reference for graduate

Want to check in at the Red Coyote Inn? You may

want to check out it's shady past which includes: ghosts, sightings of supernatural creatures, and guests encountering bizarre accidents. This charming inn is nestled in the Sonoran Desert on the Apache Trail close to the foreboding Superstition Mountains which are said to be the home of the legendary Lost Dutchman Mine. Some say the inn sits at the top of an energy vortex that has ties to the mine. And this just may be the reason for all of the paranormal activity. You may find some of the guests who come to the inn are as strange as the inn itself. The inn was a gift left to a family of three - a divorced mother, daughter and son - one of those being Dean Banks, a fifteen year old boy who comes to find out he has inherited a supernatural gift of power from a long ago Apache ancestor and is destined to be the Guardian of the mine. He feels this is more of a curse than a gift. With these powers come some pretty unnatural occurrences for Dean as he acquires the ability to gain superhuman strength along with mystical powers which enable him to thwart any attempts from anyone who tries to discover the whereabouts of the mine. Dean fears his new responsibility and also is terrified of the possibility of harming someone. We also find Dean in a power struggle as he tries to remain a normal teenage boy enjoying his life riding in the desert and hanging out with his new found friends. He will befriend a mysterious old miner who holds the key to some of Dean's past . This miner also has a secret past

for Dean to discover. One guest in particular is onto Dean's secrets and is out to destroy the Red Coyote Inn and possibly Dean himself.
