Written by an industry expert, it gives you a distinct advantage in the competitive medical school admissions process, preparing you for every step and helping you create your best application. Takes you through the often-overwhelming process of applying to medical school. Explains what medical schools and admissions committees are really looking for. Provides plain-English explanations of complicated medical school admissions

processes If you're one of the over 40,000 students who apply to medical school each year and need help sorting through the admissions schedule, writing statements of intent, and preparing to take the MCAT, *Getting Into Medical School For Dummies* has you covered!

A must read for any applicant seeking admission to medical school! Preparing for the medical school interviews does NOT need to be hard! Ever wanted to know how to ACE any Multiple Mini Interview station on your medical school interview without stress?

Through experiences coaching over 200 students through the medical school admissions process with MedCoach, as well as through her daily patient experiences as a family doctor, Dr. Feldman will guide you through the seven key skills you need to know to ACE your MMIs! Also included: Over 15 practice MMI cases with sample answers and best approaches to show you what to expect on your interview. Many real-life patient stories to illustrate the importance of each key skill and how it relates to medicine. Learn how to build

your confidence to tackle any MMI station. Learn what it is like to go through medical school and see if the choice is right for you. Learn the secret about what it takes to go through the MMI! And much more! Order your copy today and visit [www.mymedcoach.ca](http://www.mymedcoach.ca) to get more resources, sample MMIs and interview guides!

The interview is the most important factor in admission decisions.

Utilizing a unique combination of evidence-based advice and an insider's perspective, the authors help you achieve your ultimate goal: medical school.

"Is medical school on the horizon? Did you know that Not getting into medical school the first time you apply is the norm in Canada? In fact, most academically-gifted, talented applicants apply 2-3 times before they get accepted. Despite this, students (and parents) greatly under-estimate the challenge of applying to, interviewing for, and getting accepted to medical school in Canada-especially the first time. They don't know that:

most medical schools require students to list and describe their activities from age 16 onward, when they apply; medical schools focus on cumulative undergraduate grades, including the often transitional or tumultuous first year of university; the majority of motivated, smart students in Canada are not getting accepted. Whether in high school or university, this book helps students and their families learn to strategize and prepare for future medical applications now with insights from a pre-med expert and former medical school application reader/interviewer with 20 years of experience coaching thousands of students dreaming of becoming a physician. Get the insider strategies you need to avoid the pitfalls in today's more complex applications so you can stand out in a highly accomplished group of medical-school hopefuls!"--

The Complete MD/PhD Applicant Guide

**Is it possible to create an admissions screening process that allows any educational institution to select top-performing applicants and simultaneously promote diversity? Is it possible to choose applicants genuinely motivated in the pursuit of a profession rather than those primarily focused on acquiring wealth or status? Is it possible to achieve all of the above, being fair to all applicants and reducing the time and cost of the admissions screening process?**

**Dr. Behrouz Moemeni, one of the most sought-after admissions expert and an outspoken advocate for fair and scientific admissions screening, believes the answer to all of the above questions is a resounding "YES". In this thought-provoking book, he explains how using first principles in psychology, immunology, sociology, evolutionary biology, statistics, physics, and chemistry can help universities select applicants passionate about their future professions. After convincing the readers about the flaws of current admissions screening practices - such as the use of situational judgment tests, standardized tests, and traditional interviews - he explains a step-by-step action plan described in 14 "rules" designed for any educational institution seeking to construct a fair and scientific admissions screening process. The book is filled with blunt reasoning debunking common myths and lighthearted humor about what to do instead suitable for admissions professionals, researchers and anyone interested in applicant screening in higher education. Here's what you are going to learn in this book: The fundamental problems with current admissions screening practices that lead to profound bias against minority groups and lower income applicants How to streamline the entire admissions process into one single step The Big Three(tm): The only 3 qualities that matter in admissions screening How to select applicants based on The Big Three characteristics How to design questions that seek the truth from each applicant How to separate highly suitable applicants from the rest without any guess work or "gut feeling" How to design questions that promote diversity while being fair to applicants How to**

**increase the reliability and validity of any admissions screening practice or tool How to democratize the admissions process and educational institutions Sample questions and answers for admissions teams And much more!**

**Carefully researched by the authors to bring the subject of chemistry up-to-date, this text provides complete coverage of the new A- and AS-level core specifications. The inclusion of objectives and questions make it suitable for self study.**

**"Aimed at second- and third-year ethics courses offered out of medical schools, health sciences departments, and nursing programs, Doing Right: A Practical Guide to Ethics for Medical Trainees is a practical guide to analyzing and resolving the ethical dilemmas medical practitioners face on a day-to-day basis. Drawing extensively on real-life scenarios, this book takes a case-based approach to provide students and practitioners with the advice and skills they need to help their patients and overcome ethical challenges in the field. Newly co-authored by Wayne Rosen and fully revised and updated to include up-to-date coverage of such important topics as the impact of digital technology and social media, Medical Assistance in Dying legislation, this fourth edition of Doing Right will provide readers with the most up-to-date guidebook to medical ethics available."--**

**After submitting your application for physician assistant school, the interview is next. Does the thought of a face-to-face encounter that will decide your future scare you? Are you worried about saying the 'right' thing? You're not alone. In Physician Assistant School Interview Guide, Savanna Perry, PA-C walks you through the steps of taking control of**

**your interview and using your personal accomplishments to impress your interviewers. Acceptance to PA school is becoming more competitive every year, and this book will help provide the tools to ensure you join the ranks. In these pages, you'll learn how to: Prepare for your specific interview type by familiarizing yourself with various interview techniques Stand above the crowd with the knowledge to understand the motives behind the questions Develop thoughtful, mature answers to over 300 questions Gain the confidence needed to secure your spot in a PA program This interview is your chance to impress your future alma mater and move one step closer to becoming a PA. This book is the key to help you reach your goal.**

*The Insider's Guide to Getting Into Medical School in Canada*

*The issues of medical ethics, from moral quandaries of euthanasia and the morality of killing to political dilemmas like fair healthcare distribution, are rarely out of today's media. This area of ethics covers a wide range of issues, from mental health to reproductive medicine, as well as including management issues such as resource allocation, and has proven to hold enduring interest for the general public as well as the medical practitioner. This Very Short Introduction provides an invaluable tool with which to think about the ethical values that*

*lie at the heart of medicine. This new edition explores the ethical reasoning we can use to approach medical ethics, introducing the most important 'tools' of ethical reasoning, and discussing how argument, thought experiments, and intuition can be combined in the consideration of medical ethics. Considering its practical application, Tony Hope and Michael Dunn explore how medical ethics supports health professionals through the growing use of ethics expertise in clinical settings. They also contemplate the increasingly important place of medical ethics in the wider social context, particularly in this age of globalization, not only in healthcare practice, but also policy, discussions in the media, pressure group and activism settings, and in legal judgments. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.*

*Award-winning physician Philip C. Hébert creates a brave and intimate portrait of the complex ethical imperatives at the heart of good medicine: doctors do not have all the answers; patients must be heard; and their needs, desires, fears, and experiences must be reflected in how practitioners look after them. Medical science continues to advance to previously unimagined heights in its diagnostic and treatment capabilities. With these advances,*

*however, come unexpected ethical dilemmas for practitioners, patients, and families. In Good Medicine, Dr. Hébert approaches these questions of pressing and fundamental importance from the dual point of view of acclaimed physician and long-time patient. With remarkable balance and sensitivity, he explores a range of politically, constitutionally, and ethically contentious matters, including assisted suicide, treatment refusal and suspension, and the overall allocation of medical resources. Hébert pairs his artful analysis with the real-life, often deeply moving stories of those who have lived these challenges. Hébert offers piercing and compassionate insight into the relationship between patients and medical professionals, and guides readers towards the open and empathetic communication needed to ensure good medicine for everyone.*

**Using a discipline-by-discipline approach, Linne & Ringsrud's Clinical Laboratory Science: Concepts, Procedures, and Clinical Applications, 7th Edition provides a fundamental overview of the skills and techniques you need to work in a clinical laboratory and perform routine clinical lab tests. Coverage of basic laboratory techniques includes key topics such as safety, measurement techniques, and quality assessment. Clear, straightforward instructions simplify lab procedures, and are described in the CLSI (Clinical and Laboratory Standards Institute) format. Written by well-known CLS educator Mary Louise Turgeon, this text includes perforated pages so you can easily detach procedure sheets and use them as a reference in the lab! Hands-on procedures guide you through the exact steps you'll perform in the lab. Review questions at the end of each chapter help you assess your understanding and identify areas requiring additional study. A broad scope makes this text an ideal introduction to clinical laboratory science at various levels, including CLS/MT, CLT/MLT, and Medical Assisting, and reflects the taxonomy levels of the CLS/MT and CLT/MLT exams. Detailed full-color illustrations show what you will see under the microscope. An Evolve**

**companion website provides convenient online access to all of the procedures in the text, a glossary, audio glossary, and links to additional information. Case studies include critical thinking and multiple-choice questions, providing the opportunity to apply content to real-life scenarios. Learning objectives help you study more effectively and provide measurable outcomes to achieve by completing the material. Streamlined approach makes it easier to learn the most essential information on individual disciplines in clinical lab science. Experienced author, speaker, and educator Mary Lou Turgeon is well known for providing insight into the rapidly changing field of clinical laboratory science. Convenient glossary makes it easy to look up definitions without having to search through each chapter. NEW! Procedure worksheets have been added to most chapters; perforated pages make it easy for students to remove for use in the lab and for assignment of review questions as homework. NEW! Instrumentation updates show new technology being used in the lab. NEW! Additional key terms in each chapter cover need-to-know terminology. NEW! Additional tables and figures in each chapter clarify clinical lab science concepts. Traditionally, the knowledge needed by**

**physicians has consisted largely of medical science. But in recent years ethical questions have been looming ever larger in everyday clinical practice. Doing Right is a practical guide to decision making in those situations. Using dozens of real cases, it analyzes the most common ethical problems encountered by physicians and medical trainees. The many topics covered include truth-telling, refusal of treatment, confidentiality, rationing of health care, parents' refusal of treatment for their children, living wills, the ethics of medical research, and assisted suicide. Written simply and concisely with little philosophical or legal jargon, Doing Right should be essential reading for medical students, residents, and practising physicians. For those who teach bioethics, it will be welcome as a practical and readable textbook.**

**This book is a student reference guide book for the MD/PhD application process. It begins with an overview of the structure of a typical MD/PhD program as well as student outcomes and career choices of MD/PhD graduates. Next is an outline of the academic and extracurricular prerequisites as well as the basic components of the application itself. The authors then address the factors that MD/PhD students should**

**consider when selecting schools to which to apply. Continuing to the main application, examples are provided of all the different essay types that MD/PhD applicants will encounter along with comments on how to address the deliberately vague and abstract prompts while tailoring the responses to the combined-degree program. Most uniquely, included is a very detailed explanation of the many types of interviews that applicants will encounter and how to prepare for them by integrating extensive personal experience and first-hand discussions with MD/PhD program leaders. Lastly, there will be a discussion on how to cope with the year-long timeline that constitutes this application process and provide guidance regarding properly responding to acceptances and waitlist offers. Written by a team of authors each experienced with the MD/PhD application, this book aids the prospective applicant with navigating this challenging process.**

Trainees and Physicians*

*Tips, Tricks, and Techniques to Impress Your  
Interviewers*

A fierce and illuminating debut from FOLD founder Jael Richardson about a young woman who must find the courage to determine her own future and secure her freedom. Set in an imagined world in which the most vulnerable are forced to buy their freedom by working off their debt to society, *Gutter Child* uncovers a nation divided into the privileged Mainland and the policed Gutter. In this world, Elimina Dubois is one of only 100 babies taken from the Gutter and raised in the land of opportunity as part of a social experiment led by the Mainland government. But when her Mainland mother dies, Elimina finds herself all alone, a teenager forced into an unfamiliar life of servitude, unsure of who she is and where she belongs. Elimina is sent to an academy with new rules and expectations where she befriends Gutter children who are making their own way through the Gutter System in whatever ways they know how. When Elimina's life takes another unexpected turn, she will discover that what she needs more than anything may not be the freedom she longs for after all. Richardson's *Gutter Child* reveals one young woman's journey through a fractured world of heartbreaking disadvantages and shocking injustices. Elimina is a modern heroine in an altered but all too recognizable reality who must find the strength within herself to forge her future and defy a system that tries to shape her destiny.

The Multiple Mini Interview (MMI) has become the preferred interview format at many health professions programs and medical schools. Applicants seeking admission to these schools face considerable anxiety preparing for these interviews because of a lack of resources available for guidance. Our detailed advice, based on evidence from research in the field and perspectives of admissions faculty, will provide you with the insiders' perspective. How can you best prepare for the MMI? What is required to deliver a winning interview performance? Which behaviors, attitudes, and answers are prized by interviewers? Includes sample answers to MMI questions and advice to help you avoid common mistakes. This book shows applicants how to develop the optimal strategy for MMI success - an invaluable resource to help applicants gain that extra edge.
