Cell Transport Review Sheet

13) How does particle size affect a molecule's transport across a cell membrane? a) Particle size is less important than particle shape for calculating transport speed. b) It is easier for small molecules to diffuse across the cell membrane.

Cell Transport Test Review Questions (ID: 18229)

A selectively permeable cell membrane is one that allows certain molecules or ions to pass through it by means of active or passive transport. Explain two functions of the cell membrane. The cell membrane is a very important structure which functions to allow certain substances to enter or leave the cell.

Biology 1: Test Review—The Cell Membrane and Homeostasis—

\_F\_ The cell membrane forms around another substance, for example, how the amoeba gets its food \_D\_ When molecules move from areas of high concentration to areas of low concentration Label the diagrams of cells using the following terms: diffusion, active transport, osmosis, facilitated diffusion, or equilibrium.
