Risk management is the process in which the level of risk to be taken is defined, and the levels of risk are measured with the objective of maximizing the company or portfolio value. Risk management is not about minimizing risk; it is about actively understanding and pursuing those risks which maximize the chance of achieving goals and minimizing the chance of failure.

The decision to avoid a specific risk altogether will be made at a board level where it will be determined that some business activities are not worth pursuing based on the risk-return tradeoff. Risk prevention and avoidance is part of the decision on how much risk to accept and encompasses a trade-off between the cost and the benefit.
