SSC 10+2 Combined Higher Secondary Level (CHSL) 101 Speed Tests with Success Guarantee IF YOU MASTER THIS BOOK SUCCESS IS GUARANTEED IN THE UPCOMING SSC CGL EXAM
Yes it's true. If you can master this book you will crack the SSC Combined Graduate Level (Tier I & Tier II) Exam for sure. The book is the 1st and the Most Innovative Book and makes you feel comfortable. Since things are well structured and executed. It gives you a proper channel for preparing and guiding you to do things as per the 101 TESTS. It contains questions on all the IMPORTANT CONCEPTS which are required to crack this exam. The concepts are covered in the form of 101 SPEED TESTS. No matter where you PREPARE from – a coaching or any textbook/ Guide - 101 SPEED TESTS provides you the right ASSESSMENT on each topic. Your performance provides you the right cues to IMPROVE your concepts so as to perform better in the final examination. It is to be noted here that these are not mere tests but act as a checklist of student's learning and ability to apply concepts to different problems. The book is based on the concept of TRP – Test, Revise and Practice. It aims at improving your SPEED followed by STRIKE RATE which will eventually lead to improving your SCORE. How is this product different?
• 1st unique product with 101 speed tests.
• Each test is based on small topics which are most important for the SSC 10+2 Combined Higher Secondary Level (CHSL) Exam. Each test contains around 30 MCQs (on the latest pattern of the exam) depending upon its importance for the exam.
• The whole syllabus has been divided into 4 sections which are further distributed into 100 topics.
1. Quantitative Aptitude is distributed into 28 topics.
2. Reasoning is distributed into 14 topics.
3. General English is distributed into 28 topics.
• In the end of each section a Sectional Test is provided so as to sum up the whole section.
• So 1 sectional Test each for Quantitative Aptitude, Reasoning, General English and General Awareness.
• Finally at the end a FULL TEST is provided so as to give the candidates the real feel of the final exam.
• In all, the book contains 3250+ Quality MCQ's in the form of 101 tests.
• Solutions to each of the 101 tests are provided at the end of the book.
• Separate Time Limit, Maximum Marks, Cut-off, Qualifying Score is provided for each test.
• The book also provides a separate sheet, SCORE TRACKER where you can keep a record of your scores and performance.
• It is advised that the students should take each test very seriously and must attempt only after they have prepared that topic.
• The General Awareness section has been updated latest Current Affairs.
• Once taken a test the candidates must spend time in analysing their performance which will provide you the right cues to IMPROVE the concepts so as to perform better in the final examination.
• It is our strong belief that if an aspirant works hard on the cues provided through each of the tests he/ she can improve his/ her learning and finally the SCORE by at least 15-20%.

The book SSC CGL (Tier I & Tier II) Exam 101 Practice Sets 3rd revised edition contains 100 Topic-wise Tests and 1 Practice Sets. Additional 4 Practice Sets on the latest pattern are provided for further practice. The questions on all the IMPORTANT CONCEPTS which are required to crack this exam have been covered in the book in the form of 101 SPEED TESTS. No matter where you PREPARE from – a coaching or any textbook/ Guide - 101 SPEED TESTS provides you the right ASSESSMENT on each topic.

Readship: Graduate students and researchers in condensed matter physics.

This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: “what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands.

Synical Card Injury Therapy

The Landau Theory of Phase Transitions

The Judicial Application of Human Rights Law

Ananda Math

Socio-economic and Eco-biological Dimensions in Resource use and Conservation

Critical Past and Pending Futures

The contents of this book stems from three different objectives. First, it is an introduction to the basic principles and techniques of Landau's theory, which is intended for teaching purposes. A second purpose of the book provides the practical methods for applying Landau's theory to complex systems. The last objective of the book is to incorporate the developments which have arisen in the last fifteen years from the extensive application of the theory to a variety of physical systems.

The two volume set CCIS 1030 and 1031 constitutes the refereed proceedings of the Second International Conference on Computational Intelligence, Communications, and Business Analytics, CICBA 2018, held in Kalyani, India, in July 2018. The 76 revised full papers presented in the two volumes were carefully reviewed and selected from 240 submissions. The papers are organized in topical sections on computational intelligence; signal processing and communications; microelectronics, sensors, and intelligent networks; data science & advanced data analytics; intelligent data mining & data warehousing; and computational forensics (privacy and security).

Disha's BESTSELLER "23 Years CSAT General Studies IAS Prelims & Mains Topic-wise Solved Papers (1995-2017)" consists of past years solved papers of the General Studies Paper 1 & 2 distributed into 8 Units and 52 Topics. This is the 8th edition of the book and has been thoroughly revised and updated. The book has been designed in 2 colour so as to make it more student friendly. The book also provides Essays divided topic-wise from 1993-2016. The strength of the book lies in the Errorless DETAILED Solutions. The book is 100% useful for both the General Studies papers (1 and 2) of the Prelims/ CSAT.

In the global capital markets, derivatives occupy an integral part of the economy-they are virtually driving the world markets. With the introduction of derivatives trading in the form of futures and options, including futures on indices, futures on individual stocks, options on stock indices and options on individual stocks, the Indian Capital Market is witnessing a qualitative change. The revised edition of book includes A detailed discussion on use of futures contract by various market playersCrisp discussion of the Black and Scholes model for valuation of stock optionsDetailed account of implied volatility and derivatives of the modelA large number of Review IllustrationsTrue-false questions

First Published in 1999, Routledge is an imprint of Taylor & Francis, an informa company.

This book explores the concept and methods of waste management with a new approach of biological valorization. Waste valorization is a process that aims to reduce, reuse, and recycle the waste into usable, value-added, and environmental benign raw materials which can be a source of energy. The book brings together comprehensive information to assert that waste can be converted into a resource or a raw material for value addition. Waste valorization imbibes the natural recycling principles of zero waste, loop closing, and underlines the importance of sustainable and environmentally friendly alternatives. Drawing upon research and examples from around the world, the book is offering an up-to-date account, and insight into the contours of waste valorization principles, biovalorization technologies for diverse group of wastes including agricultural, municipal, and industrial waste. It further discusses the emerging paradigms of waste valorization, waste bioenergies, valorization technologies for energy, biofuel, and biochemical production. The book meets the growing global needs for a comprehensive and holistic outlook on waste management. It is of interest to teachers, researchers, scientists, capacity builders and policymakers. Also, the book serves as additional reading material for undergraduate and graduate students of biotechnology and environmental sciences.

Mudraraksasa Is A Historical Play Of The Nataka Type In Seven Acts Written By Visakhadatta In 6Th Century A.D. In Which Chanakya, The Minister Of King Chandragupta Of Pataliputra, Wins Over Rakshasa, The Minister Of The Nandas To The Side Of Chandragupta. It Is An Unique Play In Many Respects. The Play Is Based On A Political Theme And It Bears Testimony To The Consummate Skill Of Visakhadatta As A Dramatist. It Does Not Present Any Of The Recognized Dramatic Sentiments (Rasa), But Introduces A New, Hitherto Unrecognized Sentiment Of Intense Rivalry Between Two Sharp-Witted Ministers Dedicated To The Service Of Their Respective Kings.

Soft Computing: Theories and Applications

One of the most popular Indian novels of all ages, 'Ananda Math' was translated innumerable times into Indian and English languages. Five editions were published in Bengali and Hindi during the author's lifetime, the first in 1882. The novel has the backdrop of the 18th century famine in Bengal, infamous as "Chhiyattorer Manvantar" (famine of 76th Bengali year, 1276), to narrate the saga of armed uprising of the ascetics and their disciples against the pillaging East India Company rulers. The uprising is historically known as "Santan Vidroha", the ascetics being the children of Goddess Kaptadamba. The saga of 'Ananda Math' is thrilling and best epitomised in the patriotic mass-puller song "Bande Mataram" ('Hail thee, O My Motherland') The song is still a mantra that stirs imagination of millions of Hindus. The ascetics robbed the tormentors of people — the British rulers and the greedy jaimindars — distributed the looted wealth to poverty-stricken people but jeagot them for themselves. Their targets were mostly the Company armoury and supplies. They had a highly organised setup, spread throughout Bengal. It was also India's first battle for freedom, and not the Sipahi Vidroha of 1857.

Shows how colonial indirect rule and land tenure institutions create state weakness, ethnic inequality and insurgency in India, and around the world.

An acclaimed historian of the environment, Ramachandra Guha in this book draws on many years of research in three continents. He details the major trends, ideas, campaigns and thinkers within the environmental movement worldwide. Among the thinkers he profiles are John Muir, Mahatma Gandhi, Rachel Carson, and Octavia Hill; among the movements, the Chipko Andolan and the German Greens. Environmentalism: A Global History documents the flow of ideas across cultures, the ways in which the environmental movement in one country has been invigorated or transformed by infusions from outside. It interprets the different directions taken by different national traditions, and also explains why in certain contexts (such as the former Socialist Bloc) the green movement is marked only by its absence. Massive in scope but pointed in analysis, written with passion and verve, this book presents a comprehensive account of a significant social movement of our times, and will be of wide interest both within and outside the academy. For this new edition, the author has added a fresh prologue linking the book's themes to ongoing debates on climate change and the environmental impacts of global economic development.

This book features high-quality papers presented at the International Conference on Computational Intelligence and Communication Technology (CICT 2019) organized by ABES Engineering College, Ghaziabad, India, and held from February 22 to 23, 2019. It includes the latest advances and research findings in fields of computational science and communication such as communication & networking, web & informatics, hardware and software designs, distributed & parallel processing, advanced software engineering, advanced database management systems and bioinformatics. As such, it is of interest to research scholars, students, and engineers around the globe. Strategies for Sustainability Advances in Research on Vegetable Production Under a Changing Climate Vol. 1 Rajmohan's Wife: A Novel Cow Care in Hindu Animal Ethics Bio-valorization of Waste India Book of Records 2021

373 AD. In the thick forests of Malwa, an enigmatic stranger gallops into an ambush attack by bandits to rescue a young courtesan, Darshini. His name is Deva and he is the younger son of Emperor Samudragupta. That chance encounter, first with Deva and later with his two friends, the loyal general Saba Virasena and the great poet Kalidas, forges a bond that lasts a lifetime. From a dispossessed prince, Deva goes on to become one of the greatest monarchs in ancient India, Chandragupta Vikramaditya. But the search for glory comes with a blood price. As Chandragupta the emperor sets aside Deva the brother, lover and friend, to build a glorious destiny for himself, his companions go from being his biggest champions to his harshest critics. A sabre-rattling tale of love, revenge, friendship and ambition, The King Within is about the often-difficult choice between the power of passion and the passion for power.

The New CEOs looks at the women and people of color leading Fortune 500 companies, exploring the factors that have helped them achieve success and their impact on the business world and society more broadly.

This open access book provides both a broad perspective and a focused examination of cow care as a subject of widespread ethical concern in India, and increasingly in other parts of the world. In the face of what has persisted as a highly charged political issue over cow protection in India, intellectual space must be made to bring the wealth of Indian traditional ethical discourse to bear on the complex current human-animal relationships, particularly those of humans with cows. Dharma, yoga, and bhakti paradigms serve as starting points for bringing Hindu—particularly Vaishnava Hindu—animal ethics into conversation with contemporary Western animal ethics. The author argues that a culture of bhakti—the inclusive, empathetic practice of spirituality centered in Krishna as the beloved cowherd of Vrjaja—can complement recently developed ethics-of-care thinking to create a solid basis for sustaining all kinds of cow care communities. : Offers a focused insight into a key aspect of Hindu religious practice Integrates primary research and tertiary sources to give a multifaceted understanding of the intricacies of cow care practice Challenges conventional Western thought on cow care and its worldwide implications for animal ethics.

Young or old, rich or poor, Hindu or Muslim, all unite at one platform: it's the India Book of Re-cords 2021. The year 2021 can be called the year of record making as more records are created and even more records are attempted than any other year in the past, leading to the breaking of our own boundaries to present you a bigger and thicker India Book of Records 2020. Arguably this is the biggest national book of records ever produced by any country, which in itself can be called a record. Truly, Indians create more re-cords than anyone else on the planet. While many of the Indian record holders achieved a place in Asia Book of Records and World Record Union, more than 50 Indian re-cord holders featured in a plat-form created by the initiative of three countries that produce the India Book of Records, Viet-nam Book of Records and Indonesia Book of Records to showcase the top record holders at the global stage. As you are holding 'India Book of Records 2021', surely some of the records will inspire you to challenge yourself to create a record and see your name in India Book of Records 2021.

This edited book presents a novel collection of field-based empirical studies on the Quaternary geomorphology of the Lower Ganga and its subsidiary rivers focussing on laterites, palaeoenvironment and palaeogeomorphology, palaea-coastal landforms, neo-tectonism, tidal-fluvial dynamics, extra-channel geomorphology and channel-pattern adjustment among others. Various methodologies were applied ranging from historical records and religious texts to state-of-the-art remote sensing and GIS techniques. The book appeals to all scientists and post-graduate students of geomorphology and related areas who want to acquire detailed knowledge of the geology and geomorphology of the Lower Ganga Basin or are in search of new methodologies for studying the feedback mechanisms between forms and processes.

"In 1955 a conference was held in Bandung, Indonesia that was attended by representatives from twenty-nine developing nations. Against the backdrop of crumbling European colonies, Asian and African leaders forged a new alliance and established anti-imperial principles for a new world order. The conference captured the popular imagination across the Global South. Bandung's larger significance as counterpoint to the dominant world order was both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements, diplomatic efforts, institutional experiments and heterodox visions of the history and future of the world. This book explores what the spirit of Bandung has meant to people across the world over the past decades and what it means today. Experts from a wide range of fields show how, despite the complicated legacy of the conference, international law was never the same after Bandung"–

This book engages with the concept, true value, and function of democracy in South Asia against the background of real social conditions for the promotion of peaceful development in the region. In the book, the issue of peaceful social development is defined as the conditions under which the maintenance of social order and social development is achieved – not by violent compulsion but through the negotiation of intentions or interests among members of society. The book assesses the issue of peaceful social development and demonstrates that the maintenance of such conditions for long periods is a necessary requirement for the political, economic, and cultural development of a society and state. Chapters argue that, through the post-colonial historical trajectory of South Asia, it has become commonly understood that democracy is the better, if not the best, political system and value for that purpose. Additionally, the book claims that, while democratization and the deepening of democracy have been broadly discussed in the region, the peace that democracy is supposed to promote has been in serious danger, especially in the 21st century. A timely survey and re-evaluation of democracy and peaceful development in South Asia, this book will be of interest to academics in the field of South Asian Studies, Peace and Conflict

Studies and Asian Politics and Security. Includes new and updated records with never-before-seen photography--from the new shortest living man and a slam-dunking parrot to the fiercest predators in the ocean.

On Rakesh Roshan, actor, director and producer of Bollywood films.

HERE is a small village on the river Madhumati. On account of its being the residence of wealthy zemindars it is regarded as a village of importance. One Chaitra afternoon the summer heat was gradually abating with the weakening of the once keen rays of the sun; a gentle breeze was blowing; it began to dry the perspiring brow of the peasant in the field and play with the moist locks of village women just risen from their siesta. It was after such a siesta that a woman of about thirty was engaged in her toilet in a humble thatched cottage. She took very little time to finish the process usually so elaborate with womankind; a dish of water, a tin-framed looking-glass three inches wide, and a comb matching it sufficed for the task. Then, a little vermilion adorned her forehead. Last of all some betel leaves dyed her lips. Thus armed, a formidable champion of the world-conquering sex set out with a pitcher in her arm and pushing open the wattle gate of a neighbouring house entered within it. There were four huts in the house which she entered. They had mud floors and .bamboo walls. There was no sign of poverty anywhere, everything was neat and tidy. The four huts stood on the four sides of a quadrangle. Of these three had entrances opening on the yard, the fourth opened outwards. This last was die reception room, while the others, screened on all sides, constituted the zenana. Some brinjals and salads were growing on the carefully tilled plot of land in front of die raised terrace before the outer room. The whole was enclosed by a reed fence with a bamboo gate. So the woman could easily make her way into the house. It is superfluous to add that she went straight towards the zenana. I know not where the other inmates of the house had gone after their siesta, but at that time dire were only two persons there—one, a young woman of eighteen bent over her embroidery and a child

of four immersed in play. His elder brother had willfully left his ink-pot behind when going to school. The child's eyes had fallen on it, and he was joyfully smearing his face with die ink. He seemed to be afraid of his brother coming back and snatching the ink-pot away, and so he was emptying the pot. The newcomer sat down on the floor by the side of her who was working and asked, "What are you doing?"

SSC Combined Graduate Level (Tier I & Tier II) Exam 101 Speed Tests with 5 Practice Sets 2nd Edition

The Dynamics of Conflict and Peace in Contemporary South Asia

Alexander and Chandragupta the Great

Mudraraksasa (The Signet Ring of Rakshasa)

This historical play on Chandragupta, who ushered a new Golden Period in the history of India in the modern era (after a sequence of glorious eras including those of Rama in the Treta-Yuga (cosmic era) and Krishna (Dwapar-Yuga), millennia ago, who are now venerated as Avatars (Incarnations of God) by virtue of their exemplary characters and deeds.) It draws from information contained in history books, a play in Hindi by the famed poet and playwright, Jaya Shankar Prasad, the recent television series called Chanakya, and other available sources; and is written in a fashion to facilitate stage-production by youngsters and adults, particularly those of Indian descent in the USA, Europe, and other parts of the world.

A considerable change in climate at a global level will impact the vegetable cultivation and agriculture as a whole; subsequently affecting the world's food supply. Climate change per se is not necessarily harmful; the problems arise from extreme events that are difficult to predict (erratic rainfall patterns and unpredictable high and low temperatures), and consequently reduce crop productivity. Vegetables are in general more succulent (have 90% water) and are more sensitive to climatic vagaries. Sudden changes in temperature coupled with irregular precipitation at any phase of crop growth can affect the normal growth, flowering, pollination, fruit setting, fruit development and fruit ripening can decrease the yield. The irregular precipitation can also affect the soil salinity and is a major challenge in many vegetable growing areas. To mitigate the harmful impact of climatic change there is a urgent need to develop adequate adaptation strategies for adverse effect of climate change and the preference should be given on development of heat, cold, drought, flood and salinity stress tolerant genotypes along with climate proofing through conventional and non-conventional breeding techniques. Available evidence shows that there is a high probability of increase in the frequency and intensity of climate related natural hazards due to climate change and hence increases the potential threat due to climate change related natural disasters in the world. This book (Volume- I) will be basically useful for the researchers and postgraduate students with current challenges and mitigation strategies for increasing vegetable production under a changing climate.

This book presents the outcomes of the 2017 national workshop and international conference organized by CEENR of ISEC, Bengaluru and Assam University Silchar. Addressing the threats to biodiversity and sustainable development resulting from the impacts of human induced pressures on ecosystems and global-warming-driven climate change is a major challenge. It requires increased knowledge and an enhanced information base in order to devise local policies to improve the adaptive capacity of vulnerable socio-ecological systems in developing countries. In this context, the book presents research that has the potential to benefit the environment and empower communities. It appeals to researchers investigating diverse aspects of socio-ecological-biological systems to create strategies for resource use, conservation and management to ensure sustainability. He is the pioneer of an intellectual tradition initiated for the orderly conduct of the Indian economic, political, academic, and social system. He eliminated the enemies by his strategies. He gave a coveted position to Sanskrit literature by his sheer brilliance. He presented his entire life to others as a benchmark to be studied. He gave importance to character, pride, and commitment towards duty. The name of such a colossus is 'Chanakya'. He was endowed with a sharp intellect, strong resolution, sheer brilliance, foresight and thus a man of that era. He had only one motto in his life — 'Buddhirdasa Balam Tasya' i.e., One, who has intelligence has the might! Keeping in mind the growing popularity of Chanakya's literature among the readers, we have published this 'Combined Edition'. It is our aim to make Chanakya's invaluable wealth as a great scholar, easily available so that everyone can lead a planned and prosperous life. Also, I personally feel that everyone must read this book. - Acharya Rajeshwar Mishra

Interest for Jain studies has increased considerably in the last decades. Scholars will be thankful to the organizers of the 12th World Sanskrit Conference who, for the first time in such a conference, planned a special panel on this field. The ten papers collected in this volume show the importance, abundance and variety of topics that can be considered. Philological analysis still proves useful, whether it concentrates on one particular work or on clusters of texts. A study of the strategy of narrative and predication needs a historical approach, kavya literature lends itself to renewed and indepth interpretations. Finally the reader will observe the constant renewal of Jainism, as some new literary genre or a new sect are seen to have gained momentum in modern times.

Polyphenols are a heterogeneous group of bioactive compounds mainly found in plant-based foods. Numerous clinical and epidemiological studies have led to the result that polyphenol intake may protect against chronic diseases such as cardiovascular and neurodegenerative diseases, cancer, or type 2 diabetes, to name some. Polyphenol intake estimation can be obtained through food frequency questionnaires and nutritional biomarkers, both having their own advantages and disadvantages. Although the association between these bioactive compounds and health seems irrefutable, many questions remain still unanswered. For instance, more studies are needed to identify possible interactions and effect-modulating variables, such as smoking habit, body mass index, sex, alcohol, hormones, other foods, etc. Moreover, intestinal microbiota seems to play an important role in the metabolism of polyphenols, but it is still unclear how.
