Chapter 16 - The Respiratory System

16.2: Structure and Function of the Respiratory System *Respiration is the life-sustaining process in which gases are exchanged between the body and the outside atmosphere. Specifically, oxygen moves from the outside air into the body; and water vapor, carbon dioxide, and other waste gases move from inside the body into the outside air.*

16: Respiratory System - Biology LibreTexts
1 RESPIRATORY SYSTEM Chapter 16 2 PRIMARY FUNCTIONS 1. Exchange gases (oxygen and CO2) 2. Produce vocal sounds 3. Sense of smell 4. Regulate blood pH 3 LUNG CAKE 4 Respiration = process of gas...

Ch 16 The Respiratory System - Google Slides

Chapter 16. The Respiratory System. Mosby Items and derived items © 2010, 2006, 2002, 1997, 1992 by Mosby, Inc., an affiliate of Elsevier Inc. 2. Objectives. •Discuss the generalized functions of the respiratory system •List the major organs of the respiratory system and describe the function of each •Compare, contrast, and explain the mechanism responsible for the exchange of gases that occurs during internal and external respiration.

Chapter 16 The Respiratory System

Chapter 16 The respiratory system is arranged by anatomic site and then by procedure The respiratory system has some codes that may be considered cosmetic. Endoscopy- are coded based on approach Thoracotomy are coded based on approach Many endoscopic procedures may be performed through the same scope during the same operative session.
