Behavior of Waves; 47 Reflection. Reflection occurs when a wave bounces off a surface that it cannot pass through. Reflection does not change the speed or frequency of a wave, but the wave can be flipped upside down. 48 Refraction. Refraction is the bending of a wave as it enters a new medium at an angle.

502 Chapter 17 Observing Waves in a Medium

Objective After completing this activity, students will be able to

- describe a mechanical wave as a passage of energy through medium, with no net movement of the medium. This lab can dispel the misconception that waves are parts of the medium that travel with the wave.
