chem 321 lecture 21 chromatography Page 2/32. Read Online Chem 321 Lecture 21 Chromatography Csun csun collections that we have. This is why you remain in the best website to see the unbelievable ebook to have. If you're having a hard time finding a good children's book amidst the many free classics available online, you might want to check out the International Digital Children's Library ...

*Chem 321 Lecture 21 Chromatography Csun*

Ion-exchange chromatography is a form of liquid chromatography in which the stationary phase is an inert polymer that is derivatized with charged groups that can bind (exchange) ions of opposite charge. The most common cation and anion exchange resins consist of a styrene-divinylbenzene crosslinked copolymer (Fig. 17.1).

*Chem 321 Lecture 24 - Ion-Exchange Chromatography*

Chromatography is a method (group of methods) for separating components of mixtures. A system consisting of a stationary and a mobile phase is necessary for chromatographic separation. The stationary phase is a substance that binds and shortly releases the molecules moving through the system.
