As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicizes concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user-generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

A guide covering version 7.0 uses screen representations to demonstrate applications such as customizing charts, editing, and drawing. This paper presents a coordinated portfolio investment survey guide provided to assist national compilers in the conduct of the Coordinated Portfolio Investment Survey, conducted under the auspices of the IMF with reference to the year-end 1997. The guide covers a variety of conceptual issues that a country must address when conducting a survey. It also covers the practical issues associated with preparing for a national survey. These include setting a timetable, taking account of the legal and confidentiality issues raised, developing a mailing list, and maintaining quality control checks.

El término Inteligencia de Negocios (Business Intelligence) con frecuencia también se utiliza el término Inteligencia de Negocio (en singular) fue acuñado por Gartner a mitad de la década de los 90, aunque el concepto tiene su origen en el comienzo de los sistemas de información gerenciales (MIS, Management Information System) de los años 70, cuando comenzaba la automatización de las tareas en las empresas. Hoy en día los sistemas de información son la espina dorsal de las empresas y su soporte diario y el eje sobre el que se vertebran los sistemas de Inteligencia de Negocios. El libro hace una introducción teórico-práctica a la Inteligencia de Negocios y a la Analítica de Datos y sus diferentes categorías, así como a la Analítica de Big Data, dada la expansión de esta tendencia tecnológica en todo tipo de organizaciones y empresas, además de en los mundos académicos y de investigación. **The health care system in Canada is much-touted in the international sphere, but often overlooked when it comes to an examination of its actual administration and regulation. Health Systems in Transition: Canada provides an objective description and analysis of the public, private, and mixed components that make up health care in Canada today. Published in co-operation with the World Health Organization Regional Office for Europe on behalf of the European Observatory on Health Systems and Policies, Gregory P. Marchildon's study offers a statistical and visual description of the many facets of Canadian health care financing, administration, and service delivery. This study's most distinctive feature is a comparative description and analysis. For international comparison, five other countries have been selected: The United States, Australia, the United Kingdom, France, and Sweden. Because public health care administration and delivery is highly decentralized in Canada, Marchildon also analyzes the important health status and health care features within Canada by province and territory, and describes in some detail the unique constitutional, jurisdictional, and financial features of the Canadian system. Balancing careful assessment, summary, and illustration, Health Systems in Transition: Canada is a thorough and illuminating look at one of the nation's most complex institutions.**

The World Malaria Report 2019 provides a comprehensive update on global and regional malaria data and trends. The report tracks investments in malaria programs and research as well as progress across all intervention areas: prevention, diagnosis, treatment, elimination, and surveillance. It also includes dedicated chapters on the consequences of malaria on maternal infant and child health the "High Burden to High Impact" approach as well as biological threats to the fight against malaria. The 2019 report is based on information received from more than 80 countries and areas with ongoing malaria transmission. This information is supplemented by data from national household surveys and databases held by other organizations.

This volume uses the study of firm dynamics to investigate the factors preventing faster productivity growth in Latin America and the Caribbean, pushing past the limits of traditional macroeconomic analyses. Each chapter is dedicated to an examination of a different factor affecting firm productivity - innovation, ICT usage, on-the-job-training, firm age, access to credit, and international linkages - highlighting the differences in firm characteristics, behaviors, and strategies. By showcasing this remarkable heterogeneity, this collection challenges regional policymakers to look beyond one-size-fits-all solutions and create tailored policy mixes tailored to distinct firm needs. This book is open access under a CC BY-NC-ND 3.0 IGO license.

This year's report shows that after an unprecedented period of success in global malaria control, progress has stalled. Data from 2015-2017 highlight that no significant progress in reducing global malaria cases was made in this period. There were an estimated 219 million cases and 435,000 related deaths in 2017. The World Malaria Report 2018 draws on data from 90 countries and areas with ongoing malaria transmission. The information is supplemented by data from national household surveys and databases held by other organizations. This open access book approaches the anxieties inherent in food consumption and production in Vietnam. The country's rapid and recent economic integration into global agro-food systems and consumer markets spurred a new quality of food safety concerns, health issues and distrust in food distribution networks that have become increasingly obscured. This edited volume further puts the eating body centre stage by following how gendered body norms, food taboos, power structures and social differentiation shape people's ambivalent relations with food. It uncovers Vietnam's trajectories of agricultural modernisation against which consumers and producers manoeuvre amongst food self-sufficiency, security and abundance. Food Anxiety in Globalising Vietnam is explicitly about 'dangerous' food - regarding its materiality and meaning. It provides social science perspectives on anxieties related to food and surrounding discourses that travel between the local and the global, the individual and society and into the body. Therefore, the book's lens of food anxiety matters for social theory and for understanding the embeddedness and discontinuities of food globalizations in Vietnam and beyond. Due to its rich empirical base, methodological approaches and thematic foci, it will appeal to scholars, practitioners and students alike.--

**El futuro de la singularidad tecnológica ha llegado para quedarse. Las inimitables capacidades de la IA y de la robótica son evidencias incontestables, y cada vez son más intensas e innovadoras en la vida social, económica, y en donde sus notables aplicaciones a los distintos sectores nos manifiestan una realidad cada vez más alejada de lo que no hace mucho tiempo era pura "distopía". Y sin embargo, hoy en día nos sitúan en un mundo en donde el hombre se dice (no exento de un tono autocomplaciente) será superado por la "máquina pensante", superinteligente y plenamente autónoma, capaz de "pensar, sentir y decidir" por sí misma. Nada que ver con los autómata que en sus comienzos simplemente emulaban tareas repetitivas de ser humano. Hoy en día la denominada "Inteligencia Computacional" nos sitúa en un futuro de incógnitas e incertidumbres, no sólo en cuanto a los robots inteligentes (los nuevos esclavos digitales, como los viejos sirvos o esclavos del Derecho romano) serán capaces de superar el razonamiento, conocimiento y conciencia humana. No sólo nos bastan estas desconcertantes reflexiones, sino que serán capaces de emular actividades propias del cerebro y desarrollar un pensamiento lógico, incluso superior al "racional", y en donde no seremos capaces como el clásico test o juego de la imitación de Alan Turing) de distinguir el hombre de la máquina... ¿suplico espejismo o revolución tecnológica cierta? Un paso de gigante de la vieja máquina de vapor a la máquina superinteligente, capaz de alcanzar un razonamiento propio (machine learning) y con sutiles ventajas competitivas. En este sofisticado estado de cosas hasta la UE (en resoluciones del Parlamento Europeo) se plantea de futuro otorgar personalidad electrónica a los robots inteligentes, capaz de generar decisiones autónomas cuando alcance "ese ansiado aprendizaje profundo" (deep learning) lo que nos sitúa en otro problema consistente en responder de los daños que pueda cometer por sus actuaciones individuales los "agentes autónomos" alejados de los circuitos de supervidas programaciones algorítmicas y por el contrario siendo capaces de tomar y adaptar sus decisiones propias por la interconectividad con el entorno.**

**This open access edited volume is a comparative effort to discern the short-term educational impact of the covid-19 pandemic on students, teachers and systems in Brazil, Chile, Finland, Japan, Mexico, Norway, Portugal, Russia, Singapore, Spain, South Africa, the United Kingdom and the United States. One of the first academic comparative studies of the educational impact of the pandemic, the book explains how the interruption of in person instruction and the variable efficacy of alternative forms of education caused learning loss and disengagement with learning, especially for disadvantaged students. Other direct and indirect impacts of the pandemic diminished the ability of families to support children and youth in their education. For students, as well as for teachers and school staff, this included the economic shocks experienced by families, in some cases leading to food insecurity and in many more causing stress and anxiety and impacting mental health. Opportunity to learn was also diminished by the shocks and trauma experienced by those with a close relative infected by the virus, and by the constrains on learning resulting from students having to learn at home, where the demands of schoolwork had to be negotiated with other family necessities, often sharing limited space. Furthermore, the prolonged stress caused by the uncertainty over the resolution of the pandemic and resulting from the knowledge that anyone could be infected and potentially lose their lives, created a traumatic context for many students and teachers living in communities where the multi/acted negative impacts resulting from the pandemic were pervasive. This is an open access book.**

**Los entornos profesionales y académicos exigen con frecuencia la composición de contenidos de una manera más o menos pública. Esto no solo requiere ciertas capacidades de oratoria, sino también la utilización de recursos visuales que apoyen los contenidos, como, por ejemplo, las presentaciones de diapositivas. En este libro, publicado por Ideaspapers Editorial, se tratan las prestaciones de la aplicación para la creación de presentaciones Microsoft PowerPoint. Se enseña, por una parte, el manejo de sus funcionalidades y herramientas con ayuda de abundantes recursos gráficos y, por otra, se aborda su tratamiento desde un enfoque pragmático para que el alumno aprenda a adecuar sus presentaciones a las características de su empresa (estilo, formato, identidad corporativa, etc.). Con este manual, el lector no solo aprenderá a crear presentaciones, sino que obtendrá unas pautas para transmitir, con ellas, ideas claras en formatos adecuados a los requisitos formales que sus circunstancias profesionales o académicas le requieren.**

Poverty Reduction Strategy Paper: Joint Staff Advisory Note

Survey Guide

This General Survey, which deals with all eight fundamental Conventions, seeks to give a global picture of the law and practice in member States in terms of the practical application of ratified and non-ratified Conventions, describing the various positive initiatives undertaken in some countries, in addition to certain serious problems encountered in the implementation of their provisions. The General Survey recognizes the interdependence and complementarity between these Conventions and their universal applicability, while bearing in mind the specificities offered by each Convention. The General Survey also highlights the main considerations elaborated by the Committee of Experts, as well as its corresponding guidance in order to achieve fuller conformity with the fundamental Conventions. The General Survey seeks to do this by analysing the scope, methods and difficulties of application for all eight Conventions, the most salient thematic features pertaining to each Convention, as well as their enforcement and impact.

"Success is defined by a continuing desire to be the person God called you to be and to achieve those goals that God helps you to set," says Charles Stanley. In Success God's Way, Stanley teaches God's principles for success, including ten steps to help you reach God's plan in your life, and what to do about the seven success blockers that entangle believers. "Dr. Stanley has defined success in a timeless manner?knowing and doing the will of God. When a person knows Christ personally and consistently obeys the principles of Scripture, he is prepared for success God's way." Franklin Graham, Chairman and CEO, Samaritan's Purse; God, Billy Graham evangelistic Association "In a society that increasingly judges the success of individuals by the clothes they wear, the car they drive, the club they belong to, or the career they choose, the church desperately needs to reaffirm biblical standards. Once again, Dr. Stanley has brought clear focus to a timely issue. Success God's Way challenges readers to reexamine whether or not they are sacrificing genuine, lasting success on the altar of a worldly, temporary counterfeits and therefore settling for a lot less than what God wants to give them." "Anne Graham Lotz, International Bible Teacher and Bestselling Author "In an age when our thinking is skewed, our zeal is waning, and our desire for excellence is deadened by apathetic self-centeredness, this book presents many biblical insights that challenge us to hear God's Word to Joshua to meditate on God's Word and be strong and courageous so we can have success." Lo que estaba por llegar ya está aquí. El mundo inverosímil que hace unos años parecía ciencia ficción ha llegado para quedarse. Isabel Aguilera, durante años directora general para España y Portugal de uno de los gigantes de este nuevo mundo, Google, y reconocida por Financial Times como una de las 25 mejores ejecutivas europeas, analiza desde distintos prismas lo que ha supuesto la revolución digital y cómo puede reflexionarse sobre la nueva era y sus consecuencias con sentido común. No explica también, con una claridad extraordinaria, por qué es preciso no quedarse atrapado en el Valle de la Muerte y cómo atravesarlo con éxito, a pesar del vértigo y el miedo, ya que el tiempo ni se detiene ni se apaga. Disrupción digital, Big data, inteligencia artificial, ecosistema colaborativo y otros más son avances tecnológicos que se han incorporado a la vida diaria y que han contribuido a la transformación de todo: las relaciones personales y laborales, las estructuras económicas, la competencia empresarial y, sobre todo, de algunos conceptos como la propiedad, la intimidad o la privacidad. Un ensayo divulgativo y a la vez de calado que se adentra en los cambios tecnológicos, los retos y algunas respuestas de ese futuro que ya es presente.

This book discusses contributions focusing on insect physiology and ecology written by experts in their respective fields. Four chapters in this book are dedicated to evaluating the morphological and ecological importance and distribution of water beetles, dung beetles, weevils, and tabanids, while two others investigate the symbiotic relationships between various insects and their associations with bacteria, fungi, or mites. Two other chapters consider insecticide detoxification, as well as insect defense mechanisms against infections. The last two chapters concentrate on insects as sustainable food. The World Malaria Report 2015 assesses global malaria disease trends and changes in the coverage and financing of malaria control programs between 2000 and 2015. It also summarizes progress towards international targets, and provides regional and country profiles that summarize trends in each WHO region and each country with malaria. The report is produced with the help of WHO regional and country offices, ministries of health in endemic countries, and a broad range of other partners. The data presented are assembled from the 96 countries and territories with ongoing malaria transmission, and a further five countries that have recently eliminated malaria. Most data are those reported for 2014 and 2015, although in some cases projections have been made into 2015, to assess progress towards targets for 2015.

Nowadays, not only psychologists are interested in the study of Emotional Intelligence (EI). Teachers, educator, managers, employers, and people, in general, pay attention to EI. For example, teachers would like to know how EI could affect student's academic results, and managers are concerned about how EI influences their employees' performance. The concept of EI has been widely used in recent years to the extent that people start to applying it in daily life. EI is broadly defined as the capacity to process and use emotional information. More specifically, according to Mayer and Salovey, EI is the ability to: "1) accurate perception, appraise, and expression of emotion; 2) access and/or generation of feelings when they facilitate thought; 3) understand emotions and emotional knowledge; and 4) regulate emotions to promote emotional and intellectual growth" (Mayer and Salovey 1997, p. 10). When new information arises into one specific area of knowledge, the work of the scientists is to investigate the relation between this new information and other established concepts. In this sense, EI could be considered as a new framework to explain human behaviour. As a young concept in Psychology, EI could be used to enhance the performance in the activities of everyday life. Over the past two decades, studies of EI have tried to delimitate how EI is linked to other competences. A vast number of studies have reported a relation between EI and a large list of competences such as academic and work success, life satisfaction, attitude to emotions, emotional expression, emotional-based decision making, impulsive control, stress management, among others. Moreover, recent researches have shown that EI plays an important role in the prediction of behaviour besides personality and cognitive factors. However, it is not until quite recently that studies on EI have considered the importance of individual differences in EI and their interaction with cognitive abilities. The general issue of this Research Topic was to expose the role of individual differences on EI in the development of a large number of competencies that support a more efficient performance in people's everyday life. The present Research Topic provide an extensive review that may give light to the better understanding of how individual differences in EI affect human behaviour. We have considered studies that analyse: 1) how EI contributes to emotional, cognitive and social process beyond the well-known contribution of IQ and personality traits, as well as the brain system that supports the EI; 2) how EI contributes to relationships among emotions and health and well-being, 3) the roles of EI during early development and the evaluation in different populations, 4) how implicit beliefs about emotions and EI influence emotional abilities.

This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menu containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.

At 368 pages, Beyond Salsa for Ensemble, Vol. 1 is the most ambitious of the 15 volume series. The course is designed for college and high school Latin music ensembles and working salsa bands seeking to add modern Cuban "timba" and "songo" material and techniques to their repertoires. The course begins with the basic salsa groove and then presents two modern Cuban grooves (one in 2-3 clave and one in 3-2 clave), with note-for-note transcriptions for piano, bass, bongo, timbales, congas, and drums - all explained in careful detail in a conversational style. The rest of the book is devoted to rhythmic arrangement. Again, every stroke of every part is meticulously transcribed, with lead sheets also provided for more experienced players. Finally, the book contains a complete chart for performers of a popular Cuban hit by the popular group Que Son Sals, led by Puro Amor across the Bay of Salsa Piano book.

This Joint Staff Advisory Note focuses on the Poverty Reduction Strategy Paper (PRSP) for the Democratic Republic of the Congo (DRC). The PRSP for Congo states that accelerated and sustainable economic growth will not be possible without a dynamic private sector engaged in job creation, development of industries, and competitive export sector. It emphasizes the role of growth as an important part of poverty reduction. In particular, it accords priority to rehabilitating road and energy infrastructure, including electrification of urban and rural areas.

*This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders, including civil society, and the notion that climate change is at a tipping point with urgent measures needed in the next decade. Against this background, civil society is turning its attention to the courts as a means to directly influence climate action, partly because of the global scepticism towards the progress of global climate action, despite the ongoing implementation of the Paris Agreement. Focusing on the individual, broadly representing civil society, the book offers fresh perspectives on climate change litigation. While most of the literature on climate change litigation examines the same specific jurisdictions, mostly common law countries (US and Australia in particular), this book also considers specific countries in Asia, Africa and Latin America with little or no climate change litigation. It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action. Unlike other literature on the subject, this book analyses climate change litigation using a scenario-based methodology. Combining rigorous academic analysis with a practical policy-oriented focus, the book provides valuable insights for a wide range of stakeholders interested in climate change litigation. It appeals to civil society organisations around the world, international organisations and law firms interested in climate change litigation.*
