

## *Communicating Global To Local Resiliency A Case Study Of The Transition Movement Communication Globalization And Cultural Identity*

*More than 12 years have passed since the publication of the first edition of Crisis and Emergency Management. During that time numerous disasters—from 9/11 to massive earthquakes in Iran and China, to the giant Asian Tsunami, Hurricane Katrina, and the Fukushima Tsunami and ensuing nuclear meltdown—have changed the way we manage catastrophic events. With contributions from leading experts, this second edition features 40 new chapters that address recent worldwide crises and what we have learned from emergency responses to them. See What's New in the Second Edition: Up-to-date concepts, theories, and practices Analysis of recent disasters and their effect on emergency management Policy and managerial lessons Suggestions for capacity building in crisis and emergency management The book covers a wide range of international issues using critical, empirical, and quantitative analyses. It discusses various approaches to topics such as resolving political tension and terrorism issues, the potential use of biological weapons, and the role of public relations in crisis. The author offers insight into organizational and community resiliency development; a "surprise management" theory in practice for upgrading the knowledge and skills in managing crises and governing emergencies; and better and more effective organizational, political, social, and managerial coordination in the processes. He presents case studies that enhance and advance the future theory and practice of crisis and emergency management, while at the same time providing practical advice that can be put to use immediately. Managing crises and governing emergencies in such an age of challenges demands a different kind of knowledge, skills, and attitudes that were not available yesterday. This book gives you valuable information with applications at the macro, micro, organizational, and interorganizational levels, preparing you for emergency management in an increasingly globalized and uncertain world.*

*Major operational incidents in payment systems suggest the need to improve their resiliency. Meanwhile, as payment infrastructures become more digitalized, integrated, and interdependent, they require an even higher degree of resilience. Moreover, risks that could trigger major disruptions have become more acute given the rise in power outages, cyber incidents, and natural disasters. International experiences suggest the need to strengthen reliability objectives, redundancies, assessment of critical service providers, endpoint security, and alternative arrangements*

*Advances in digital technologies have provided ample positive impacts to modern society; however, in addition to such benefits, these innovations have inadvertently created a new venue for criminal activity to generate. Combating Violent Extremism and Radicalization in the Digital Era is an essential reference for the latest research on the utilization of online tools by terrorist organizations to communicate with and recruit potential extremists and examines effective countermeasures employed by law enforcement agencies to defend against such threats. Focusing on perspectives from the social and behavioral sciences, this book is a critical source for researchers, analysts, intelligence officers, and policy makers interested in preventive methods for online terrorist activities.*

*These Proceedings are the work of researchers contributing to the 10th International Conference on Cyber Warfare and Security ICCWS 2015, co hosted this year by the University of Venda and The Council for Scientific and Industrial Research. The conference is being held at the Kruger National Park, South Africa on the 24 25 March 2015. The Conference Chair is Dr Jannie Zaaiman from the University of Venda, South Africa, and the Programme Chair is Dr Louise Leenen from the Council for Scientific and Industrial Research, South Africa.*

Social Inequalities, Media, and Communication

A Case Study of the Transition Movement

ICCWS2015

*This book presents research that focuses on Sustainable Development in Asia. Chapters are extended works of papers presented at Communication/Culture and The Sustainable Development Goals (CCSDG): Challenges for a New Generation, an international conference held in Chiang Mai University in December 2015. The chapters address assessments of Millennium Development Goals in several Asian countries and the region as a whole. The book also identifies and discusses the changes and potential improvements in the transition from Millennium Development Goals (2000-2015) to Sustainable Development Goals (2015-2030). Areas that are covered in the book, which are illustrated with case studies, include Corporate Social Accountability, Information and Communications Technologies, and Small Medium Enterprises (SMEs). The book serves as a useful resource for academics, scholars, students, and policymakers, interested in Development Studies.*

*Effective communication of concepts and solutions related to reliability, risk, and resiliency is frequently cited by technical professionals as the most challenging and overlooked aspect of their work. Texts and guidance documents often reference the importance of better communication; however, there are few practical examples and limited practical guidance for this type of communication. This book fills many of these gaps for practitioners. Communicating Reliability, Risk, and Resiliency to Decision Makers provides the hands-on approaches and techniques that will make you more effective in getting decision makers to move from discussion to action.*

*This book details a process of creating a long-term sustainability and resilience plan for local governments to use in designing and implementing sustainability and resilience-related policies, initiatives, and programs. It offers guidance and methods in applying sustainability and resilience strategies to attain the prosperity of organizations and communities. The recommendations in this book are based on the author's years of experience in directing applied resilience and sustainability planning for a local government, and years of research covering diverse aspects of sustainability and resilience from climate change, climate preparedness and readiness, quadruple bottom line strategy, greenhouse gas emission reduction policies, climate adaptation and mitigation to sustainable energy policies and initiatives. Chapter one defines terms related to sustainability and resilience and addresses how the topics reshape local governments and communities. Chapter two maps out the sustainability and resilience process for organizations and communities, determining the appropriate steps to be taken at each level of sustainability and resilience planning. Chapter three identifies community and organizational level engagement, with internal and external stakeholders, including designs necessary throughout these processes. Chapter four contains measuring, tracking, monitoring and reporting methods using the quadruple bottom line strategy, and developing a sustainability and resilience progress report to ensure accountability, transparency, and good governance. Then, chapter five details the implementation of a sustainability and resilience plan once it is established, describing potential programs and initiatives to achieve sustainable and resilient communities. Chapter six describes the intersection between sustainability and resilience, and chapter seven examines the tools and resources available to create a practical sustainability and resilience plan. Chapter eight concludes the text by addressing the future of sustainability and resilience, and complexities of the modern dynamics of the interconnected systems in cities, counties, and organizations, and recommends how local government administrators in their planning methods and strategies must consider these challenges.*

*The COVID-19 pandemic has affected individuals and caused destabilization of households and*

*business activities. In emerging economies, many sectors and companies, especially small and medium enterprises (SMEs), are severely influenced by the reduction or cessation of economic activity. Overcoming the COVID-19 virus and allowing the world to heal will allow the economy to grow more resilient. First, however, we must understand that old managerial practices can no longer generate competitive advantage in the post-pandemic world. Public Health and Economic Resiliency in the Post-COVID-19 Era presents epidemiological studies of the COVID-19 pandemic, identifies the impacts it has on human health, and analyzes the impacts on public health and economy. This management tool also discusses the socio-economic human vulnerability related to the COVID-19 pandemic. Covering topics such as risk analysis, quality management systems, and therapeutic systems, this book is a dynamic resource for academic researchers and investigators, university professors, students, epidemiologists, health professionals, economists, managers, sociologists, physicians, policymakers, government officials, and academicians.*

*Produced by the International Social Science Council (ISSC) and UNESCO, and published by*

*the OECD, the 2013 World Social Science Report represents a comprehensive overview of the*

*field gathering the thoughts and expertise of hundreds of social scientists from around the*

*world. This edition focuses on the transformative role of the social sciences in confronting*

*climate and broader processes of environmental change, and in addressing priority problems*

*from energy and water, biodiversity and land use, to urbanisation, migration and education.*

*The report includes 100 articles written by 150 authors from 41 countries all over the world.*

*Authors represent some 24 disciplines, mainly in the social sciences. The contributions*

*highlight the central importance of social science knowledge for environmental change*

*research, as a means of understanding changing environments in terms of social processes and*

*as framework for finding concrete solutions towards sustainability.*

*This volume is first and foremost about people and the processes needed to facilitate sharing*

*of knowledge in order to effect positive developmental change. It is contextual and based on*

*dialogue necessary to promote stakeholder's participation, which is essential for the*

*understanding of their perceptions, perspectives, values, attitudes and practices, so that these*

*can be incorporated into the design and implementation of development initiatives. This volume*

*follows the two-way horizontal model and increasingly makes use of many-to-many forms of*

*communications to facilitate the understanding of people's perceptions, priorities and*

*knowledge with its use of a number of tools, techniques, media and methods. It aims to give*

*voice to those most affected by the development issue(s) at stake, allowing them to participate*

*directly in defining and implementing solutions and identifying development directions. Based*

*on the assumption that authentic participation directly addresses power and its distribution in*

*society, which often decreases the advantage of certain elite groups, the authors argue that*

*structural and sustainable change necessitates the redistribution of power. This collection*

*offers perceptive insights and vivid examples to prove that the field of communication for*

*development and social change is indeed vibrant.*

*Resilience as a concept has become embedded in public policy discourse within countries across*

*the world in a wide range of contexts--planning, education, emergency management, and*

*supply chains. The goal of this book is to assist future community leaders and professionals with the subsystem components and the actions that must be taken to insure community resilience, and to alert them to the potential pitfalls when adapting their community to the challenges that continually change. The development of trust among and between diverse members of communities and the political and economic leaders is essential if our views of how to build resilience are to change. The book is divided into five sections. The first section explores the challenges of transformational change, building community resilience with alternative frameworks, and resilience in time and space with lessons from ecology. Section II covers the building of hazard resilient communities through technology, microscale disaster and local resilience, the building of resilient cities by harnessing the power of urban analytics, and the failure to describe and communicate the possible future climate change scenarios. Section III examines challenges for urban theory when conceptualizing financial resilience, the role of social capital in community disaster resilience, the challenges of citizen engagement and resilience in the Dutch disaster management, and the rationalities of extraction and resilience of fossil-fueling vulnerability in an age of extreme energy. Section IV explores shifting from risks to consequences when building resilience to mega-hazards, resilience and small island nations, the sea level rise, demographics and rural resilience on Maryland's Eastern shore, and the epicenter of community resilience in the California's San Francisco Bay Area. Section V discusses observations and challenges on building community resilience in the twenty-first century. This highly informative and indispensable volume will be meaningful for future community leaders, citizens, stakeholders, government officials, emergency management, and crisis interveners.*

*The representation of Islam is unquestionably a critical test for comparing journalistic reporting across countries and cultures. The Islamic religion has weight in international reporting (defining what we termed "foreign Islam"), but it is also the religion of numerically important minority groups residing in Europe ("national Islam"). The first part of the book is "setting the scene." Three chapters provide insights in dominant patterns of the representation of Islam as detected by various authors and studies involved with Islam representation in Europe. Part two, the core section of the book, contributes to the development of the field of comparative journalism studies by comparing several countries and six media systems in Western Europe: the Dutch-speaking part of Belgium (Flanders), the French-speaking part of Belgium (Wallonia), the Netherlands, France, Germany, and the U.K. Part three of this book presents two reception studies, one qualitative and the other quantitative. Equally important, as the bulk of attention goes to Western Europe, is the extension towards the representation of Muslims and Islam outside Western Europe. Part four of the book is devoted to the representation of Islam in some of the so-called BRICs-countries: Russia, China, and India.*

*Disaster Vulnerability, Hazards and Resilience*

*This edited book investigates the interrelations of disaster impacts, resilience and security in an urban context. Urban as a term captures megacities, cities, and generally, human settlements, that are characterised by concentration of quantifiable and non-*

*quantifiable subjects, objects and value attributions to them. The scope is to narrow down resilience from an all-encompassing concept to applied ways of scientifically attempting to 'measure' this type of disaster related resilience. 28 chapters in this book reflect opportunities and doubts of the disaster risk science community regarding this 'measurability'. Therefore, examples utilising both quantitative and qualitative approaches are juxtaposed. This book concentrates on features that are distinct characteristics of resilience, how they can be measured and in what sense they are different to vulnerability and risk parameters. Case studies in 11 countries either use a hypothetical pre-event estimation of resilience or are addressing a 'revealed resilience' evident and documented after an event. Such information can be helpful to identify benchmarks or margins of impact magnitudes and related recovery times, volumes and qualities of affected populations and infrastructure.*

*In the 90s, new languages and architectures were developed, new systems and networks were produced and new applications invented. The basic topics discussed are; High Speed Data Communications Protocols, Services and Networks for high speed data and for combined voice and data applications - i.e. ATM, SMDS, Frame Relay - Network Management, OSS Platforms, OSI and other information Technology Services, Network Control and Routing, Emergency Control and Telecommunication Politics. This publication offers the material basis for propagating the most advanced ideas, products, decisions and results of the 90s, and thereby it celebrates the advancements of Computer Communication on the route towards a new era.*

*In light of impending global climate and financial crises, it is imperative to analyze models for positive social change that are focused on building community resiliency and sustainability. This book explores the communication processes of the Transition Movement, a community-led global social movement, as it was adapted in a local context.*

*A taboo-shattering book, How Local Resilience Creates Sustainable Societies sets out how visionary national and local leaders can transform unsustainable societies as they attempt to recover from an age of austerity. By eliminating the culture of dependency in a socially and environmentally progressive way, the book shows how to transcend the political and social spectrum and even unify people around a common purpose. It does this by examining how leaders can make smarter interventions within complex systems to prevent the high cost of social and environmental failure arising from our current economic model. The book explores a number of contemporary themes (e.g. green economy, sustainable urban development, banking reform, equality and democratic renewal) and draws on a wealth of global case learning (e.g. Amsterdam, Brighton, Cape Town, Madison, Matara and Toyama).*

*This monograph provides valuable lessons in building disaster resilience for rural communities and beyond. With a*

focus on Florida, the authors present a comprehensive review of the current debates surrounding the study of resilience, from federal frameworks, state plans and local initiatives. They also review evaluation tools and feature first-hand accounts of county emergency managers as well as non-profit and community groups on key issues, including perspectives on vulnerable groups such as the elderly, children and farm workers. Readers will find insightful answers to such questions as: How can the concept of resilience be used as a framework to investigate the conditions that lead to stronger, more sustainable communities? What factors account for the variation across jurisdictions and geographic units in the ability to respond to and recover from a disaster? How does the recovery process impact the social, political and economic institutions of the stricken communities? How do communities, especially rural ones, collaborate with multiple stakeholders (local, regional, state, national) during the transition from recovery to resilience? Can the collaborative nature of disaster recovery help build resilient communities?. The primary audiences of this book are scholars in emergency and crisis management, planning and policy, disaster response and recovery, disaster sociology and environmental management and policy. This book can also be used as a textbook in graduate and advanced undergraduate programs / courses on disaster management, disaster studies, emergency and crisis management, environmental policy and management and public policy and administration.

This cutting-edge work critiques today's global mediascape through feminist perspectives, highlighting concerns of policy, power, labor, and technology. Starting with the state of international communications, a top-notch author group covers cases on online news, pornography, democracy, policies for women's development, violence against women, information workers, print media, 'telecentres,' media coverage of HIV/AIDS, and more. This essential book provides fresh feminist insights into international communication, showing the important strides taken toward women's justice in these areas and how far there is yet to go.

*This book scrutinizes the media portrayals of (ethnic/religious) minorities in Germany, encompassing the fields of public affairs, media effects, political communication, multiculturalism, populism in the media and politicized uses of collective identities. It compares the political discourse (Bundestag plenary protocols) with the mainstream discourse (mainstream press) in Germany over the sample period of 2009–2015, and explores a multi-layered debate from different perspectives by combining quantitative and qualitative methodologies. Moreover, this research intends to detect, analyze and connect the dots between recurrent themes, news stories, actors, events and ideologies within the delicate debate on minorities in Germany's multicultural society. The mixed-methods approach includes content analysis, template analysis, relational discourse analysis, latent class cluster analysis and multinomial logistic regression. The interdisciplinary approach of this research presents various aspects of social sciences, such as media and communication studies (agenda-setting theory), social psychology (social-identity theory), media sociology (discursive power), political science (right-wing populism) and anthropology (race and ethnicity). This extensive research is meant to contribute to existing political efforts and academic studies, in order to fully grasp the dynamics of German immigration and integration policies.*

*This book highlights the value of sustainability science in newly emerging and innovative approaches to research, education, capacity building and practice in order to transform rhetoric into impact sustainability. Presenting case studies from various industries, sectors and geographical contexts targeting the seventeen (Sustainable development Goals (SDGs) outlined in the 2030 Agenda, it*

*provides insightful recommendations to create sustainable impact while at the same time achieving the global goals. The book addresses the fundamental question of how sustainability rhetoric can be transformed into impact sustainability research, education and capacity building and as a result, how existing approaches in science, curricula and practice are mitigating the demands emerging from addressing global sustainable development in an impactful and innovative manner. Providing recommendations for impact sustainability in science, curriculum on how to address pressing sustainability issues and contribute toward achieving the SDGs, this book is an essential reference for both academics and professionals.*

*This is a seminal book for anyone who wants to understand, shape or study the communication surrounding sustainability in their interactions with colleagues, employees, supply chain partners and external stakeholders. It develops essential insights on the basis of an extensive review of relevant theories and research drawn from multiple disciplines. Interview data gathered from organization members who are currently communicating about sustainability in their cities, universities, nongovernmental organizations, small businesses and large for-profit organizations provide valuable insights from a practitioner's perspective. The interviewees represent organizations such as the Portland Trailblazers, Tyson Foods, the City and County of Denver and the Natural Resources Defense Council. Theory, research and interview comments combine in a reader-friendly way to provide practical insights and stimulate future research.*

*In the face of what seems like a concerted effort to destroy the only planet that can sustain us, critique is an important tool. It is in this vein that most scholars have approached environmental crisis. While there are numerous texts that chronicle contemporary issues in environmental ills, there are relatively few that explore the possibilities and practices which work to avoid collapse and build alternatives. The keyword of this book's full title, 'Perma/Culture,' alludes to and plays on 'permaculture', an international movement that can provide a framework for navigating the multiple 'other worlds' within a broader environmental ethic. This edited collection brings together essays from an international team of scholars, activists and*

**This book offers a concrete contribution towards a better understanding of climate change communication. It ultimately helps to catalyse the sort of cross-sectoral action needed to address the phenomenon of climate change and its many consequences. There is a perceived need to foster a better understanding of what climate change is, and to identify approaches, processes, methods and tools which may help to better communicate it. There is also a need for successful examples showing how communication can take place across society and stakeholders. Addressing the challenges in communicating to various audiences and providing a platform for reflections, it showcases lessons learnt from research, field projects and best practices in various settings in various different countries. The acquired knowledge can be adapted and applied to other situations.**

**This book constitutes the refereed proceedings of the First International Conference on Information and Communication Security, ICICS '97, held in Beijing, China in November 1997. The 37 revised full papers presented were selected from a total of 87 submissions. Also included are 11 short papers. The book is divided in sections on theoretical foundations of security, secret sharing, network security, authentication and identification, Boolean functions and stream ciphers, security evaluation, signatures, public key systems, cryptanalysis of public key systems, subliminal channels, key recovery, intellectual property protection, protocols, and electronic commerce.**

***Natural disasters in recent years have brought the study of disaster resiliency to the forefront. The importance of community preparedness and sustainability has been underscored by such calamities as Hurricane Katrina in 2005 and the Japanese tsunami in 2011. Natural disasters will inevitably continue to occur, but by understanding the concept of resiliency as well as the factors that lead to it, communities can minimize their vulnerabilities and increase their resilience. In this volume, editors Naim Kapucu, Christopher V. Hawkins, and Fernando I. Rivera gather an impressive array of scholars to provide a much needed re-think to the topic disaster resiliency. Previous research on the subject has mainly focused on case studies, but this book offers a more systematic and empirical assessment of resiliency, while at the same time delving into new areas of exploration, including vulnerabilities of mobile home parks, the importance of asset mapping, and the differences between rural and urban locations. Employing a variety of statistical techniques and applying these to disasters in the United States and worldwide, this book examines resiliency through comparative methods which examine public management and policy, community planning and development, and, on the individual level, the ways in which culture, socio-economic status, and social networks contribute to resiliency. The analyses drawn will lead to the development of strategies for community preparation, response, and recovery to natural disasters. Combining the concept of resiliency, the factors that most account for the resiliency of communities, and the various policies and government operations that can be developed to increase the sustainability of communities in face of disasters, the editors and contributors have assembled an essential resource to scholars in emergency planning, management, and policy, as well as upper-level students studying disaster management and policy. This handbook provides a single reference resource for***

**communication for development and social change. Increasingly, one considers communication to be crucial to effectively tackle the major problems of today. Hence, the question being addressed in this handbook is, is there a right communication strategy? Perspectives on sustainability, participation, and culture in communication have changed over time in line with the evolution of development approaches and trends, and in response to the need for effective applications of communication methods and tools to new issues and priorities. Divided into prominent themes comprising relevant chapters written by experts in the field and reviewed by renowned editors, the book addresses topics where communication and social change converge in both theory and praxis. Specific concerns and issues include food security, climate change, poverty reduction, health, equity and gender, sustainable development goals, and information and communication technologies (ICTs). The book shows how communication is essential at all levels of society. It helps readers understand the processes that underlie attitude change and decision-making and the work uses powerful models and methods to explain the processes that lead to sustainable development and social change. This is essential reading for academics and practitioners, students and policy makers alike.**

**Social Inequalities, Media, and Communication: Theory and Roots provides a global analysis of the intersection of social inequalities, media, and communication. This book contains chapter contributions written by scholars from around the world who engage in country- and region-specific case studies of social inequalities in media and communication. The volume is a theoretical exploration of the classical, structuralist, culturalist, postmodernist, and postcolonial theoretical approaches to inequality and how these theoretical discourses provide critical understanding of social inequalities in relation to narratives shaped by media and communication experiences. The contributors provide class and gender analyses of media and culture, engage theoretical discourses of inequalities and capitalism in relation to communication technologies, and explore the cyclical relationship of theory and praxis in studying inequalities, media, and communication.**

**Despite the Great Recession, slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today. Unbridled growth, trade liberalisation, and competition are advocated as the only or best ways of organizing the contemporary world. Unemployment, yawning gaps between rich and poor, political disengagement, and environmental devastation are too often seen as acceptable 'side effects' of the dominance of neo-liberalism. But the reality is that**

**capitalism has always been contested and that people have created many other ways of providing for themselves. This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists. Chapters on co-operatives, community currencies, the transition movement, scrounging, co-housing and much more paints a rich picture of the ways in which another world is not only possible, but already taking shape. The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities. Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means, and one that can be driven by the values of solidarity, freedom and responsibility. This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics, yet which offer more promising grounds for social and environmental justice. It is a valuable resource for students, activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields.**

November 2014. The 16 revised full papers presented together with 7 short papers were carefully reviewed and selected from numerous submissions. The covered topics cover multiple facets of cyber security that include: rationality of adversary, game-theoretic cryptographic techniques, vulnerability discovery and assessment, multi-goal security analysis, secure computation, economic-oriented security, and surveillance for security. Those aspects are covered in a multitude of domains that include networked systems, wireless communications, border patrol security, and control systems.

Introducing Language and Intercultural Communication is a lively and accessible introduction for undergraduates who are new to the area of intercultural communication.

Incorporating real-life examples from around the world and drawing on current research, this text argues against cultural stereotyping and instead provides students with a skill-building framework to enhance understanding of the complexities of language and intercultural communication in diverse international settings. Readers will learn to understand and become aware of power relations, positioning and the impact of social and political forces on language choice and the intercultural communication process. This is the essential text for undergraduate students studying courses in intercultural communication for the first time. Features include: clear learning objectives to structure your study end of chapter discussion questions to test your knowledge highlighted glossary terms to provide a strong understanding of the relevant vocabulary an array of photos including signs which make use of non-verbal codes and many examples that illustrate such issues as intercultural misunderstandings and the effects of culture shock substantial online resources for students including learning objectives, suggested readings, links to media resources and real-world intercultural scenarios and activities. Additional in-depth instructor resources feature test materials, powerpoints, key terms, extended chapter outlines and sample assignments and syllabi.

**Food nourishes the body, but our relationship with food extends far beyond our need for survival. Food choices not only express our personal tastes but also communicate a range of beliefs, values, affiliations and aspirations—sometimes to the exclusion of others. In the media sphere, the enormous amount of food-related advice provided by government agencies, advocacy groups, diet books, and so on compete with efforts on the part of the food industry to sell their product and to respond to a consumer-driven desire for convenience. As a result, the topic of food has grown fraught, engendering sometimes acrimonious debates about what we should eat, and why. By examining topics such as the values embedded in food marketing, the locavore movement, food tourism, dinner parties, food bank donations, the moral panic surrounding obesity, food crises, and fears about food safety, the contributors to this volume paint a rich, and sometimes unsettling portrait of how food is represented, regulated, and consumed in Canada. With chapters from leading scholars such as Ken Albala, Harvey Levenstein, Stephen Kline and Valerie Tarasuk, the volume also includes contributions from "food insiders"—bestselling cookbook author and food editor Elizabeth Baird and veteran restaurant reviewer John Gilchrist. The result is a timely and thought-provoking look at food as a system of communication through which Canadians articulate cultural identity, personal values, and social distinction. Contributors include Ken Albala, Elizabeth Baird, Jacqueline Botterill, Rebecca Carruthers Den Hoed, Catherine Carstairs, Nathalie Cooke, Pierre Desrochers, Josh Greenberg, Stephen Kline, Jordan Lebel, Harvey Levenstein, Wayne McCready, Irina Mihalache, Eric Pateman, Rod Phillips, Sheilagh Quaile, Melanie Rock, Paige Schell, and Valerie Tarasuk.**

**Featuring the winning entries from the Owl Canyon Press Short Story Hackathon No. 3, chosen from 1100+ entries received from 40 countries. New Perspectives in Global Environmental Disasters is a collection of articles that represent high levels of scholarship in emergent themes and key issues.
