The volume evaluates major developments in psychiatry in India from the 1950s, and highlights the areas where Indian psychiatry has contributed to the development of the subject worldwide. The chapters review international as well as Indian developments in psychiatry and its sub-specialities. A wide range of clinical, research and policy-related topics have been covered in the volume, which begins with an overview of the history of psychiatry in India, moving on to developments in various sub-specialities of psychiatry in the last 60 years or so. It then specifically discusses developments in psychology and psychodynamics, general adult and child psychiatry, substance use psychiatry, community psychiatry, liaison psychiatry, and other psychiatric sub-specialities. Developments in treatment, the status of training and service in psychiatry and legal issues related to the practice of psychiatry in India are also included. The contributors to this volume are nationally and internationally recognized experts in different areas of psychiatry. Most of them have had some association, or are currently associated, with the Department of Psychiatry at the Post Graduate Institute of Medical Education and Research, Chandigarh, India.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

One Part Woman

*This is the last book Hemingway wrote before he died, the story of Thomas Hudson, an artist and adventurer. Living a bachelor's life on an island in the Gulf Stream during the 30s, Hudson's existence is dictated by the waves and tides. But when his sons come to visit, Hudson must grapple with the role of father and the unfamiliar demands of family. A late work by one of America's greatest writers.*

*An illustrated architectural guide to Inverclyde and Renfrew which covers shipyards and docks at Renfrew, Port Glasgow and Greenock, Victorian grandeur in Paisley and suburban houses in Kilmacolm.*

*A guidebook to Scotland's West Highland Way, a 95-mile walk from Milngavie near Glasgow to Fort William, passing Loch Lomond, crossing Rannoch Moor and finishing in the shadow of Britain's highest mountain. The walk, which takes roughly one week to complete, is described in seven stages, with each stage ranging from 8 to 20 miles. The guide details the 'classic' south-north direction but also provides a summary description for those wanting to walk the route in the opposite direction. The guidebook, which features step-by-step route descriptions, 1:100K mapping, handy practical information*

*as well as notes on the region's history, culture and geography, is accompanied by a separate, pocket-sized 1:25K OS map booklet, providing all the mapping you need to walk the route. Passing from the lowlands to the highlands, the West Highland Way, which is one of Scotland's Great Trails, showcases the splendour of glens flanked by great mountains, majestic moorland and sprawling farmland. It is the perfect adventure for distance walkers keen to discover the wild beauty of western Scotland.*

A vibrant fable of marriage, caste and social convention from a major Indian writer Kali and Ponna are perfectly content in their marriage, aside from one thing, they are unable to conceive. As their childlessness begins to attract local gossip and family disapproval, they try everything from prayers to potions, but none of the offerings or rituals helps. Increasingly unhappy and desperate, they consider a more drastic plan: the annual chariot festival, a celebration of the half-male, half-female god Maadhorubaagan. For one night, the rules of marriage are relaxed, and consensual sex between unmarried men and women is overlooked, for all men are considered gods. But rather than bring them together, this scheme threatens to drive the couple apart. Selling over 100,000 copies in India, where it was published first in the original Tamil and then in this celebrated English translation, *One Part Woman* has become a cult phenomenon in the subcontinent, jump-starting conversations about caste and female empowerment. Tender, deeply poignant, and biting critical, *One Part Woman* is a powerful exploration of a loving marriage under strain. Perumal Murugan is an Indian author and professor of Tamil literature. He has written six novels and four collections each of short stories and poetry. His best-known novel *One Part Woman*, highly controversial in India, won the ILF Samanvay Basha Samman, and Aniruddhan Vasudevan's English rendering won the Translation Prize from India's National Academy of Letters.

Corporate Social Responsibility and Brand Value in Luxury

Clinical, Research and Policy Perspectives

Short Story Harvest

The Paradox of European Empire

50 Years of Healthcare in Singapore

The purpose of this Special Issue is to investigate topics related to sustainability issues in the new era, especially in Industry 4.0 or other new manufacturing environments. Under Industry 4.0, there have been great changes with respect to production processes, production planning and control, quality assurance, internal control, cost determination, and other management issues. Moreover, it is expected that Industry

4.0 can create positive sustainability impacts along the whole value chain. There are three pillars of sustainability, including environmental sustainability, economic sustainability, and social sustainability. This Special Issue collects 15 sustainability-related papers from various industries that use various methods or models, such as mathematical programming, activity-based costing (ABC), material flow cost accounting, fuel consumption model, artificial intelligence (AI)-based fusion model, multi-attribute decision model (MADM), and so on. These papers are related to carbon emissions, carbon tax, Industry 4.0, economic sustainability, corporate social responsibility (CSR), etc. The research objects come from China, Taiwan, Thailand, Oman, Cyprus, Germany, Austria, and Portugal. Although the research presented in this Special Issue is not exhaustive, this Special Issue provides abundant, significant research related to environmental, economic, and social sustainability. Nevertheless, there still are many research topics that require our attention to solve problems of sustainability.

**BOARD BOOK.** Pages feature bright illustrations of favourite tractors and trains, with simple text to listen to or read. Each book has an integral sound button for little fingers to press, so that children can hear sounds like the tractor's engine or the train's whistle. Encourage speaking skills, help to develop hand-eye coordination and build early vocabulary.

This book provides a concise overview of several critically important techniques and their applications within Laparoscopic Common Bile Duct Exploration (LCBDE). LCBDE is rapidly emerging as the preferential management option for treating patients with common bile duct (CBD) stones. Chapters within this book describe how this technique can be applied to manage patients with concomitant gallstones, which aims to increase the exploration of the CBD via the transcystic route. Particular mention is made for the use of energy devices to enable stone fragmentation within the bile duct also known as Lithotripsy-Assisted Bile duct Exploration by Laparoendoscopy (LABEL). Guidance is also provided on how to set-up an acute biliary service which can offer the single-stage management of concomitant gallstones and choledocholithiasis. The concepts of 'Leveraging Access to Technology and Enhanced Surgical Techniques (LATEST)' in LCBDE and 'Biliary Surgery 2.0' as the framework through which these techniques can be further enhanced are analysed. Laparoscopic Common Bile Duct Exploration features insight into how to perform these increasingly important procedures successfully and set-up a service within institutions that are yet to provide it. Therefore, it is a valuable resource for all medical professionals involved in the care of these patients.

Liberalism and Transformation

Diamond T980/981

Odd Evening

Doctoral Thesis / Dissertation from the year 2017 in the subject Business economics - Business Management, Corporate Governance, grade: NA, University of Glasgow (Adam Smith Business School), language: English, abstract: Within luxury, an area that is becoming increasingly important due to the visibility of this industry is Corporate Social Responsibility (CSR). While consumers are still not actively demanding CSR in luxury products and services, and there is evidence that CSR is not a key area of interest for the luxury industry; the luxury industry is becoming the target of non-governmental organizations (NGOs) and other stakeholders interested in environmental and ethical practices. Thus, it is essential that luxury companies explore CSR implementation, as neglecting to do so, is likely to affect their brands and their brand value. Due to the increasing relevance of CSR within luxury, this research explores the role of CSR within luxury and how it, together with other factors, contributes to brand value in luxury. An additional consideration is that despite the importance of brand value in luxury, the industry does not normally measure, manage and leverage brand value. As a result, it is also necessary to examine how brand value is perceived within

luxury. To meet these research goals, a mixed methods approach was selected. More specifically, a theoretical framework was built with input from the literature and interviews with key interviewees from the luxury industry. Then, the theoretical framework was tested quantitatively. The quantitative analysis was conducted with a dataset based on consumer panels, and additional secondary data including Bloomberg, CSRHub, Dow Jones Sustainability Index (DJSI), Interbrand, and company reports. The results were subject to ‘credibility checks’ with interviewees from the industry. It is noteworthy to highlight that for the statistical analysis, one of the largest datasets with US consumer data was used. Similarly, for the qualitative interviews, representatives from some of the largest luxury companies in the world in terms of brand value, and luxury stakeholders were recruited.

A collection of short stories designed for younger secondary students\_

This book provides a sustained engagement with contemporary Indian feature films from outside the mainstream, including Aaranaya Kaandam, I.D., Kaul, Chauthi Koot, Cosmic Sex, and Gaali Beeja, to undercut the dominance of Bollywood focused film studies. Gopalan assembles films from Bangalore, Chennai, Delhi, Kolkata, and Trivandrum, in addition to independent productions in Bombay cinema, as a way of privileging understudied works that deserve critical attention. The book uses close readings of films and a deep investigation of film style to draw attention to the advent of digital technologies while remaining fully cognizant of ‘the digital’ as a cryptic formulation for considering the sea change in the global circulation of film and finance. This dual focus on both the techno-material conditions of Indian cinema and the film narrative offers a fulsome picture of changing narratives and shifting genres and styles.

Three futures hang on a single assassins bullet, two lead to extinction and only one man can decide which.

Liberalism and Transformation is the first scholarly work that explores the historical, philosophical, and intellectual development of global liberalism since the nineteenth century in the context of the deployment of violence, force, and intervention. Using an approach that includes interpretive and contextual analysis of texts from writers, philosophers, and policy-makers across nearly two centuries, as well as historiographical and historical analysis of archival documents (some of which have been recently declassified) and other media, Liberalism and Transformation narrates the messy history of emancipatory liberalism and its engagement with issues of war and peace. The book contributes to both a rethinking of liberal democracy and its relationship to world politics, as well as the effects of liberal internationalism on global processes. Furthermore, Liberalism and Transformation invites readers to reflect on global ethics and transformation in world politics. In the first place, it shows how ethical imaginings of the world have direct effects on actions of transformative importance. In the second place, it suggests that discourses are fluid, changing, and complex.

Cahiers Parisiens/Parisian Notebooks publish selected papers drawn from the various advanced-level activities at the University of Chicago Center in Paris. In Volume Seven, scholars from across the continent consider Europe as a discourse made of the sediments of historical experience and utopian ideas. Attached to a geographical region with constantly shifting boundaries, the group considers EUtROPEs as the cultural codes that endow Europe with the many meanings that it has held for different actors at different times. Twenty historians, linguists, cultural scientists, musicologists, and scholars of philosophy, urban studies, and film studies who came together at the University of Chicago's Center in Paris discuss these tropes in different fields and consider whether the present can continue to bear the weight of the many ideas and legacies of Europe.

Andy, Dag and Claire have been handed a society beyond their means. Twentysomethings, brought up with divorce, Watergate and Three Mile Island, and scarred by the 80s fallout of yuppies, recession, crack and Ronald Reagan, they represent the new generation- Generation X. Fiercely suspicious of being lumped together as an advertiser's target market, they have dreary careers and cut themselves adrift in the California desert. Unsure of their futures, they immerse themselves in a regime of heavy drinking and working in no future McJobs in the service industry. Underemployed, overeducated and intensely private and unpredicable, they have nowhere to direct their anger, no one to assuage their fears, and no culture to replace their anomie. So they tell stories: disturbingly funny tales that reveal their barricaded inner world. A world populated with dead TV shows, 'Elvis moments' and semi-disposable Swedish furniture.

This volume contains select papers presented during the Functional Textiles and Clothing Conference 2020 held at Indian Institute of Technology Delhi. The volume covers recent developments, challenges and opportunities in the field of functional and protective clothing; functional printing and finishing; sustainable production and supply chain; and testing and characterisation. This volume will be of interest to researchers, professional engineers, entrepreneurs, and market stakeholders interested in functional textiles and clothing. Investigation on biobased nanomaterials has provided new insights into the rapidly advancing fields of the biomedical and environmental sciences by showing how these nanomaterials are effective in biomedicine and environmental remediation. These particles hold tremendous prospective applications, and are likely to become the next generation of particles in these areas. As such, research is ongoing

## Where To Download Contact Us Mgm Muthu Hotels

and the data generated should have the potential for a sustainable future in both the environmental and biomedical fields. This book presents important findings on the role of and identification of novel applications of biobased nanomaterials. Unlike other books in this field, this book focuses entirely on sustainable application and remediation in biomedicine and environmental science. The chapters are written in such a way as to make them accessible to the reader, and furthermore, the volume can be readily adopted as a reference, or used as a guide for further research. This project was based on recent research (the last 5 years) and developed through an extensive literature search. The editors have also compiled some advanced, outstanding texts that should be of benefit to graduate students in their research.

Biobased Nanotechnology for Green Applications

*In Unsustainable Empire Dean Itsuji Saranillio offers a bold challenge to conventional understandings of Hawai'i's admission as a U.S. state. Hawai'i statehood is popularly remembered as a civil rights victory against racist claims that Hawai'i was undeserving of statehood because it was a largely non-white territory. Yet Native Hawaiian opposition to statehood has been all but forgotten.*

*Saranillio tracks these disparate stories by marshaling a variety of unexpected genres and archives: exhibits at world's fairs, political cartoons, propaganda films, a multimillion-dollar hoax on Hawai'i's tourism industry, water struggles, and stories of hauntings, among others. Saranillio shows that statehood was neither the expansion of U.S. democracy nor a strong nation swallowing a weak and feeble island nation, but the result of a U.S. nation whose economy was unsustainable without enacting a more aggressive policy of imperialism. With clarity and persuasive force about historically and ethically complex issues, Unsustainable Empire provides a more complicated understanding of Hawai'i's admission as the fiftieth state and why Native Hawaiian place-based alternatives to U.S. empire are urgently needed.*

*Happiness is a state of mind'- this is the central theme of Patanjali's Yogasutras which seek to enhance the life of man. A fascinating study of the mind, it can be regarded as the psychology of the East for the way it unravels the mystery of the human psyche, understands its working and enhances it.*
