A FINALIST FOR THE PULITZER PRIZE NAMED A BEST BOOK OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW, SMITHSONIAN, AND WALL STREET JOURNAL A major reimagining of how evolutionary forces work, revealing how mating preferences—what Darwin termed "the taste for the beautiful"—create the extraordinary range of ornament in the animal world. In the great halls of science, dogma holds that Darwin's theory of natural selection explains every branch on the tree of life: which species thrive, which wither away to extinction, and what features each evolves. But can adaptation by natural selection really account for everything we see in nature? Yale University ornithologist Richard Prum—reviving Darwin's own views—thinks not. Deep in tropical jungles around the world are birds with a dizzying array of appearances and mating displays: Club-winged Manakins who sing with their wings, Great Argus Pheasants who dazzle prospective mates with a four-foot-wide cone of feathers covered in golden 3D spheres, Red-capped Manakins who moonwalk. In thirty years of fieldwork, Prum has seen numerous display traits that seem disconnected from, if not outright contrary to, selection for individual survival. To explain this, he dusts off Darwin's long-neglected theory of sexual selection in which the act of choosing a mate for purely aesthetic reasons—for the mere pleasure of it—is an independent engine of evolutionary change. Mate choice can drive ornamental traits from the constraints of adaptive evolution, allowing them to grow ever more elaborate. It also sets the stakes for sexual conflict, in which the sexual autonomy of the female evolves in response to male sexual control. Most crucially, this framework provides important insights into the evolution of human sexuality, particularly the ways in which female preferences have changed male bodies, and even maleness itself, through evolutionary time. *The Evolution of Beauty* presents a unique scientific vision for how nature's splendor contributes to a more complete understanding of evolution and of ourselves.

Should western beauty practices, ranging from lipstick to labiaplasty, be included within the United Nations understandings of harmful traditional/cultural practices? By examining the role of common beauty practices in damaging the health of women, creating sexual difference, and enforcing female deference, this book argues that they should. In the 1970s feminists criticized pervasive beauty regimes such as dieting and depilation, but some 'new' feminists argue that beauty practices are no longer oppressive now that women can 'choose' them. However, in the last two decades the brutality of western beauty practices seems to have become much more severe, requiring the breaking of skin, spilling of blood and rearrangement or amputation of body parts. *Beauty and Misogyny* seeks to make sense of why beauty practices are not only just as persistent, but in many ways more extreme. It examines the pervasive use of makeup, the misogyny of fashion and high-heeled shoes, and looks at the role of pornography in the creation of increasingly popular beauty practices such as breast implants, genital waxing and surgical alteration of the labia. It looks at the cosmetic surgery and body piercing/cutting industries as being forms of self-mutilation by proxy, in which the surgeons and piercers serve as proxies to harm women's bodies, and concludes by considering how a culture of resistance to these practices can be created. This essential work will appeal to students and teachers of feminist psychology, gender studies, cultural studies, and feminist sociology at both undergraduate and postgraduate levels, and to anyone with an interest in feminism, women and beauty, and women's health.

The International Conference on Informatics and Management Science (IMS) 2012 will be held on November 16-19, 2012, in Chongqing, China, which is organized by Chongqing Normal University, Chongqing University, Shanghai Jiao Tong University, Nanyang Technological University, University of Michigan, Chongqing University of Arts and Sciences, and sponsored by National Natural Science Foundation of China (NSFC). The objective of IMS 2012 is to facilitate an exchange of information on best practices for the latest research advances in a range of areas. Informatics and Management Science contains over 600 contributions to suggest and inspire solutions and methods drawing from multiple disciplines including: Computer Science Communications and Electrical Engineering Management Science Service Science Business Intelligence

An Associations Unlimited Reference : a Guide to More Than 22,000 National and International Organizations ...

Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December)

This book examines, through case studies of elementary and secondary schools, how five schools have developed "a performance-based assessments of students' learning, and how this work has interacted with and influenced the teaching and learning experiences students encounter in school. This important and timely book reveals the changing dynamics of life as it moves from more traditional pedagogy to one that asks students to master intellectual and practical skills eminently transferable to "real-life" social settings and workplaces. "The issue of assessment comes first, but we see the following case studies how it becomes powerfully enveloped in the processes of learning and teaching, of informing teachers, parents, and others of 'how the children are doing.' The portraits explicitly and implicitly suggest a deep, defensible way to answer the question 'How'm I doing?' in a manner that helps this child and eventually every child."

the Foreword by Theodore R.Sizer "Informative and thought provoking." —American Journal of Education

A guide to more than 22,000 national and international organizations, including: trade, business, and commercial; environmental; and agricultural; legal, governmental, public administration, and military; engineering, technological, and natural and social sciences; educational; cultural; social welfare; health and medical; public affairs; fraternal, nationality, and ethnic; religious; veterans', hereditary, and patriotic; hobby and avocational; athletic and sports; labor unions, associations, and federal chambers of commerce and trade and tourism; Greek letter and related organizations; and fan clubs.

The bestselling classic that redefined our view of the relationship between beauty and female identity . Every day, women around the world are confronted with a dilemma – how to look. In a society embroiled in a cult of female beauty and youthfulness, pressure on women to conform physically is constant and all-pervading. In this iconic, gripping and frank expos é , Naomi Wolf exposes the tyranny of the beauty myth through the ages and its oppressive function today, in the home and at work, in literature and the media, in relationships between men and women, between women and women. With pertinent and intelligent examples, she confronts the beauty industry and its advertising and uncovers the reasons why women are consumed by this destructive obsession. ' Essential reading ' Guardian ' A smart, angry, insightful book, and a clarion call to freedom. Every woman should read it ' Gloria Steinem

Profiles 179 professional and vocational occupations, providing sources of help-wanted ads, placement and job referral services, employer directories and networking lists, handbooks and manuals, employment agencies and search firms, and appropriate associations and organizations.

Revised and updated critical survey of the field of cosmetics and adornment studiesThis revised edition examines how the plays of Shakespeare and his contemporaries dramatise the Renaissance preoccupation with cosmetics. Farah Karim-Cooper explores the then-contentious issue of female beauty and identifies a 'culture of cosmetics', which finds its visual identity on the early modern stage. She also examines cosmetic recipes and anti-cosmetic literature focusing on their relationship to drama in its representations of gender, race, politics and beauty.Key FeaturesOffers a new analysis of the construction of whiteness as a racial signifierProvides an original insight into women's cosmetic practice through an exploration of ingredients, methods and materials used to create cosmetics and the perception of make up in Shakespeare's timeIncludes numerous cosmetic recipes from the early modern period found in printed books and never published in a modern edition

Nutritional cosmetics is an emerging area of intense research and marketing and encompasses the concept that orally consumed dietary products can support healthier and more beautiful skin. There are numerous dietary ingredients now being marketed for their potential skin health and beauty benefits and many of these are supported by growing scientific evidence. The purpose of this book is to compile the scientific evidence showing the potential benefits of some of the more extensively researched ingredients. As far as possible, information about the benefits of ingredients consumed orally for skin health is presented. The information contained in this book will help provide insights into an emerging research area and provide scientific background for the potential clinical effectiveness for some of the better researched nutricosmetic ingredients. ABOUT THE EDITORS Aaron Tabor, M.D. is the CEO of Physicians Pharmaceuticals and author of The Revival Slim & Beautiful Diet. A graduate of the Johns Hopkins School of Medicine, Dr. Tabor oversees all clinical research on the Revival Slim & Beautiful Diet plan, conducting randomized, double-blinded, placebo-controlled studies at leading hospitals in the U.S. Areas of note include weight loss, skin/hair/nail appearance, energy, menopause, PMS, cholesterol, memory, and diabetic health. He is also responsible for directing new Revival product development based on clinical research results. Robert M. Blair, Ph.D. is the Research Manager for Physicians Pharmaceuticals, Inc. and manages the daily activities of the Research and Nutrition departments. Dr. Blair received his Ph.D. from Oklahoma State University in the field of Reproductive Physiology. Before joining Physicians Pharmaceuticals, Inc., he worked as an Assistant Professor of Comparative Medicine at the Wake Forest University School of Medicine where he examined the effects of dietary soy on cardiovascular health and cognitive function. Reviews the most-popular and most-researched nutricosmetic ingredients Presents information specifically about the benefits of ingredients consumed orally for skin health Considers the benefits of whey protein, rosemary, soy – and green tea and milk thistle, specifically, for protection against sun damage and photocarcinogenesis Provides information on antioxidants, incl: potential benefits of botanical antioxidants; carotenoids; coenzyme Q10; healthy fruits; olive fruit; and natural enzymes

How looking beautiful has become a moral imperative in today's world The demand to be beautiful is increasingly important in today's visual and virtual culture. Rightly or wrongly, being perfect has become an ethical ideal to live by, and according to which we judge ourselves a success or failure. Perfect Me explores the changing nature of the beauty ideal, showing how it is more dominant, demanding, and global than ever before. Arguing that our perception of the self is changing, Heather Widdows shows that more and more, we locate the self in the body. Nobody is firm enough, thin enough, smooth enough,

or buff enough—not without significant effort and cosmetic intervention. To understand these rising demands, we need to recognize their ethical aspect and seek out new communal responses.

COSMETOLOGISTS ARE TRAINED TO MAINTAIN and care for hair, skin, and nails. Most are hair stylists, estheticians, nail technicians, or makeup artists. This is a very broad industry that offers numerous opportunities to specialize in very specific kinds of work. For example, a trained hair stylist might work only with wigs and hairpieces, or a makeup artist might work in live theater or for a local TV station. Most specializations are based on personal preference and experience, but some such as microderm abrasion or master coloring, require advanced training. There are more than 600,000 of these professionals working in the US. That number is expected to rise faster than the average for the foreseeable future. The demand for licensed cosmetologists is greatest in hair salons and barber shops, nail salons, and day spas. There are also many jobs being created in resort hotels and department stores, on cruise ships and film and television sets, and backstage at fashion shows and magazine photo shoots. There are even traveling cosmetologists who bring their services to people in their own homes, assisted living facilities, hospitals, or small towns that do not have a salon. If you are creative, good with people, and willing to keep learning more about your craft, this could be the right career choice for you. Cosmetology is a rock-solid profession that thrives even through economic downturns. Women and men always want to feel good about the way they look - almost more than anything else.

The Scholarship Book

One of the most important activities of enterprises today is responsible entrepreneurship. Corporate social responsibility (CSR) activities can help to forge a stronger bond between employees and corporations, can boost morale, and can help both employees and employers feel more connected with the world around them. Moreover, the growing importance of this concept results from the fact that it is perceived as an effective tool for increasing competitiveness, improving the image of the company, or contributing to the generation of higher profits. In today's world, an active commitment to social responsibility is becoming more common for a company. CSR and Socially Responsible Investing Strategies in Transitioning and Emerging Economies is an essential reference source that identifies the scale and scope of implementation of CSR and socially responsible investing strategies and standards in companies operating in different transitioning and emerging economies as well as assessing the global effects of these activities. Featuring research on topics such as economic growth, responsible investing, and business ethics, this book is ideally designed for managers, executives, directors, corporate professionals, government officials, industry leaders, academicians, students, and researchers in the fields of international economics, international business, marketing, finance management, and public relations.

Hair is the subject of this book, including the anatomy of the hair follicle, developmental stages, analyzed by light and electron microscopy, hair ultrastructure, nerve and blood supply, specialized hairs and hair organs, and a review of the present techniques to cultivate hair follicle cells in vitro. In the clinical part several chapters describe the most important diseases and possibilities for treatment. Hair care products and their toxicology are the subject of further sections. Extensive reviews of the antiandrogens, a most important group of drugs influencing hair growth, and of their clinical use in conditions such as androgenetic alopecias and hirsutism are included as well. Finally, surgical techniques for hair transplantation are discussed. This book is a standard textbook for everything pertaining to hair under normal and pathological conditions.

Welcome to this 'novice's guide'. At last a book that explains the real science behind the cosmetics we use. Taking a gentle approach and a guided journey through the different product types, we discover that they are not as superficial as often thought and learn that there is some amazing science behind them. We shall uncover some of the truths behind the myths and point out some interesting facts on our way. Did you know? Vitamin E is the world's most used cosmetic active ingredient. At just 1mm thick, your amazing skin keeps out just about everything it's exposed to - including your products! A 'chemical soup' of amino acids, urea, mineral salts and organic acids act as 'water magnets' in the skin keeping it naturally moisturised. Discovered centuries ago, iron oxides (yes, the same chemicals as rust) are still commonly used inorganic pigments in foundations. A lipstick is a fine balance of waxes, oils and colourants to keep the stick stable and leave an even gloss on your lips.

You are holding in your hands the greatest soul-stirring, heart-touching, mind-blowing book of all time for any woman who is seeking to be her highest and best self in a man's world. This book will teach you how to be rich on your way to becoming wealthy and addresses the unique psychological needs and barriers that women face on their journey to success such as beauty, love, friendships, pregnancy, motherhood, sex and self-discovery. You will quickly discover how to: Find your divine purpose Juggle work, school and children on your journey to success Decide the best time to have sex with a man and how the timing affects your self-esteem Channel the energy of your menstrual cycle to be productive Appreciate your own unique beauty Understand the gifts of adversity and much more!

This book addresses the application of nanotechnology to cosmetics. Edited by three respected experts in the field, the book begins with a general overview of the science behind cosmetics and skin care today, and of the status quo of nanotechnology in cosmetics. Subsequent chapters provide detailed information on the different nanoparticles currently used in cosmetics; the production and characterization of nanoparticles and nanocosmetics; and regulatory, safety and commercialization aspects. Given its scope, the book offers an indispensable guide for scientists in academia and industry, technicians and students, as well as a useful resource for decision-makers in the field and consumer organizations.
