Lighten Up Your Woodworking Lamps are the perfect accent for many woodworking projects, so why not make the lamp as well? Choosing the right lamps for your home can be tough—just finding ones you like takes some doing, and they can be quite expensive. Why go through all that, when you can make your own? Crafting Wooden Lamps has plans for 24 great lamps and lighting projects that most woodworkers can complete in a weekend. The designs range from traditional to contemporary, and laidback to funky. A chapter on wiring shows exactly how to use easily-available lamp parts to hook things up safely.

The first encounters between the Islamic world and Tibet took place in the course of the expansion of the Abbasid Empire in the eighth century. The significance of these interactions has been long ignored in scholarship. These papers explore for the first time the multi-layered contacts between the Islamic world, Central Asia and the Himalayas from the eighth century until the present day in a variety of fields including art history, history of science, literature, archaeology, and anthropology.
