Since after the Second World War, the crime of aggression is - along with genocide, crimes against humanity and war crimes - a "core crime" under international law. However, despite a formal recognition of aggression as a matter of international criminal law and the reinforcement of the international legal regulation of the use of force by States, numerous international armed conflicts occurred but no one was ever prosecuted for aggression since 1949. This book comprehensively analyses the historical development of the criminalisation of aggression, scrutinises in a detailed manner the relevant jurisprudence of the Nuremberg and Tokyo Tribunals as well as of the Nuremberg follow-up trials, and makes proposals for a more successful prosecution for aggression in the future. In identifying customary international law on the subject, the volume draws upon a wealth of applicable sources of national criminal law and puts forward a useful classification of States ? legislative approaches towards the criminalisation of aggression at the national level. It also offers a detailed analysis of the current international legal regulation of the use of force and of the Rome Statute ?s substantive and procedural provisions pertaining to the exercise of the International Criminal Court ?s jurisdiction with respect to the crime of aggression, after 1 January 2017.

But, as numbers of "clients" increase, studies indicate that this model is ineffectual. The time has come to significantly rethink the approaches to community supervision. This book addresses the specific ways of achieving these goals by presenting six case studies of probation programs that represent a practical side of the community justice ideal. What emerges is a provocative and enlightening new approach to the problems of probation and parole.

The Practice of Research in Criminology and Criminal Justice

America's criminal codes are so voluminous that they now bewilder not only the average citizen but also the average lawyer. Our courthouses are so clogged that there is no longer adequate time for trials. And our penitentiaries are overflowing with prisoners. In fact, America now has the highest per capita prison population in the world. This situation has many people wondering whether the American criminal justice system has become dysfunctional. A generation ago Harvard Law Professor Henry Hart Jr. published his classic article, "The Aims of the Criminal Law," which set forth certain fundamental principles concerning criminal justice. In this book, leading scholars, lawyers, and judges critically examine Hart's ideas, current legal trends, and whether the "first principles" of American criminal law are falling by the wayside. Policymakers, academics, and citizens alike will enjoy this lively discussion on the nature of crime and punishment, and how the choices we make in formulating criminal laws can impact liberty, security, and justice.
