Cyber warfare currently refers to cyber-attacks by one country or state against another. However, it can also be an attack by hackers or terrorists aimed at furthering the mission of the individual nation. Government spy agencies are using cyber hacking to view and steal secret data about government intentions.

Cyberwarfare is the use of technology to attack a nation, causing comparable harm to actual warfare. There is significant debate among experts regarding the definition of cyberwarfare, and even if such a thing exists. One view is that the term 'cyberwarfare' is a misnomer, since no offensive cyber actions to date could be described as 'war'.
