Building Communication & Intimacy

Age is a complex cross-cutting notion for at least two reasons: the intricate interweaving of its biological and socio-cultural meanings and its dual significance as both a benchmark in an individual's life course and a foundation for social structure. This book offers new perspectives on age and ageing by combining achievements in the biological sciences and their different applications and interpretations in demography, anthropology, psychology and other pertinent disciplines. Thirty contributors from these various fields revisit the measures and the biological models of ageing, the borderline between normal and pathological ageing, the pertinence of chronological age as a benchmark along the life course, its interrelations with psychological development, with reproductive phases and other life events, the «normalizing» role ascribed by age classes and the risk of falling into ageism, the cross-cultural diversity and temporal changes of its meanings, the gender divide (real and perceived), as well as the rights that should be enjoyed at each age.

"The Other Crowd," "The Good People," "The Wee Folk," and "Them" are a few of the names given to the fairies by the people of Ireland. Honored for their gifts and feared for their wrath, the fairies remind us to respect the world we live in and the forces we cannot see. In these tales of fairy forts, fairy trees, ancient histories, and modern true-life encounters with The Other Crowd, Eddie Lenihan opens our eyes to this invisible world with the passion and bluntness of a seanchai, a true Irish storyteller.
