Distributed Renewable Energies for Off-Grid Communities ...

Renewable energy has the potential to bring power to these many communities and individuals who function off the grid. This book describes the latest advances in distributed and off-grid renewable energy technologies and offers strategies and guidelines for planning and implementation of sustainable, decentralized energy supply.

Distributed Renewable Energies for Off-Grid Communities ...

Distributed renewables for energy access (DREA) systems are renewable-based systems (stand-alone and off-grid systems as well as micro- or mini-grids) that can generate and distribute energy independently of a centralised electricity grid. DREA systems provide a wide range of services – including lighting, electricity for appliances, cooking, heating and cooling – in both urban and rural areas of the developing world.
