### Document Control Procedures

Today's document management systems need to be able to process digital business content, including workflows (according to Gartner's Magic Quadrant). A document management system gives you the ability to automate manual processes and workflows. Automating manual processes is simple. You just need to set the system up the right way.

### How Does a Document Management System Work?

The document management system optimizes the business process and mitigates users' time and effort. Businesses need to make sure that automation efforts focus on strategies that are most beneficial to the organization's success. Companies must check that these procedures are in line with the objectives of the document management system.
