Studies of African-derived religious traditions have generally focused on their retention of African elements. This emphasis, says Dianne Stewart, slights the ways in which

communities in the African diaspora have created and formed new religious meaning. In this fieldwork-based study Stewart shows that African people have been agents of their own religious, ritual, and theological formation. She examines the African-derived and African-centered traditions in historical and contemporary Jamaica: Myal, Obeah, Native Baptist, Revival/Zion, Kumina, and Rastafari, and draws on them to forge a new womanist liberation theology for the Caribbean.

*According to author John Green, *The Fault In Our Stars* was inspired by his friendship with Esther Earl, who "redefined the process of dying young for me." (December 2012 Good Reads interview, http://www.goodreads.com/interviews/show/828.John_Green). He cautions his readers not to take the novel too literally however, stating that he doesn't "want people conflating Esther with Hazel (they're very different), and it's extremely important to me that I not claim to be telling Esther's story. Esther's story belongs to Esther and to her family." (John Green's tumblr, August 2, 2012 <http://fishingboatproceeds.tumblr.com/post/28557373623/everybody-was-told-to-make-a-funny-face-but-i>). Esther's story is told in the 2014 posthumous memoir *This Star Won't Go Out : the Life and Words of Esther Grace Earl*.*

Margaret loves her parents and hanging out with her best friend, Maizon. Then it happens, like a one-two punch, during the summer she turns eleven: first, Margaret's father dies of a heart attack, and then Maizon is accepted at an expensive boarding school, far away from the city they call home. For the first time in her life, Margaret has to turn to someone who isn't Maizon, who doesn't know her heart and her dreams. . . . "Ms. Woodson writes with a sure understanding of the thoughts of young people, offering a poetic, eloquent narrative that is not simply a story of nearly adolescent children, but a mature exploration of grown-up issues: death, racism, independence, the nurturing of the gifted black child and, most important, self-discovery." (The New York Times)

This edited collection contains 34 papers originally presented at the Generative Approaches to Language Acquisition (GALA) conference in 2013, held in Oldenburg, Germany. It represents theoretically guided, high quality work, and provides impressive insights into state-of-the-art research in the fields of first and second language acquisition and developmental impairments. The studies brought together here cover a wide variety of different (mainly European) languages, focusing on the areas of phonology, morpho-syntax, semantics, pragmatics, and their interfaces. Since their first publication, the proceedings of GALA have become an invaluable reference for cutting-edge research in First and Second Language Acquisition and its impairments - and this volume continues that tradition. Sometimes life is like a bad waiter - it serves you exactly what you don't want. The women of Freesia Court have come together at life's table, fully convinced that there is nothing that good coffee, delectable desserts and a strong shoulder can't fix. Laughter is the glue that holds them together - the foundation of a book group they call AHEB (Angry Housewives Eating Bon Bons) - an unofficial club that becomes a lifeline. The five women each have a story to tell. There's Faith, the newcomer, a housewife and mother who harbours a terrible secret; big, beautiful Audrey, the resident sex queen who knows that with good posture and attitude you can get away with anything; Merit, the shy doctor's wife with the face of an angel and the private hell of an abusive husband; Kari, a wise woman with a wonderful

laugh who knows that the greatest gifts appear after life's fiercest storms; and finally, Slip, activist and adventurer, a tiny spitfire who looks trouble straight in the eye and challenges it to arm wrestle. Holding on through forty eventful years - through the swinging Sixties, the turbulent Seventies, the anything-goes Eighties, the nothing's-impossible Nineties, to the present day - they take the plunge into the chaos that inevitably comes to those with the temerity to stay alive and kicking.

Fans of *First Day Jitters* will love spending the last day of school in Mrs. Hartwell classroom. What do teachers do for summer vacation? Mrs. Hartwell's students worry that their teacher will miss them while they are gone for the summer. The class comes up with a way to make sure Mrs. Hartwell won't be too sad. But Mrs. Hartwell and the other teachers have some plans of their own. Once again Julie Danneberg and Judy Love bring to life the crazy antics of Mrs. Hartwell and her class and show that teachers and students are more alike than we sometimes think.

E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Nine, easy-to-understand principles with clear applications for the classroom. How an understanding of the brain's workings can help teachers hone their teaching skills. Willingham's answers apply just as well outside the classroom. Corporate trainers, managers, and, not least, parents - anyone who cares about how we learn - should find his book valuable reading." —Wall Street Journal

A pioneer of artificial intelligence shows how the study of causality revolutionized science in the world 'Correlation does not imply causation.' This mantra was invoked by scientists for decades in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer and carbon dioxide and global warming. But today, that taboo is broken by a causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that we live in and worlds that could have been. It is the essence of human and artificial intelligence. And Pearl's discoveries have enabled machines to think better, The Book of Why explains how we can think better.

Two introductory chapters are followed by five chapters that each cover a different genre: Chapter 3, Informational Books; Chapter 4, Fiction; Chapter 5, Biography, Autobiography, and Memoir; Chapter 6, Poetry; and Chapter 7, How-to and Hands-on Books. Each genre chapter consists of four parts: Part 1: Discusses the genre and how content area teachers can use books within that genre to further content learning and enhance literacy skills. An account of the Great Chicago Fire combines archival photographs and drawings with personal accounts by its survivors and historical documents. This present book explores recent advances in modeling discourse processes, in particular, new approaches aimed at understanding pathological language behavior specific to schizophrenia. The contributors examine the modeling paradigm of formal semantics, which falls within the scope of both linguistics and logic while providing overlapping links with other fields such as philosophy of language and cognitive psychology. This book is based on results presented during the series of workshops on (In)Coherence and Discourse organized by SLAM (Schizophrenia and Language: Analysis and Modeling), a project developed to systemize the study of pathological language processing by taking an overarching interdisciplinary approach combining psychology, linguistics, computer science and philosophy. The principle focus is on conversations

produced by people with psychiatric disorders such as schizophrenia and autism. The contributions come from young and experienced researchers, and invited speakers. The book appeals to likeminded students and researchers.
