"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future

generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." Pressure on water resources and water management in cities therefore provide major challenges.

Despite the importance of the issues, there has been little systematic coverage of the topic in book form. This work fills a gap in the literature by providing both thematic overviews and case study chapters. It reviews key aspects of why water matters in cities and presents case studies on topics such as groundwater management, green growth and water services, inequalities in water supply, the

financing of water services and flood management. Detailed examples are described from Argentina, Brazil, Colombia, Ecuador, Mexico and Peru, and there is also a chapter comparing lessons which might be learnt from US cities. Contributing authors are drawn from both within and outside the region, including from the Inter-American Development Bank, OECD and World Bank to set the issues in a global context. By means of the analysis of more than 20 national jurisdictions of different legal and geographical origin this book provides a general understanding of the developments that civil and commercial mediation is currently undertaking across the world. The book combines 25 national reports with a General

Report analyzing the major trends in civil and commercial mediation worldwide. A number of the key variables that make mediation so effective are studied in depth in the book. The concept of mediation, that varies from country to country. Its legal framework and the branches of public and private law in which it is used. The legal condition of the mediation agreement and its relevant conditions of form and content, the responsibilities of the parties in the event that they violate this agreement and the effects of this agreement on potential recourse to the courts or to arbitration, as well as with regard to pending cases. As well as the role played by the mediator, his or her appointment or designation, legal and ethical

responsibilities, and the role of institutions in mediation. As well as the mediation process, its applicable rules and principles and its costs are analyzed on comparative basis. The book also pays special attention to the outcome of mediation. The enforceability of the settlement reached both in domestic and cross-border mediations constitutes a basic element for the success of the institution and is thoroughly studied. This volume constitutes a unique instrument for those interested on mediation, either practitioners, judges or academics. For one of two semester undergraduate courses in Business Law. An issue that has been argued before the Supreme Court and that is still the subject of a heated debate across America that is fraught with misunderstanding, medical marijuana is a major, complex topic. This practical manual offers reliable legal information for anyone

interested in knowing more about medical marijuana. Written for the educated layperson, whether a patient, doctor, lawmaker, or a law enforcement official, the book starts with a history of medical marijuana in the United States. From there, the book spells out everything readers need to know on the contemporary aspects of the subject, with in-depth discussions of state and federal laws, the medical necessity defense, important cases, and specific requirements for lawfully

using medical marijuana. A model statute offers guidance to readers who want to legalize the use of the drug for medicinal purposes in states without medical marijuana laws.

“The Draft UNCITRAL Digest and Beyond” is one of the most useful single volumes available on the CISG. It includes the full text of the draft “UNCITRAL Digest” which catalogues the cases and arbitral awards to date that have interpreted and applied the CISG on an article by article basis. “The Digest and

Beyond” includes also commentary by eminent CISG scholars that addresses issues not yet considered in the cases. With more than 1000 decisions applying the CISG in courts and arbitral tribunals around the world, the UNCITRAL Secretariat charged five CISG experts from a variety of regions with the task of creating a digest of CISG case law. “The Digest and Beyond” includes the draft “UNCITRAL Digest”, even before it is released officially by UNCITRAL. It also goes

where the authors of the Digest were not allowed to go, given the narrow mandate within which the drafters were asked to work. Its chapters build upon the work of the “UNCITRAL Digest”. The Digest describes the reasoning and results of existing CISG cases; in “The Digest and Beyond”, the Digest authors analyze those cases, and discuss issues that have not yet arisen in the case law. Thus, in many ways, “The Digest and Beyond” provides scholarship that can direct future cases in areas that

have not yet been considered by courts and arbitrators as well as in areas in which contradictory court decisions exist. From random security checks at airports to the use of risk assessment in sentencing, actuarial methods are being used more than ever to determine whom law enforcement officials target and punish. And with the exception of racial profiling on our highways and streets, most people favor these methods because they believe they're a more cost-effective way to

fight crime. In *Against Prediction*, Bernard E. Harcourt challenges this growing reliance on actuarial methods. These prediction tools, he demonstrates, may in fact increase the overall amount of crime in society, depending on the relative responsiveness of the profiled populations to heightened security. They may also aggravate the difficulties that minorities already have obtaining work, education, and a better quality of life—thus perpetuating the pattern of

criminal behavior.

Ultimately, Harcourt shows how the perceived success of actuarial methods has begun to distort our very conception of just punishment and to obscure alternate visions of social order. In place of the actuarial, he proposes instead a turn to randomization in punishment and policing. The presumption, Harcourt concludes, should be against prediction.

The Unidroit Principles  
of International  
Contracts, first  
published in 1994, have  
met with extraordinary  
success in the legal and  
business community  
worldwide. Prepared by a  
group of eminent experts  
from all major legal  
systems of the world,  
they provide a  
comprehensive set of  
rules for international

commercial contracts.

This new edition of An International Restatement of Contract Law is the first comprehensive introduction to the Unidroit Principles 2004. In addition, it provides an extensive survey and analysis of the actual use of the Unidroit Principles in practice with special emphasis on the different ways in which they have been interpreted and applied by the courts and

arbitral tribunals in the hundred or so cases reported worldwide. The book also contains the full text of the Preamble and the 180 articles of the Unidroit Principles 2004 in Chinese, English, French, German, Italian and Russian as well as the 1994 edition in Spanish.

The Neuroscience of Psychological Therapies summarizes knowledge of brain function and brain behavior relationships within the context of

implementation. It describes how specific locations in the brain carry out specific activities, how the different activities are combined to yield normal and pathological behavior, and how knowledge of brain activities can guide psychological assessment and intervention. Specific topics include the influence of neural networks on discovery and change, the therapist's

communicating with patients using the brain as reference, and using neuroscience concepts to compare and integrate traditional schools of psychotherapy. Applying a neuroscience framework to conceptualization and treatment of depression is offered as an example, and specific issues associated with trauma and false memories are discussed. The book is aimed at anyone working within a psychotherapy framework

and who wishes to

Non-literal language is  
ubiquitous in everyday  
life, and while  
hyperbole is a major  
part of this, it has so  
far remained relatively  
unexplored. This volume  
provides the first  
investigation of  
hyperbole in English,  
drawing on data from  
genres such as spoken  
conversation, TV,  
newspapers, and literary

works from Chaucer to Monty Python. Combining quantitative and qualitative analyses, it uses approaches from semantics, pragmatics, discourse analysis and classical rhetoric to investigate in detail both speaker-centered and emotive aspects of hyperbole, and also addressee-related aspects, such as interpretation and interactional uptake. Illustrated with a range of diachronic case studies, hyperbole is

also shown to be a main means of linguistic creativity, and an important contributor to language change. The book concludes with an exploration of the role of hyperbole in political speaking, humour, and literature. Original and in-depth, it will be invaluable to all those working on meaning, discourse, and historical linguistics. An International Restatement of Contract Law: The UNIDROIT Principles of

The United Nations Convention on

Contracts for the International Sale of Goods (CISG) is a multilateral treaty governing the rights and obligations of parties to international sales contracts. Acting as a sort of UCC for international transactions, the CISG has been ratified by 63 countries that account for two-thirds of all world trade. Any practitioner working with or for a company selling goods overseas simply must know this law. Aspen Publishers' practice-oriented *A Practical Guide to the CISG: Negotiations Through Litigation* organizes the vast array of CISG issues by contract topic, making it easy for you to cut to the core of key topics such as whether or not CISG applies, entering the contract,

performance requirements under CISG, passing of the risk, remedies, and damages. This highly practical resource delivers features and benefits you won't find anywhere else: Complete, clause-by-clause analysis of the CISG Every provision of the CISG is accompanied by practitioners' 'Points of Interest' providing thorough legal analyses of specific factual patterns as applied to the CISG Sample pleadings accompanied by relevant law(s) provide basic blueprints applicable to particular case patterns Includes the list of goods that fall under CISG and those that are excluded All relevant citations are included, saving you time and making it

unnecessary to search through numerous sources The primary focus - how courts have addressed each problem - keeps your research on track and always relevant

strengthening the role of forgiveness in the administration of law. Through three case studies, Minow addresses such foundational issues as: Who has the right to forgive? Who should be forgiven? And under what terms? The result is as lucid as it is compassionate: A compelling study of the mechanisms of justice by one of this country's foremost legal experts.

This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a

comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).
