How games have been used to establish and combat Asian American racial stereotypes As Pokémon Go reshaped our neighborhood geographies and the human flows of our cities, mapping the virtual onto lived realities, so too has gaming and game theory played a role in our contemporary understanding of race and racial formation in the United States. From the Chinese Exclusion Act and Japanese American internment to the model minority myth and the globalization of Asian labor, Tara Fickle shows how games and game theory shaped fictions of race upon which the nation relies. Drawing from a wide range of literary and critical texts, analog and digital games,

journalistic accounts, marketing campaigns, and archival material, Fickle illuminates the ways Asian Americans have had to fit the roles, play the game, and follow the rules to be seen as valuable in the US. Exploring key moments in the formation of modern US race relations, *The Race Card* charts a new course in gaming scholarship by reorienting our focus away from games as vehicles for empowerment that allow people to inhabit new identities, and toward the ways that games are used as instruments of soft power to advance top-down political agendas. Bridging the intellectual divide between the embedded mechanics of video games and more theoretical approaches to gaming rhetoric, Tara Fickle reveals how this intersection allows us to overlook the predominance of game tropes in national culture. *The Race Card* reveals this relationship as one

If you were a mouse trapped in a maze and someone kept moving the cheese, what would you do? Over a decade ago the bestselling business fable *Who Moved*

My Cheese? offered its answer to this question: accept that change is inevitable and beyond your control, don't waste your time wondering why things are the way they are, keep your head down and start looking for the cheese. But success in the areas of innovation, entrepreneurship, creativity, leadership, and business growth—as well as personal growth—depends on the ability to push the boundaries, reshape the environment, and play by a different set of rules: our own. With that in mind, Harvard Business School professor Deepak Malhotra offers a radically different answer to this question. Malhotra tells an inspiring story about three unique and adventurous mice—Max, Big, and Zed—who

refuse to accept their reality as given. As we watch their lives unfold and intersect, we discover that instead of just blindly chasing after the cheese, each of us has the ability to escape the maze or even reconfigure it to our liking. In the face of established practices, traditional ideas, scarce resources, and the powerful demands or expectations of others, we often underestimate our ability to control our own destiny and overcome the constraints we face—or think we face. *I Moved Your Cheese* reminds us that we can create the new circumstances and realities we want, but first we must discard the often deeply ingrained notion that we are nothing more than mice in someone else's maze. As Zed explains, "You
