~~A Review of Sparse Recovery Algorithms. Abstract: Nowadays, a large amount of information has to be transmitted or processed. This implies high-power processing, large memory density, and increased energy consumption. In several applications, such as imaging, radar, speech recognition, and data acquisition, the signals involved can be considered sparse or compressive in some domain.~~

~~A Review of Sparse Recovery Algorithms – IEEE Journals ...~~

~~To further improve the recovery performance, the methods of Stagewise Orthogonal Matching Pursuit (StOMP) and compressive sampling matching pursuit (CoSaMP) are devised. StOMP can successively recovery the sparse signal by transforming the signal into a negligible residual and then solve a least-squares problem using the selected coordinates.~~
