Despite their rich tradition, the Carmina Anacreontea transmitted in the Palatine Anthology have received little scholarly attention. This neglect is linked to questions concerning their authenticity. Long read as poems by the ancient lyricist Anacreon, they are now regarded instead as imitations of Anacreontic lyricism. This volume presents the latest findings on the language, poetology, tradition, and reception of this lyrical collection.

Oestermann, a Dane by birth who has lived in Israel since 1961, presents 35 brief human interest stories about Israel's ordinary and extraordinary citizens, including a man who leads treks in the desert, an Israeli woman whose life was saved by an Arab physician, and Israeli transsexual singer Dana International. The volume includes bandw photos; it lacks a subject index. Annotation copyrighted by Book News, Inc., Portland, OR.

This fascinating and lively volume makes the case that the Eurovision Song Contest is an arena for European identification in which both national solidarity and participation in a European identity are confirmed, and a site where cultural struggles over the meanings, frontiers and limits of Europe are enacted.

This uniquely fascinating volume is not merely a learned treatise in historical semantics; it is itself a stupendous display of world harmony as a creed—a vivid demonstration that "all is all."

Sounds of Articulating Identity - Tradition and Transition in the Music of Palau, Micronesia, provides an overview of historical and contemporary music-making practices and their social contexts in the Republic of Palau. The study identifies and analyzes strands of musical development over the course of, roughly, the last century. Its secondary focus is on the conceptualization of the musical transition in Palauan discourse(s) and its interaction with local identity negotiation. As the ethnomusicological exploration of the Palauan world proceeds, the book demonstrates how a study of the music of a small island nation is capable of transcending the boundaries of ethnomusicology as an academic discipline, and it adds rich material to the discourse about globalization and to the field of cultural studies.

In today's globalized world, traditions of a national Self and a national Other no longer hold. This timely volume considers the stakes in our changing definitions of national boundaries in light of the unmistakable transformation of German and Dutch societies. Examining how the literature of migration intervenes in public discourses on multiculturalism and including detailed analysis of works by the Turkish-German writers Emine Sevgi Özdamar and Feridun Zaimoglu and the Moroccan-Dutch writers Abdelkader Benali and Hafid Bouazza, New Germans, New Dutch offers crucial insights into the ways in which literature negotiates both difference and the national context of its writing.

The world's largest and longest-running song competition, the Eurovision Song Contest is a significant and extremely popular media event throughout the continent and abroad. The Contest is broadcast live in over 30 countries with over 100 million viewers annually. Established in 1956 as a televised spectacle to unify postwar Western Europe through music, the Contest features singers who represent a participating nation with a new popular song. Viewers vote by phone for their favourite performance, though they cannot vote for their own country's entry. This process alone reveals much about national identities and identifications, as voting patterns expose deep-seated alliances and animosities among participating countries. Here, an international group of scholars from a variety of disciplines, including musicology, communications, history, sociology, English and German studies, explore how the contest sheds light on issues of European politics, national and European identity, race, gender and sexuality, and the aesthetics of camp. For some countries, participation in Eurovision has been simultaneously an assertion of modernity and a claim to membership in Europe and the West. Eurovision is

sometimes regarded as a low-brow camp spectacle of little aesthetic or intellectual value. The essays in this collection often contradict this assumption, demonstrating that the contest has actually been a significant force and forecaster for social, cultural and political transformations in postwar Europe.

Popular Music and Politics in the Eurovision Song Contest

It is undeniable that technology has made a tangible impact on the nature of musical listening. The new media have changed our relationship with music in a myriad of ways, not least because

the experience of listening can now be prolonged at will and repeated at any time and in any space. Moreover, among the more striking social phenomena ushered in by the technological revolution, one cannot fail to mention music's current status as a commodity and popular music's unprecedented global reach. In response to these new social and perceptual conditions, the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification. Concentrated listening, the form of musical reception fostered by Western art music, now appears to be but one of the many ways in which audiences respond to organized sound. Cinema, for example, has developed specific ways of combining images and sounds; and, more recently, digital technology has redefined the standard forms of mass communication. Information is aestheticized, and music in turn is incorporated into pre-existing symbolic fields. This volume - the first in the series *Musical Cultures of the Twentieth Century* - offers a wide-ranging exploration of the relations between sound, technology and listening practices, considered from the complementary perspectives of art music and popular music, music theatre and

multimedia, composition and performance, ethnographic and anthropological research.

"Drawing on archival research, oral history interviews, and participant observation, this examination of the adoption and adaptation of Mod style across geographic space also maps its various interpretations over time, from the early 1960s to the present. The book traces the Mod youth culture from its genesis in the dimly lit clubs of London's Soho, where it began as a way for young people to reconfigure modernity after the chaos of World War II, to its contemporary, country-specific expressions. By examining Mod culture in the United States, Germany, and Japan alongside the United Kingdom, "We Are the Mods" contrasts the postwar development of Mod in those countries that lost the war with those that won. The book illuminates the culture's fashion, music, iconography, and gender aesthetics, to create a compelling portrait of a transnational subculture." --Book Jacket.

The development of German pop music represents a fascinating cultural mirror to the history of post-war Germany, reflecting sociological changes and political developments.

While film studies is an already established discipline, German pop music is currently emerging as a new and exciting field of academic study. This pioneering companion is the

first volume to provide a comprehensive overview of the subject, charting the development of German pop music from the post-war period 'Schlager' to the present 'Diskursrock'. Written by acknowledged experts from Germany, the UK and the US, the various chapters provide overviews of pertinent genres as well as focusing on major bands such as CAN, Kraftwerk or Rammstein. While these acts have shaped the international profile of German pop music, the volume also undertakes in-depth examinations of the specific German contributions to genres such as punk, industrial, rap and techno. The survey is concluded by an interview with the leading German pop theorist Diedrich Diederichsen. The volume constitutes an indispensable companion for any student, teacher and scholar in the area of German studies interested in contemporary popular culture.

The fun, the feuds, the highs, the lows, the scandals, the outrageous outfits, the innovators and the copy cats - this book captures the singular flavour of Eurovision and charts its history from a tiny venue in Switzerland in 1955 to the modern extravaganza watched by 300 million TV viewers.

This book delivers the first comprehensive study on German modal verbs which summarises and critically reflects the discussion of the last 500 years, checks these findings against large corpus data and is accessible to the English reader. It is shown that non-epistemic modal verbs modify events, whereas their epistemic counterparts modify the proposition, and how the latter developed from the former.

The unconscious raises relevant problems in the theory of knowledge as regards non-conceptual contents and obscure representations. In the philosophy of mind, it bears on the topic of the unity of consciousness and the notion of the transcendental Self. It is a key-topic of logic with respect to the distinction between determinate-indeterminate judgments and prejudices, and in aesthetics it appears in connection with the problems of reflective judgments and of the genius. Finally, it is a relevant issue also in moral philosophy in defining the irrational aspects of the human being. The purpose of the present volume is to fill a substantial gap in Kant research while offering a comprehensive survey of the topic in different areas of research, such as history of philosophy, philosophy of mind, aesthetics, moral philosophy, and anthropology.

In this book, native popular musicologists focus on their own popular music cultures from Germany, Austria and Switzerland for the first time: from subcultural to mainstream phenomena; from the 1950s to contemporary acts.

Starting with an introduction and two chapters on the histories of German popular music and its study, the volume then concentrates on focused, detailed and yet concise close readings from different perspectives (including particular historical East and West German perspectives), mostly focusing on the music and its protagonists. Moreover, these analyses deal with very original specific genres such as Schlager and Krautrock as well as transcultural genres such as Punk or Hip Hop. There are additional chapters on characteristically German developments within music media, journalism and the music industry. The book will contribute to a better understanding of German, Austrian and Swiss popular music, and will interconnect international and especially Anglo-American studies with German approaches. The book, as a consequence, will show close connections between global and local popular music cultures and diverse traditions of study.
