

Elmo Rietschle Distributor Elmo Rietschle Vacuum Pumps

From one of the most popular project channels on YouTube comes a how-to book on building things that go boom. Grant Thompson, “The King of Random,” has created one of the most popular project channels on YouTube, featuring awesome videos such as How to Make a Laser Assisted Blowgun and Assassin ’ s Micro Crossbow. He currently has almost 10 million subscribers, posts 5 times a week, and averages over 40 million views a month. Partnering with Grant is Ted Slampyak, the artist behind the #1 New York Times bestseller 100 Deadly Skills. 52 Random Weekend Projects: For Budding Inventors and Backyard Builders is a guide that enables ordinary folks to build an impressive arsenal of projects. These crafts combine some of Grant ’ s most popular projects—Matchbox Rockets, Pocket Slingshot Super Shooters, Proto-Putty, Ninja Balls, Mini Matchstick Guns, The Clothespin Pocket Pistol—with many new ones, providing clear instructions on how to build them step-by-step. Broken down into Beginner, Intermediate, and Advanced sections, 52 Random Weekend Projects is loaded with truly amazing projects, including:
- Mousetrap Handgun
- Mini Solar Scorcher
- Air Vortex Canon
- Air Mounted Skewer Shooter
- Paracord Bullwhip
- Bottle Cap Party Whistle
- Ninja Stress Balls
- Tablecloth Parachute
- Skyblaster Slingshot
And many more!
Pressure Swing Adsorption is the first book that provides a coherent and concise summary of the underlying science and technology of pressure swing adsorption (PSA) processes at a level understandable to the practising engineer. PSA has achieved widespread commercial acceptance as the technology of choice for hydrogen purification, air separation and small scale air driers. However, PSA has numerous other actual and potential uses such as the recovery of methane from landfill gas, the production of carbon dioxide and other large scale applications. Since the design and optimization of a PSA process requires a somewhat mathematical model, two chapters of the book provide in-depth information on equilibrium theory and dynamic numerical simulation. However, this mathematical material will also help the general reader develop an understanding of the principles and strengths and limitations of various approaches. PSA engineers, chemical engineers, environmental chemists, academicians and managers who must make informed decisions about purchasing costly PSA systems will find Pressure Swing Adsorption of particular value.

This book presents selected papers from the 23rd Eurasia Business and Economics Society (EBES) Conference, held in Madrid, Spain. While the theoretical and empirical papers presented cover diverse areas of economics and finance in different geographic regions, the main focus is on the latest research concerning international trade, public economics, and regional studies. The book also includes studies on the economics of innovation, inequality and tourism.

Looking to write thoughtful messages, advice, memories, and love letters to your baby son? With its elegant and beautiful design, this Blank Journal Notebook with Lined Pages features the words "Letters To Our Baby Boy" that is the perfect baby keepsake gift from a mother and father to son to share all the special moments you witness as he grows and changes. Letters To Our Baby Boy Journal offers parents, especially from mom to son, a unique way to send love, support, and advice to a young son. Use this journal book to capture all of the moving, proud or funny moments throughout your son's childhood while they are still clear in your mind. Write a personal letter to your son on a regular basis to share memories, love, and words of wisdom. One idea is to make writing a letter to your son an annual tradition where you write a letter every year on his birthday. Or write your thoughts for your baby son on a regular basis as you watch him grow. Makes the perfect, personal gift for any parent, baby shower gifts, 1st birthday gifts, new births, birthday party gifts, a mom to be gift, or any other occasion that is special for celebrating your son. JOURNAL FEATURES 6"x9" Softcover Journal Cover 128 inside pages (64 sheets) Lined on Both Sides A convenient and perfect size to easily fit in your purse or backpack. Features the inspirational quote "Letters To Our Baby Boy" on the brown, blue and yellow cover. Makes the perfect gift idea for any parent, baby shower gifts, 1st birthday gifts, new births, birthday party gifts, a mom to be gift, or any other occasion that is special for celebrating your son.

Grain Drying

In Emotional Detox - A Womens Guide to Healing and Awakening, leading Tantra Healer, Mal Weeraratne, shares a fresh approach and insights on how to unblock orgasmic potential and achieve emotional liberation. Harnessing sexual energy rejuvenates and improves physiological, emotional, psychological and spiritual health. This book teaches women how to take control of the sexual energy within their bodies to remove trauma stored in the form of emotions using ancient knowledge and practices that are combined with new ground-breaking insights to create an engineered trauma-release technique called Tantric Tao Bodywork for Emotional Detox. Tantric - Tao Bodywork is a British pioneer technique intended to eliminate traumatic experiences at a cellular level in the body to start living a positive life. -- a biological cleanse and detox to experience joy and bliss. Having explored Tantra and Tao for 20+ years, Mal reveals how all women are capable of experiencing emotional freedom and ecstatic bliss. He provides readers with a unique understanding of how the female body may be activated to deepen ecstatic states. Prevailing negative attitudes in the West work against the natural capacity of a woman to realize her full sexual potential and ability to feel unlimited bliss and achieve deep organic states. Among other alarming survey results, it is estimated as per Cosmopolitans Female Orgasm Survey, only 57% of women in the UK experience an orgasm when they have sex with a partner whereas 43% has never experienced an orgasm. This book is packed with practical advice and tips on how to harness sexual orgasmic energy. Readers will learn how emotional trauma can block pleasure and cause disease; the difference between soft penetration and deep sustained penetration, including how to avoid premature male ejaculation; the secrets and history of female ejaculation; techniques for awakening and yoni massage and so much more.

This book is the first to treat the chemistry of superheavy elements, including important related nuclear aspects, as a self contained topic. It is written for those – students and novices -- who begin to work and those who are working in this fascinating and challenging field of the heaviest and superheavy elements. For their lecturers, their advisers and for the practicing scientists in the field –chemists and physicists - as the most complete source of reference about our today's knowledge of the chemistry of transactinides and superheavy elements. However, besides a number of very detailed discussions for the experts this book shall also provide interesting and easy to read material for teachers who are interested in this subject, for those chemists and physicists who are not experts in the field and for our interested fellow scientists in adjacent fields. Special emphasis is laid on an extensive coverage of the original literature in the reference part of each of the eight chapters to facilitate further and deeper studies of specific aspects. The index for each chapter should provide help to easily find a desired topic and to use this book as a convenient source to get fast access to a desired topic.

Superheavy elements – chemical elements which are much heavier than those which we know of from our daily life -- are a persistent dream in human minds and the kernel of science fiction literature for about a century.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
This four-volume Companion to Shakespeare's Works, compiled as a single entity, offers a uniquely comprehensive snapshot of current Shakespeare criticism. Brings together new essays from a mixture of younger and more established scholars from around the world - Australia, Canada, France, New Zealand, the United Kingdom, and the United States. Examines each of Shakespeare's plays and major poems, using all the resources of contemporary criticism, from performance studies to feminist, historicist, and textual analysis. Volumes are organized in relation to generic categories: namely the histories, the tragedies, the romantic comedies, and the late plays, problem plays and poems. Each volume contains individual essays on all texts in the relevant category, as well as more general essays looking at critical issues and approaches more widely relevant to the genre. Offers a provocative roadmap to Shakespeare studies at the dawning of the twenty-first century. This companion to Shakespeare's histories contains original essays on every history play from Henry VI to Henry V as well as fourteen additional articles on such topics as censorship in Shakespeare's histories, the relation of Shakespeare's plays to other dramatic histories of the period, Shakespeare's histories on film, the homoerotics of Shakespeare's history plays, and nation formation in Shakespeare's histories.

This book constitutes the refereed proceedings of the 8th International Conference on Web Reasoning and Rule Systems, RR 2014, held in Athens, Greece in September 2014. The 9 full papers, 9 technical communications and 5 poster presentations presented together with 3 invited talks, 3 doctoral consortial papers were carefully reviewed and selected from 33 submissions. The conference covers a wide range of the following: semantic Web, rule and ontology languages, and related logics, reasoning, querying, searching and optimization, incompleteness, inconsistency and uncertainty, non-monotonic, common sense, and closed-world reasoning for the web, dynamic information, stream reasoning and complex event processing, decision making, planning, and intelligent agents, machine learning, knowledge extraction and information retrieval, data management, data integration and reasoning on the web of data, ontology-based data access, system descriptions, applications and experiences. Directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

Cost Savings Through Energy Efficiency

This update of a popular book for civil and environmental engineering majors describes the technological and regulatory changes that have occurred over the last ten years in the discipline.

This comprehensive, standard work has been updated to remain an important resource for all those needing detailed knowledge of the theory and applications of vacuum technology. The text covers the existing knowledge on all aspects of vacuum science and technology, ranging from fundamentals to components and operating systems. It features many numerical examples and illustrations to help visualize the theoretical issues, while the chapters are carefully cross-linked and coherent symbols and notations are used throughout the book. The whole is rounded off by a user-friendly appendix of conversion tables, mathematical tools, material related data, overviews of processes and techniques, equipment-related data, national and international standards, guidelines, and much more. As a result, engineers, technicians, and scientists will be able to develop and work successfully with the equipment and environment found in a vacuum.

Manual on the Causes and Control of Activated Sludge Bulking and Foaming

How to Live in Our Polluted World

Drying grain is necessary for proper storage, handling and processing; the methods used for drying grain have an important influence on quality and the overall economics of the process. This book provides all the tools needed for effective grain drying, including mathematical theory, tabulated data on the physical and thermal properties of grains, and more.

How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

Wood Modification

a sourcebook for industry

Standard & Poor's Stock Reports

For Budding Inventors and Backyard Builders

My Children of the Forest

Improving Compressed Air System Performance

This book is exclusively concerned with wood modification, although many of these processes are generic and can be applied to other lignocellulosic materials. There have been many rapid developments in wood modification over the past decade and, in particular, there has been considerable progress made in the commercialisation of technologies. Topics covered include: The use of timber in the 21st century Modifying the properties of wood Chemical modification of wood: Acetic Anhydride Modification and reaction with other chemicals Thermal modification of wood Surface modification Impregnation modification Commercialisation of wood modification Environmental consideration and future developments This is the first time that a book has covered all wood modification technologies in one text. Although the book covers the main research developments in wood modification, it also puts wood modification into context and additionally deals with aspects of commercialisation and environmental impact. This book is very timely, because wood modification is undergoing huge developments at the present time, driven in part by environmental concerns regarding the use of wood treated with certain preservatives. There has been considerable commercial interest shown in wood modification over the past decade, with products based upon thermal modification, and furlurylation now being actively being marketed. The next few years will see the commercialisation of acetylation and impregnation modification. This is a new industry, but one that has enormous potential. This book will prove useful to all those with an interest in wood modification including researchers, technologists and professionals working in wood science and timber engineering, wood preservation, and well as professionals in the paper and pulp industries, and those with an interest in the development of renewable materials.
