For more than forty years, the Haugen Norwegian-English Dictionary has been regarded as the foremost resource for both learners and professionals using English and Norwegian. With more than 60,000 entries, it is esteemed for its breadth, its copious grammatical detail, and its rich idiomatic examples. In his introduction, Einar Haugen, a revered scholar and teacher of Norwegian to English speakers, provides a concise overview of the history of the language, presents the pronunciation of contemporary Norwegian, and introduces basic grammatical structures, including the inflection of nouns and adjectives and the declension of verbs.

Who Is Hillary Clinton? Readers of our New York Times best-selling series can find out now! At age fourteen, Hillary Clinton thought it would be thrilling to become an astronaut, so she sent an application to NASA. The reply was a flat out rejection: the space program didn't take women. It was a critical moment for the young girl, one that made her realize the world she lived in needed changing and that she had better try to make those changes happen. Clinton's life has been a thrilling series of firsts—First Lady of the US, then first First Lady to become a US Senator, Secretary of State, and the first woman to run as the Democratic candidate for President. This easy-to-read biography gives readers a firm grounding not only in Clinton's life history but the history of the times in which she's lived. It comes out as she makes her historic run for the White House.

The field of language testing and assessment has recognized the importance and underlying theoretical and practical underpinnings of language assessment literacy (LAL), an area that is gradually coming to prominence. This book addresses issues that promote the concept of LAL for language research, teaching, and learning, covering a range of topics. It brings together 14 chapters based on high-stakes and classroom-based studies authored by academics, professionals and researchers in the field. The text examines diverse issues through a multifaceted approach, presenting high-quality contributions that fill a gap in a research area that has long been in need of theoretical and empirical attention.

Telecollaboration, or online intercultural exchange, has become widely recognised as an effective way to promote the development of intercultural communicative competence and language skills. However, the study and implementation of new 2.0 environments such as wikis, Skype, virtual worlds and gaming for telecollaboration is still in its infancy. How can these multilingual, multimodal, collaborative environments be used to promote language and intercultural learning? What are the implications for teachers and learners and what new literacies are required? Do they offer an added-value? This book seeks to answer these questions and many more by bringing together the experience and expertise of researchers and practitioners alike. The authors offer critical stances, new frameworks and practical case studies to help the reader 'navigate' the world of Telecollaboration 2.0.

Guide Til Opgaveskrivning

This is a practical introduction to blended learning, presenting examples of implementation across a broad spectrum of disciplines. For faculty unfamiliar with this mode of teaching, it illustrates how to address the core challenge of blended learning—to link the activities in each medium so that they reinforce each other to create a single, unified, course—and offers models they can adapt. Francine Glazer and the contributors to this book describe how they integrate a wide range of pedagogical approaches in their blended courses, use groups to build learning communities, and make the online environment attractive to students. They illustrate under what circumstances particular tasks and activities work best online or face-to-face, and when to incorporate synchronous and asynchronous interactions. They introduce the concept of layering the content of courses to appropriately sequence material for beginning and experienced learners, and to ensure that students see both the online and the face-to-face components as being equal in value and devote equal effort to both modalities. The underlying theme of this book is encouraging students to develop the skills to continue learning throughout their lives. By allowing students to take more time and reflect on the course content, blended learning can promote more student engagement and, consequently, deeper learning. It appeals to today's digital natives who are accustomed to using technology to find and share information, communicate, and collaborate, and also enables non-traditional students to juggle their commitments more efficiently and successfully.

Youth around the world are fittingly described as digital natives because of their comfort and skill with technological hardware and content. Recent studies indicate that an overwhelming majority of children and teenagers use the Internet, cell phones, and other mobile devices. Equipped with familiarity and unprecedented access, it is no wonder that adolescents consume, create, and share copious amounts of content. But is there a cost? Digital Youth: The Role of Media in Development recognizes the important role of digital tools in the lives of teenagers and presents both the risks and benefits of these new interactive technologies. From social networking to instant messaging to text messaging, the authors create an informative and relevant guidebook that goes beyond description to include developmental theory and implications. Also woven throughout the book is an international sensitivity and understanding that clarifies how, despite the widespread popularity of digital communication, technology use varies between groups globally. Other specific topics addressed include: Sexuality on the Internet. Online identity and self-presentation. Morality, ethics, and civic engagement. Technology and health. Violence, cyberbullying, and victimization. Excessive Internet use and addictive behavior. This comprehensive volume is a must-have reference for researchers, clinicians, and graduate students across such disciplines as developmental/clinical child/school psychology, social psychology, media psychology, medical and allied health professions, education, and social work.

Go beyond traditional paper-and-pencil tests! This book provides a framework and practical ideas for assessing 21st century skills such as problem solving, collaboration, and creativity.

Op mod 1950 indledte F.J. Billeskov Jansen et ikke-litteraturvidenskabeligt forfatterskab, idet han i essays og kronikker ikke blot drøftede sit fag, men også emner af psykologisk og almen livsfilosofisk art. Det er bogen her et eksempel herpå. Indhold: Den rene Sorg; Dyden; Presence of mind; Tidehverv; Hørespil og Skuespil; Hvorfor lever et Digterværk videre?; Om Taknemmelighed; Inderlighed og Klarhed. F. J. Billeskov Jansen, Frederik Julius Billeskov Jansen, 1907-2002, professor i dansk litteratur ved Københavns Universitet og prisbelønnet litteraturforsker, stærkt inspireret af strukturalismen. Hans litteraturformidling, var præget af antagelsen om, at litteratur er en æstetisk disciplin i sig selv, og derfor ikke alene skal anses biografisk, som der havde været tradition for. Billeskov Jansens arbejder kan i denne optik ses som en forløber for den angelsaksiske nykritik. Senere åbnede han op for en mere idehistorisk tilgang til litteraturen. De fleste af Billeskov Jansens studier fokuserer på det danske 1700-tals litteratur. Billeskov Jansen stiftede tidsskriftet Orbis litterarum, og var fra 1967 medlem af Det Danske Akademi.

Who Is Hillary Clinton?

This revised edition includes the most current thinking on reflective learning, as well as stories from academics and students that bring to life the practical impact of reflection in action. Based on sound theoretical concepts, the authors offer a range of solutions for different teaching situations, taking into account factors such as group size, physical space, and technology. They also offer facilitation rather than traditional teaching methods as a productive and useful skill that helps teachers and encourages students to interact and develop reflexive skills that can be used beyond their student years.

The Liar is one of Danish novelist Martin A. Hansen's best known and popular fictions. Published in 1950, the story, which takes place shortly after World War II, is told in the first person and concerns the inhabitants of a tiny island in the Danish archipelago. In this absorbing psychological work, the author probes deeply into the mind of Johannes Vig, the local schoolmaster, a lonely figure whose relationship with his fellow islanders is gradually revealed in the diary on which he retrospectively comments. The story lays bare not only his self-doubts, but his belief in the goodness of man, both of which become increasingly more complex and contradictory as the story unfolds.

This book is one of the first to attempt a systematic in-depth analysis of assessment in mathematics education in most of its important aspects: it deals with assessment in mathematics education from historical, psychological, sociological, epistemological, ideological, and political perspectives. The book is based on work presented at an invited international ICMI seminar and includes chapters by a team of outstanding and prominent scholars in the field of mathematics education. Based on the observation of an increasing mismatch between the goals and accomplishments of mathematics education and prevalent assessment modes, the book assesses assessment in mathematics education and its effects. In so doing it pays particular attention to the need for and possibilities of assessing a much wider range of abilities than before, including understanding, problem solving and posing, modelling, and creativity. The book will be of particular interest to mathematics educators who are concerned with the role of assessment in mathematics education, especially as regards innovation, and to everybody working within the field of mathematics education and related areas: in R&D, curriculum planning, assessment institutions and agencies, teacher trainers, etc.

Language Online

In Language Online, David Barton and Carmen Lee investigate the impact of the online world on the study of language. The effects of language use in the digital world can be seen in every aspect of language study, and new ways of researching the field are needed. In this book the authors look at language online from a variety of perspectives, providing a solid theoretical grounding, an outline of key concepts, and practical guidance on doing research. Chapters cover topical issues including the relation between online language and multilingualism, identity, education and multimodality, then conclude by looking at how to carry out research into online language use. Throughout the book many examples are given, from a variety of digital platforms, and a number of different languages, including Chinese and English. Written in a clear and accessible style, this is a vital read for anyone new to studying online language and an essential textbook for undergraduates and postgraduates working in the areas of new media, literacy and multimodality within language and linguistics courses.

Presents a collection of lesson, activities, handouts, and resources to help students comprehend documentary films.

This book is a detailed and wide-ranging account of the birth of social theory as a distinctive and modern intellectual genre, providing a brilliant account of the "pre-history" of sociology and a vivid portrayal of intellectual culture between the Enlightenment and the age of Romanticism.

Writing and Reporting News: A Coaching Method

Telecollaboration 2.0

This wide-ranging collection of essays offers valuable insights into the cultural issues involved in the practical application of social work theories. Leading contributors explore the challenges faced by indigenous populations and ethnic minority groups, examining how they can gain control over their position as minority populations, and offering valuable guidance on cross-cultural work. The direct implementation of four established theoretical approaches - ecological systems, community development, strengths-based approaches and attachment theories - is shown in a variety of contexts, including mental health care, trauma counselling and child protection. Using community development work in Australia and New Zealand as a case study, the contributors also advocate using these approaches in work with migrants and refugees. Social Work Theories in Action recognizes the importance of drawing on the strengths of families, individuals and communities and offers theoretical perspectives that can be applied in everyday work situations. It is essential reading for social and community workers, mental health professionals and social work students.

The Handbook of Motivation at School presents the first comprehensive and integrated compilation of theory and research on children's motivation at school. It covers the major theoretical perspectives in the field as well as their application to instruction, learning, and social adjustment at school. Key Features: Comprehensive – no other book provides such a comprehensive overview of theory and research on children's motivation at school. Theoretical & Applied – the book provides a review of current motivation theories by the developers of those theories as well as attention to the application of motivation theory and research in classrooms and schools. Chapter Structure – chapters within each section follow a similar structure so that there is uniformity across chapters. Commentaries – each section ends with a commentary that provides clear directions for future research.

A complete and thorough necropsy is invaluable for diagnosing diseases in animals. In Necropsy - a Handbook and Atlas, all essential and necessary procedures for carrying out necropsies of horses, production animals, dogs and cats, laboratory animals, rabbits, mink, poultry and fish are described in separate chapters. Moreover chapters have also been dedicated to the necropsy of foetal membranes, the brain and the extensive examination of the heart. The authors of each chapter are all experienced diagnosticians, and Necropsy is used during practical courses for veterinary students in special pathology, poultry and fish diseases, and large animals at the University of Copenhagen Denmark. Due to the comprehensive description of the procedures and number of illustration, the book should also fulfill the requirements of a handbook and atlas for veterinary practitioners and researchers carrying out necropsies as a part of their work.
