Engineering Drawing Curves

It is usually only the very simple type of engineering detail that has an outline composed entirely of straight lines The inclusion of curves within the outline of a component may be for several reasons: to eliminate sharp edges, thereby making it safer to handle; to eliminate a stress centre, thereby making it stronger; to avoid extra machining, thereby making it cheaper; and last, but by no means least, to improve its appearance This last reason applies particularly to those industries ...

Unit 1 engineering curves - SlideShare

Engineering Drawing Plays a crucial role in the life of Every Mechanical Engineering student because he has to bear that subject throughout his BTech. Apart from the Engineering Drawing, Production Drawing and Machine Drawing was also need to be learned by the Engineering student.

---

### Engineering Drawing Instruments and Their Usage [PDF]

Compass is used to draw an arc or circle with known dimensions on engineering drawing. It is generally made of steel and consists two legs. One leg contains needle at the bottom and other leg contains a ring in which a pencil is placed.

---

### Instruments Used in Engineering Drawing -its Uses and ...

Here at London Graphic Centre we have a great range of technical drawing equipment to meet all your scientific and mathematical design needs. Our range includes compasses, french curves, stencils and much more. We stock several famous and popular brands, including Rotring, Ecobra, Linex and Blundell Harling.

---

### Technical Drawing Equipment | Compasses | Set Squares

For general engineering drawings, the types of lines recommended by the Bureau of Indian Standards shown in table 2 must be used. The thickness of the lines must be chosen according to the type and size of the drawing from any of the six groups given in Table 1.
