Dr. Saboori joined Manhattan College's Department of Mechanical Engineering in 2011. Prior to attending The City University of New York for her master's and doctorate degrees, she received her bachelor's degree in Iran and worked for several years in the oil and gas industries designing pipeline equipment.

Parisa Saboori | Manhattan College | Riverdale, NY

Unlike other books in this field, Dym and Shames treat all the necessary theory needed for the study of solid mechanics and include extensive applications. Of particular note is the variational approach used in developing consistent structural theories and in obtaining exact and approximate solutions for many problems.

Presents certain key aspects of inelastic solid mechanics centered around viscoelasticity, creep, viscoplasticity, and plasticity. It is divided into three parts consisting of the fundamentals of elasticity, useful constitutive laws, and applications to simple structural members, providing extended treatment of basic problems in static structural mechanics, including elastic and inelastic effects.
