

*Engineering ToolBox - Resources, Tools and Basic Information for Engineering and Design of Technical Applications! - search is the most efficient way to navigate the Engineering ToolBox! Thermoplastics - Physical Properties*

*Thermoplastics - Physical Properties*

*Properties: PBT, PET and PBT Blends are engineering plastics with excellent processing characteristics and high strength and rigidity for a broad range of applications.*

*Polymer Thermoplastics - British Plastics Federation*

*Engineering thermoplastics and advanced engineering thermoplastics or ultrapolymers comprise a special, high-performance segment of synthetic plastic materials that offer premium properties. When properly formulated, ETP may be shaped into mechanically functional, semiprecision parts or structural components.*

*Polycarbonates (PC) are a group of thermoplastic polymers containing carbonate groups in their chemical structures. Polycarbonates used in engineering are strong, tough materials, and some grades are optically transparent. They are easily worked, molded, and thermoformed. Because of these properties, polycarbonates find many applications.*
