Ethics in Counseling and Therapy develops students' ethical competence through an understanding of theory. Houser and Thoma helps the counselor form his or her own ethical identity and reflect on his or her own values and issues by presenting a theoretical framework that draws on theories from disciplines such as philosophy, sociology, and moral psychology.

This edited volume comprehensively examines the critical ethical challenges that arise in the practice of counselling and psychotherapy. It translates philosophical positions and professional ethical guidelines in a way that can be applied to practice. The various chapters focus on specific ethical issues that emerge in working with a range of different client groups; for example, children, couples and families. While some ethical imperatives are common across the board, others could be more closely associated with certain client groups. Practitioners might experience uncertainty in working with vulnerable client groups; for example, lesbian/gay/transgender/intersex (LGBT) clients, or persons who report intimate partner violence. Several chapters raise questions, provide information and additional resources to enhance ethically informed practice. Chapter contributions also highlight the ethical dilemmas that might be unique to certain contexts; for example, private practice, schools and consultation-liaison settings. This volume also addresses contemporary and relatively less understood playing fields like 'digital ethics' related to therapist-client interface in the internet space and the navigation of ethical dilemmas in the newly emerging field of employee assistance programmes which address mental health needs in the corporate sector. Written by experienced practitioners of psychotherapy, and culturally contextualized, this is a valuable resource for academics and practitioners interested in psychotherapy

and counselling.

The book will cover the ethics of a range of venues and situations where dual relationships are mandated, such as in the military, prisons/jails, and police departments, and settings where multiple relationships are unavoidable, such as rural communities; graduate schools and training institutions; faith, spiritual, recovery or 12-step, minority and disabled communities, total institutions, and sport psychology. The real world of professional ethics in art therapy is, more times than not, a spectrum of shades of gray. In this exceptional new fourth edition, the authors raise questions and provide information related to the many ethical dilemmas art therapists face. Several chapters refer to the Ethical Principles for Art Therapists and Code of Professional Practice of the Art Therapy Credentials Board. Changes that were made to the AATA Ethics Document in 2013 are discussed. Models of how to think through and resolve the difficult ethical problems art therapists encounter during their professional lives are presented. A chapter discussing burnout and compassion fatigue—"costs of caring"-- provides an understanding of the responsibility that systems hold in supporting therapists and clients. Within each chapter, there are dilemma-laden vignettes intended to stimulate reflection and discussion. Most chapters include a series of questions pertaining to practical applications aimed at helping to review the material, formulate, and clarify positions on key issues. Also included are suggested artistic tasks intended to help the reader engage with topics in meta-cognitive, kinetic, visual, and sensory methods. Compelling illustrations throughout the text are provided as examples of creative responses to the artistic tasks. In addition, informational topics dealing with ethical violations, rights of artworks, marketing, advertising, and publicity are explored. The importance of multicultural approaches is expanded with the discussion that competence is a baseline for practice as an art therapist. Significant updates were made to the chapter that explores art therapy in the digital age. The appendices contain ethics documents of the British Association of Art Therapists for comparison. This unique book is

designed for art therapy students, art therapists, expressive arts therapy professionals, and will be a useful and supplemental textbook for art therapy courses dealing with professional ethics and supervision, art therapy theory and practice.

Each chapter introduces a setting and gives readers a brief understanding of some of the potential ethical issues at hand, before delving deeper into the multiple ethical issues that must be addressed and the ethical principles and standards involved. No other book on the market captures the breadth of ethical issues found in daily practice and focuses entirely on applied ethics in psychology.
