Fate, Time, and Language is about fatalism. Fatalism comes up in a very old argument in the never-never land between logic and metaphysics, Aristotle's argument about the problem of future contingents: "For example, a sea-fight must either take place on the morrow or not. No necessity is there, however, that it should come to pass or should not.**

David Foster Wallace not only took issue with Taylor's method, which, according to him, scrambled the relations of logic, language, and the physical world, but also noted a semantic trick at the heart of Taylor's argument. Fate, Time, and Language presents Wallace's brilliant critique of Taylor's work. Written long before the publication of his fiction and essays, Wallace's thesis reveals his great skepticism of abstract thinking made to function as a negation of something more genuine and real.
