Our God is an English translation of Hamara Khuda written by Hazrat Mirza Bashir Ahmad (ra), M. A. in the prime of his youth. The book was written largely for the youth who were being swept by the onslaught of atheist literature. It is as relevant today as then; rather more so. The book mainly addresses the issue of Existence of God from the point of view of rational arguments. It furnishes cogent reasons as to why we cannot see God. The beauty of God lies in His being Hidden from our physical eyes, and yet being apparent to us through his creation and revelation. The universe, human nature, morality, universal acceptance of God,

supremacy of Prophets and testimony of the righteous are the bases on which the author successfully develops the arguments for the existence of God. For a reflective mind everything in the world points to God. Even the smallest constituent of the universe presents an unfathomable puzzle for the human mind. The Christian church was, and continues to be, mainly responsible for advancing a totally false and absurd view that there is fundamental contradiction between science and religion. The Holy Quran and the Holy Prophet (sa) categorically reject this view. The author deals with the issue comprehensively and shows that there is not, and cannot be, a contradiction between science and religion. Next, the writer deals with

Figment (Insanity Book 2)

Victorian Murderesses investigates the politics of female violence in Thomas Hardy's *Tess of the D'Urbervilles* (1891), George Eliot's *Adam Bede* (1859), Mary Braddon's *Lady Audley's Secret* (1862), and Florence Marryat's *The Blood of the Vampire* (1897). The controversial figure of the murderess in these four novels challenges the assumption that women are essentially nurturing and passive and that violence and aggression are exclusively male traits. By focusing on the representations of murder committed by women, this book demonstrates how legal and even

medical discourses endorsed Victorian domestic ideology, as female criminals were often locked up in asylums and publicly executed without substantial evidence. While paying close attention to the social, economic, judicial, and political dynamics of Victorian England, this interdisciplinary study also tackles the question of female agency, as the novels simultaneously portray women as perpetrators of murder and excuse their socially unacceptable traits of anger and violence by invoking heredity and madness. Although the four novels tend to undercut female power and attribute violence

to adulterous women, they are revolutionary enough to deploy female characters who rebel against male sovereignty and their domestic roles by stabbing their rapists and even killing their newborns. Victorian studies on gender and violence focus primarily on female victims of sexual harassment, and real and fictional male killers like Dracula and Jack the Ripper. Victorian Murderesses contributes to the field by investigating how literary representations of female violence counter the idealisation of women as angelic housewives.
