Financial Accounting: Information for Decisions

The Practice of Lending

*Make informed decisions in today's dynamic international business environments International accounting has never been so exciting. Not only is the pace of international business, finance, and investment rapidly increasing, but we are also moving closer than ever before toward convergence of accounting standards worldwide. Updated and revised to keep pace with these changes, this Sixth Edition of Radebaugh, Gray, and Black's International Accounting and Multinational Enterprises focuses on international business strategies and how accounting applies to these strategies. You'll learn how to use financial and accounting information across borders, and make more informed decisions in an increasingly complex international business environment. The authors also explain the key factors, including cultural differences, that influence accounting standards and practices in different countries, and how those factors impact the harmonization of standards worldwide. New to This Edition: * New coauthor, Ervin L. Black of Brigham Young University. * Updated coverage on corporate governance, Sarbanes-Oxley, the Public Company Accounting Oversight Board (PCAOB), and how these forces affect U.S.-based multinationals, as well as companies in other countries. * Increased coverage of the efforts of the International Accounting Standards Board (IASB) to establish a uniform set of International Financial Reporting Standards (IRFS) worldwide and its interface with different national standard setters, especially the FASB. Special attention is given to the experience of the European Union and Australia in adopting IFRS in 2005. * A web-based International Accounting Practice Problem, which helps students see how to apply IFRS to a set of transactions. * Brief, user-oriented examples called Strategic Decision Points at the beginning of each chapter. * Expanded end-of-chapter material, including more discussion questions and exercises. * New cases (two per chapter) on the web. * Accounting for foreign exchange is now covered in two chapters. One chapter focuses on accounting issues, and the other chapter, which is new, focuses on foreign exchange risk management.*

In Compensation and Benefit Design, Bashker D. Biswas shows exactly how to bring financial rigor to the crucial "people" decisions associated with compensation and benefit program development. This comprehensive book begins by introducing a valuable Human Resource Life Cycle Model for considering compensation and benefit programs. Next, Biswas thoroughly addresses the acquisition component of compensation, as well as issues related to general compensation, equity compensation, and pension accounting. He assesses the full financial impact of executive compensation programs and employee benefit plans, and discusses the unique issues associated with international HR systems and programs. This book contains a full chapter on HR key indicator reporting, and concludes with detailed coverage of trends in human resource accounting, and the deepening linkages between financial and HR planning. Replete with both full and "mini" case examples throughout, the book also contains chapter-ending exercises and problems for use by students in HR and finance programs. HR managers are under intense pressure to become strategic business partners. Many, unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including the quantifiable links between workforces and business value, the cost-benefit analysis of HR and strategic financial initiatives, and specific issues related to total rewards programs. Unlike finance books for non-financial managers, Financial Analysis for HR Managers focuses entirely on core HR issues.

This book provides a comprehensive treatment of credit risk assessment and credit risk rating that meets the Advanced Internal Risk-Based (AIRB) approach of Basel II. Credit risk analysis looks at many risks and this book covers all the critical areas that credit professionals need to know, including country analysis, industry analysis, financial analysis, business analysis, and management analysis. Organized under two methodological approaches to credit analysis—a criteria-based approach, which is a hybrid of expert judgement and purely mathematical methodologies, and a mathematical approach using regression analysis to model default probability—the book covers a cross-section of industries including passenger airline, commercial real estate, and commercial banking. In three parts, the sections focus on hybrid models, statistical models, and credit management. While the book provides theory and principles, its emphasis is on practical applications, and will appeal to credit practitioners in the banking and investment community alongside college and university students who are preparing for a career in lending.

A new collection of best practices for designing better compensation and benefit programs... 2 authoritative books, now in a convenient e-format, at a great price! 2 authoritative eBooks help you drive more value, efficiency, and competitive advantage from compensation and benefits programs Compensation and benefit programs are the largest expenses in most organizations; in service organizations, they often represent more than 50% of total costs. In this unique 2 eBook package, leading consultant Bashker D. Biswas helps you systematically optimize these programs to maximize value, efficiency, and competitive advantage. In Employee Benefits Design and Planning , Biswas brings together all the knowledge you need to make better benefits decisions. He introduces core principles for ensuring proper financing, funding, compliance, and recordkeeping; accurate actuarial calculations; and effective employee communication. Building on these principles, he guides you through benefits ranging from healthcare and disability insurance to retirement and cafeteria plans. You'll find up-to-date discussions of complex challenges, such as the Affordable Care Act and global benefits planning. Throughout, he offers essential insights for managing rising costs and risks, while ensuring that benefits programs improve productivity, reflect best practices, and align with your organization's strategy and goals. Next, in Compensation and Benefit Design , Biswas helps HR professionals bring true financial and accounting discipline to compensation and benefit design, tightly align talent management to strategy, and quantify program performance in the language of finance. Biswas thoroughly explains best-fit practices for superior program design, demystifies relevant financial and accounting concepts, and illuminates key connections between HR program development and GAAP/IFRS accounting requirements. His far-reaching coverage ranges from integrating compensation and benefits into Balanced Scorecards to managing expatriate compensation. Biswas reveals the true financial implications of every element of modern compensation and benefit programs, from base salaries to stock incentives, sales compensation to healthcare cost containment. Perhaps most important, he helps you systematically measure the value of your investments -- so you can both prove and improve your performance. Simply put, this collection brings together unparalleled tools for optimizing compensation and benefits programs -- whether you're in HR, finance, line-of-business management, or corporate management. From Dr. Bashker D. Biswas, world-renowned expert in employee compensation and benefits program design
