Free Notes, PDF, Current Affairs and Study Materials. Integrated Farming System. August 17, 2020 By Sheshan Pradhan Leave a Comment. The integrated farming system, as the name suggests, is an integration or a collaboration of two sectors of production- crop production and animal rearing. These two entwined sectors of production guarantees large scale diversified production with minimum cost ...

What is Integrated Farming System? - PSCNOTES.IN

Integrated farming aims to reduce the use of chemicals by favouring preventive cultivation methods and biological pest control. Sustainable farming is less radical and allows the use of chemicals according to tolerance threshold of crops.

Integrated farming and sustainable farming | Alimentarium

Mixed farming systems or integrated farming produce both crops and animals on one farm. This farming system permits wider crop rotations and thus reduces dependence on chemicals, allowing diversification for better risk management. Two subsets of mixed systems are (1) rain-fed ICLF systems and (2) irrigated ICLF systems.
