B124 | Fundamentals of Accounting | Open University

Accounting or accountancy is the measurement, processing, and communication of financial and non financial information about economic entities such as businesses and corporations.Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this information to a variety of users, including investors, creditors ...

Accounting - Wikipedia

The Code establishes the five fundamental principles of professional ethics for all professional accountants: • Integrity • Objectivity • Professional Competence and Due Care • Confidentiality • Professional Behaviour In May 2015, IESBA published its Exposure Draft, “Responding to Non-Compliance or Suspected Non-Compliance with Laws and Regulations” (NOCLAR)

The Five Fundamental Ethics Principles: Time for Evaluation?

Business Law versus Business Ethics. While staying within the confines of an increasing array of business laws is necessary for success in business, it is not sufficient. Businesses must also recognize additional limitations and expectations placed upon them by business ethics, those principles and values that define what is right and wrong.

Business Law Notes - DPHU

Basic accounting principles generally obligate the accountant to act in good faith and engage in full disclosure of all potential issues with the entity’s finances. Accountants must offer the most realistic view of the company finances rounding figures down and anticipating potential losses.
