and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Middle Grades Research: Exemplary Studies Linking Theory to Practice is the first and only book to present what is perhaps the most thoroughly scrutinized group of studies focusing on middle grades education issues ever assembled. Each research project undertaken by the contributing authors herein resulted in the publication of a scholarly paper. As a collection, the ten studies featured in this book are the crème de la crème of submissions to the Middle Grades Research Journal between August 2006 and December 2008. They are the ten highest peer reviewed manuscripts examined by members of the MGRJ Review Board - each having undergone careful "blinded" examination by three or more experts in the sub-specialty area addressed by the

research study conducted. In addition, each study serves to exemplify how sound, practical research findings can be linked to classroom practice in middle grades classrooms. **Middle Grades Research: Exemplary Studies Linking Theory to Practice** is a must read for university professors and a useful tool for middle grades educators across all subject areas and school settings. Professors who teach middle grades courses, at both the undergraduate and graduate levels, will find the book to be a superb supplemental / accelerated readings text. Every college-level middle grades education course should make this book an integral part of class discussions. The book is also an excellent professional development study group resource for middle grades principals and classroom teachers across all subject areas. School level “Professional Learning Communities” (PLCs) will find that Dr. Hough’s book stimulates scholarly thought, promotes discussion, and demonstrates how educational theory can and should impact teaching and learning.

. The report presents data from a survey of 400+ American college students about how they go about doing research in their college libraries. The 150+ page report gives extensive data on student use of major search engines, wikipedia, library databases, book collections and other library resources. The study also gives detailed information on how their professors advise them to use the library, and how comfortable they feel about their research skills and how helpful librarians have been in helping them in their research. Data is broken out by more than 16 criteria including gender, income level, type and size of college, mean SAT acceptance score of the college, and many other variables. Just a few of the report’s many findings are that: Only about 47% of

students are sure that they have ever been required to turn in a research paper exceeding 10 double spaced typed pages in length for any of their classes. More than 86% of students say that they understand the concept of plagiarism "well" or "very well". 64% of students sampled say that they know how to contact a librarian online. 55.2% of the students in the sample had not asked for help from a librarian within the past year. Nearly 29% of students say that Google, Yahoo and other major search engine searches were the most important information source for their last research assignment. More than 9% of information needed for research papers was sourced from Wikipedia or other wikis. The higher the grade point average the less information for research papers was obtained from search engines such as Google or Yahoo. The study is available directly from Primary Research Group or from major book distributors. The price is \$80.00 for print and PDF versions; site licenses are also available.
