Conveyancing-Principles & Practice provides a succinct understanding of the historical and philosophical background of land law and conveyancing in Kenya, a thorough grasp of the legal framework and a simplified concise exposition of the processes and formalities that precede the legal transfer of land. It combines a technical understanding of complex legal phenomenon with some critical analysis of the law. The book is alive to the fact that land law and conveyancing impinge upon a vast area of social ordering and expectations, and exert a fundamental influence upon the lifestyles of ordinary people. Most importantly, Conveyancing-Principles and Practice is designed along the new Advocates Training Programme as a core text for students of conveyancing, legal practitioners, real estate investors, auctioneers, Government departments and the citizenry.

Finding the Law

The Journal of the Law Society of Scotland

This work is a detailed study of the field of private law. It takes key topics from the law of obligations and the law of property and traces their historical development.

Professor Robert Rennie has been one of the most influential voices in Scots private law over the past thirty years. Highly respected as both an academic and a practitioner, his contribution to the development of property law and practice has been substantial and unique. This volume celebrates his retirement from the Chair of Conveyancing at the University of Glasgow in 2014 with a selection of essays written by his peers and colleagues from the judiciary, academia and legal practice. Each chapter covers a topic of particular interest to Professor Rennie during his career, from the historical development of property law rules through to the latest developments in conveyancing practice and the evolution of the rules of professional negligence. Although primarily Scottish in focus, the contributions will have much of interest to lawyers in any jurisdiction struggling with similar practical problems, particularly those with similar legal roots including the Netherlands and South Africa. As a whole, the collection is highly recommended to students, practitioners and academics.

Recent years have seen a dramatic increase in the number and range of Scottish legal textbooks, journals and reports, adding to more than three centuries of materials. The arrival of electronic publishing, on the Internet and CD-ROM, has added a further dimension. Along with these developments has come a greater responsibility for everyone involved in the law - students, academics and practitioners - to obtain information which is authoritative, complete and up-to-date, as quickly and cost-effectively as possible. Finding the Law is a practical guide to the leading sources of Scots, English and European law and to the means of accessing them. Regions within European Union member states (such as Scotland in the UK and Catalonia in Spain) have their own legal systems: how will the process of 'Europeanization' affect them? This volume examines the phenomenon of 'regional' private law in the European Union, considering jurisdictions and laws below those of the member states and drawing comparisons with other such jurisdictions elsewhere in the world, such as Louisiana and Quebec. The whole is considered in relation to the development of European private law, and the use of codification in that process. This volume will be of interest to academic lawyers worldwide, advanced law students and European policy-makers.
