A NEW YORK TIMES NOTABLE BOOK OF THE YEAR "[A] skillfully crafted gothic mystery. . . Johnson pulls off a great feat in this book." —Financial Times "It reminded me, in its general refusal to play nice, of early Ian McEwan." —The New York Times Book Review "Johnson crafts an aching thriller about the dangers of loving too intensely." —Time From a Booker Prize finalist and international literary star: a blazing portrait of one darkly riveting sibling relationship, from the inside out. "One of her generation's most intriguing authors" (Entertainment Weekly), Daisy Johnson is the youngest writer to have been shortlisted for the Man Booker Prize. Now she returns with Sisters, a haunting story about two sisters caught in a powerful emotional web and wrestling to understand where one ends and the other begins. Born just ten months apart, July and September are thick as thieves, never needing anyone but each other. Now, following a case of school bullying, the teens have moved away with their single mother to a long-abandoned family home near the shore. In their new, isolated life, July finds that the deep bond she has always shared with September is shifting in ways she cannot entirely understand. A creeping sense of dread and unease descends inside the house. Meanwhile, outside, the sisters push boundaries of behavior—until a series of shocking encounters tests the limits of their shared experience, and forces shocking revelations about the girls' past and future. Written with radically inventive language and imagery by an author whose work has been described as "entrancing" (The New Yorker), "a force of nature" (The New York Times Book Review), and "weird and wild and wonderfully unsettling" (Celeste Ng), Sisters is a one-two punch of wild fury and heartache—a taut, powerful, and deeply moving account of sibling love and what happens when two sisters must face each other's darkest impulses.

"This debut thriller reads like The Devil Wears Prada meets Single White Female. I couldn't put it down."—Catherine Steadman, author of Something in the Water and Mr. Nobody She's borrowed your life. But what if she decides to keep it? Glamorous Margot Jones is the fashion editor at glossy magazine Haute. Pregnant with her first child, Margot's carefully curated life is the object of other women's envy—who wouldn't want her successful career, loving husband, beautiful house, and stylish wardrobe? Maggie, a freelance journalist, certainly knows she doesn't measure up. But when she gets the temp job covering Margot's maternity leave, Maggie seizes the chance to live a flashier life—even if it's only for a few months. But the simultaneous arrival of Margot's baby and a brutal end to her oldest friendship sends Margot into a spiral of insecurity and suspicion; normal preoccupations of new motherhood turn into dark and frightening paranoia. Who is the vicious online troll mocking Margot's facade of perfection and threatening to expose a dark secret she's spent years concealing? Are Maggie's newfound ambitions and plucky enthusiasm as innocent as they seem? And what happens when Margot is ready to return to her old life—especially if Maggie doesn't want to leave?

Maybe it doesn't surprise me that the strangest book I've read about motherhood is also the best, but it does thrill me." —Rebecca Makkai, author of The Great Believers "Spellbinding...both unsettling and irresistible. Phillips manifests the surreal, terrifying, and visceral experience of motherhood."

—Dana Spiotta, author of Innocents and Others "An existential page-turner that captures, with perfect sharpness, the fierce delirium of motherhood, the longing to understand the workings of our universe, and the wondrous and terrifying mystery that is time." —Laura Van Den Berg, author of The Third Hotel "An unforgettable tour de force that melds nonstop suspense, intriguing speculation, and perfectly crafted prose...this story showcases an extraordinary writer at her electrifying best." —Publishers Weekly (starred review) "Suspenseful and mysterious, insightful and tender, Phillips's new thriller cements her standing as a deservedly celebrated author with a singular sense of story and style... [A] superbly engaging read—quirky, perceptive, and gently provocative." —Kirkus Reviews (starred review) When Molly, home alone with her two young children, hears footsteps in the living room, she tries to convince herself it's the sleep deprivation. She's been hearing things these days. Startling at loud noises. Imagining the worst-case scenario. It's what mothers do, she knows. But then the footsteps come again, and she catches a glimpse of movement. Suddenly Molly finds herself face-to-face with an intruder who knows far too much about her and her family. As she attempts to protect those she loves most, Molly must also acknowledge her own frailty. Molly slips down an existential rabbit hole where she must confront the dualities of motherhood: the ecstasy and the dread; the languor and the ferocity; the banality and the transcendence as the book hurtles toward a mind-bending conclusion. In The Need, Helen Phillips has created a subversive, speculative thriller that comes to life through blazing, arresting prose and gorgeous, haunting imagery. Helen Phillips has been anointed as one of the most exciting fiction writers working today, and The Need is a glorious celebration of the bizarre and beautiful nature of our everyday lives.

In 1906, Harriet Levy was talked into moving to Paris by her friend Alice B. Toklas and suddenly found herself immersed in a strange world peopled by artists who spoke a language she could not understand--a colorful world that she could only remotely observe in black and white. Paris Portraits is a short masterpiece. This sparkling manuscript, long hidden in the archives of the University of California's Bancroft Library, brings to life a vibrant and mythic time and place. Through Harriet's eyes, we circulate among the artists and patrons in the salons of Gertrude and Sarah Stein, overhear conversations between the up-and-coming Matisse and his students, and see Gertrude Stein's reaction when she learns of Picasso putting his hand on Toklas's knee. We're present when, while reading the poetry of Tagore, Harriet looks up and for the first time, sees--really sees and understands with the heart--what Matisse is doing.

The gap between rich and poor, included and excluded, advantaged and disadvantaged is steadily growing as inequality becomes one of the most pressing issues of our times. The new edition of this popular text explores current patterns of inequality in the context of increasing globalization, world recession and neoliberal policies of austerity. Within a framework of intersectionality, Bradley discusses various theories and concepts for understanding inequalities of class, gender, ethnicity and age, while an entirely new chapter touches on the social divisions arising from disabilities, non-heterosexual orientations and religious affiliation. Bradley argues that processes of fracturing, which complicate the way we as individuals identify and locate ourselves in relation to the rest of society, exist alongside a tendency to social polarization: at one end of the social hierarchy are the super-rich; at the other end, long-term unemployment and job insecurity are the fate of many, especially the young. In the reordering of the social hierarchy, members of certain ethnic minority groups, disabled people and particular segments of the working class suffer disproportionately, while prevailing economic conditions threaten to offset the gains made by women in past decades. Fractured Identities shows how only by understanding and challenging these developments can we hope to build a fairer and more socially inclusive society.

For more than two decades, Pediatric Injectable Drugs (The Teddy Bear Book), has served an important and continuing need for reliable evidence-based information specific to pediatric injectable drugs. The tenth edition of this invaluable reference has grown to cover 238 drugs commonly used in the treatment of infants and children, including 20 new to this edition.

For nearly 40 years, Ronald Reagan's vision--small government, lower taxes, and self-reliant individualism--has remained America's dominant political ideology. The Democratic Party has offered no truly convincing competing vision. Instead, American liberalism has fallen under the spell of identity politics.Mark Lilla argues with acerbic wit that liberals, originally driven by a sincere desire to protect the most vulnerable Americans, have now unwittingly invested their energies in social movements rather than winning elections. This abandonment of political priorities has had dire consequences. But, with the Republican Party led by an unpredictable demagogue and in ideological disarray, Lilla believes liberals now have an opportunity to turn from the divisive politics of identity, and offer positive ideas for a shared future. A fiercely-argued, no-nonsense book, *The Once and Future Liberal* is essential reading for our momentous times. Comforting a dying car crash victim before being invited into the woman's privileged family's home, Frances is transformed through her friendships with two family members from an unknown editor to a sought-after figure in literary society. A first novel.

Emma is a struggling mum, faintly resentful of her husband and children and their domestic needs; she misses her career and feels she has lost herself. Nina is a successful painter in a second marriage with a teenage daughter; she is sophisticated, independent, and entirely in control. When the two women meet, Nina generously draws Emma into her life. But this isn't the first time their paths have crossed. Nina remembers Emma, and she remembers what Emma dad... A seemingly innocent friendship slowly develops into a danergous game of cat and mouse as Nina eases her way into Emma's life. Soon, it becomes clear that Nina wants something from her unwitting companion - something that might just destroy Emma completely...
