Robert Bazell presents a riveting account of how Herceptin was born. Her-2 is a story of dramatic discoveries and strong personalities, showing the combination of scientific investigation, money, politics, ego, corporate decisions, patient activism, and luck involved in moving this groundbreaking drug from the lab to a patient's bedside.

HER-2 has been acknowledged as a protooncogene since a mutated form, the NEU oncogene, was isolated using cell transformation studies in the rat that used tumour DNA . Moreover, amplification of the HER-2 gene occurs in a number of different cancers and is particularly prevalent in invasive carcinoma of the breast (Figure 3) [14-16].
