

Herb Martinez S Guide To Pinstriping

Green magic, or stewardship of the earth, begins right in our own backyards. When we cultivate an herb garden—even if it’s just a few potted plants on a sunny windowsill—we are tending living, sentient beings who respond to our intention, our energy, and our tender loving care. The “fae” (faerie) essence residing at the heart of each nurtured plant manifests in its foliage, flowers, fragrance, and flavor, and its unique healing, nourishing, and restorative properties. In The Faeries’ Guide to Green Magic from the Garden author and free-fae-spirit Jamie Wood offers fresh, faerie-centric profiles of thirty-three familiar medicinal and culinary herbs accompanied by recipes for natural healing remedies, earth-friendly beauty products, and tasty treats. Fantasy artist Lisa Steinke pairs each herb with a vibrant portrait of its personality—its unique faerie signature—in her lyrical poetry and luminous paintings. With blissful blessings, magical meditations, and zesty spells sprinkled throughout, The Faeries’ Guide to Green Magic from the Garden will help you get in touch with your own fae spirit and explore the earthy—and earthy—delights of your own garden.

Even before the heyday of Von Dutch and Big Daddy, the ultimate way to personalize your car or motorcycle was to lay some wicked lines on top of the paintwork. Done with a steady hand and an eye for style, pinstripes speak volumes. In How to Pinstripe, acclaimed veteran striper Alan Johnson teaches you everything you need to know to get started, to further your mastery of the form, or to simply understand how a good design comes together. Following a primer on the history and evolution of pinstriping, this book launches into a step-by-step guide to the pinstriping process—from choosing paint and brushes that suit your style and abilities, to preparing surfaces, experimenting with symmetrical and asymmetrical designs, striping fresh, and using grids and patterns. While stressing the importance of finding your own style and having fun with the hobby, Johnson also explains the basics of color theory and unique considerations for antique and classic cars, hot rods and customs, and motorcycles. For more advanced pinstripers, there’s also tried-and-true advice on apprenticing and working car shows. Illustrated with color photography throughout, How to Pinstripe is the perfect source for beginners and veterans alike.

It’s All Who You Know When Working the System Here’s How to Get to Know the Right People The world’s attention turned to the U.S. Capitol on January 20, 2009, when Barack Obama took the Presidential oath of office. This finding aid will help researchers interested in Japanese war crimes, war criminals, and war crimes trials to navigate the vast holdings of the U.S. National Archives and Records Administration at College Park (NARA). It will also be useful to anyone interested in military, intelligence, political, diplomatic, economic, financial, social, and cultural activities in the Far East during 1931–1951, as well as to those searching for information regarding Allied prisoners of war; the organization, functions, and activities of American and Allied agencies; and the Japanese occupation of countries and the American occupation of Japan. While not aimed at researchers interested in the strategic and tactical military and naval history of the war in the Far East, this finding aid may nevertheless be useful to those with such interests, if only to identify record groups and series of records that may bear on those topics. This finding aid covers records from over twenty record groups and includes materials declassified under the Japanese Imperial Government Disclosure Act of 2000 (PL 106-367) as well as records that were never classified and those declassified before the passage of the Disclosure Act. Because the process of identifying, declassifying, accessioning, and processing of records under the Act is taking place as this finding aid is being compiled, late arriving records may not be identified in this finding aid. Researchers should consult the IWG Web site (<http://www.archives.gov/iwg/>) for a complete and up-to-date listing of records declassified under the Japanese Imperial Government Disclosure Act. Federal agencies involved in the identification and declassification of relevant classified records asserted that there were relatively few records that were still classified. Most relevant records were either never classified or were already in NARA’s custody. While this finding aid’s coverage is broad, it is not comprehensive. Researchers may find other relevant series of records within the record groups mentioned or not mentioned. Researchers are encouraged to use other finding aids and consult with NARA staff to locate records of interest. In addition, the National Archives at College Park holds non textual records (such as still photographs and motion pictures) that researchers may want to examine. Other NARA facilities hold many records and donated material related to World War II, including records related to the subjects covered in this finding aid. This is particularly true of the Franklin D. Roosevelt, the Harry S. Truman, and the Dwight D. Think of archives as vast mountain ranges of records with the archivists guiding the expeditions. Explorations on familiar, well-trodden paths produce new perspectives when examined with fresh eyes and imagination.

“In a world where we are so often dividing ourselves into us and them, this book feels like a kind of magic, celebrating all beliefs, ethnicities, and unknowns.” —The New York Times Book Review Aristotle & Dante Discover the Secrets of the Universe meets Roswell by way of Laurie Halse Anderson in this astonishing, genre-bending novel about a Mexican American teen who discovers profound connections between immigration, folklore, and alien life. It’s been three years since ICE raids and phone calls from Mexico and an ill-fated walk across the Sonoran. Three years since Sia Martinez’s mom disappeared. Sia wants to move on, but it’s hard in her tiny Arizona town where people refer to her mom’s deportation as “an unfortunate incident.” Sia knows that her mom must be dead, but every new moon Sia drives into the desert and lights San Anthony and la Guadalupe candles to guide her mom home. Then one night, under a million stars, Sia’s life and the world as we know it cracks wide open. Because a blue-lit spacecraft crashes in front of Sia’s car...and it’s carrying her mom, who’s very much alive. As Sia races to save her mom from armed—quite-possibly—alien soldiers, she uncovers secrets as profound as they are dangerous in this stunning and inventive exploration of first love, family, immigration, and our vast, limitless universe.
