By standardizing and evaluating the health of active plant-derived compounds, herbal drugs can help the emergence of a new era of the healthcare system to treat human diseases in the future. Awareness of traditional knowledge and medicinal plants can play a key role in the exploitation and discovery of natural plant resources.

Medicinal plants: Past history and future perspective

Herbal products are of interest to many patients and health care practitioners since about 70% of population worldwide rely on herbal medicines for part of their primary health care [1]. In different regions and cultures, herbal products are used as single herb, combination of herbs, or combination of herb(s) and drug(s).
